DIAMOND GENETICS

Hereby another issue of our magazine; Hotspots. We are proud of the articles, the bull proof information and of course the advertisements. Each time we see more and more companies, and breeders valuing Hotspots as part of their marketing strategies. No wonder, Hotspots is now being sent to breeders and companies in 34 different countries!

In this issue we introduce two new different projects, Holsteinplaza and the Online Elite Bull Sale. Holsteinplaza will be the North American sister company of Eurogenes, we are excited the opportunities this company will meet in the upcoming years. In the autumn of this year Holsteinplaza will launch the first online embryo sale. The online Elite Bull Sale is already much talked about, and after this issue of Hotspots the discussions will continue. Some friends have responded positively some friends have also seen it as a threat. We understand the AI business is in changing times and for breeders and AI companies it has not become easier. Many breeders are getting disappointed about the declining number of bulls sold and the missing income which they need to make their breeding programs viable. These farmers who run these breeding programs have always been the backbone of the breed's development in the world, and the backbone of many jobs in this industry. Veterinarians, Holstein Magazines, AI companies, Commercial companies and many more other businesses all live from the enthusiasm of breeder, losing part of this would be a big blow for all people in the Holstein Industry. Together, AI organizations and breeders have to find a compromise of how the breeders are being compensated for their work. We think with organizing an online bull sale, it will increase the prices paid for bulls and will help motivate breeders around the world to stay doing what they love to do, and make sure the AI companies are able to pick up valuable bulls now but also in the future! We hope to see each other maybe in Madison, Toronto or Cremona!

→ A new Era has come Holstein Plaza and Eurogenes present: The first online AI BULL SALE

In recent years our industry has been overwhelmed with the arrival of genomics. Before the arrival of genomics, criteria such as type, pedigree, and pedigree indexes were the main issues, for AI companies to decide whether or not to purchase a bull. However, since (only!!) 2008, we have seen that the main criteria for AI companies to purchase a bull is now their genomic value.

Test as many as possible

We now see that some of the AI companies write as many bull contracts as possible, to ensure that there are enough bulls born to test for genomics, making the chances of success higher. From the perspective of AI companies this is a very logical way of thinking; the more bulls you test, the more chances you have for a high one, the more high bulls you have, the more semen you should be able to sell. However all bulls tested have to be produced and paid for. Experience tells us that producing bulls for AI companies is quite a costly affair. First of all a highly interesting female with superior genetics need to be developed. These females are created during a long time span and each generation needs the right matings, and needs to produce enough females to select from. Today breeders across the world wonder if the current price paid for bulls going into AI centers is sufficient to cover the expenses and work involved. The European company Eurogenes and the American organization Holsteinplaza strive to bring the price of bulls back to a healthy level for breeders and AI companies. For this reason Holsteinplaza and Eurogenes have decided to organize the first online Bull Sale in November this year. In the rest of this article we will try to explain to you how this Sale will work.

Consigning bulls

The consignments will come from the members of Holsteinplaza and Eurogenes. Eurogenes and Holsteinplaza create and maintain websites for breeders, publish the magazine Hotspots and organize various sales through the internet.

Bull indexes to breeders

There are currently 8 calculation centers approved by Interbull for calculating Interbull breeding values. These 8 are the Dutch organization GES, the Canadian CDN, The American USDA, the German VIT, the Scandinavian NAV, The New Zealand LIC, the Polish Federation of Cattle Breeders and Dairy Farmers and the French, France Génétique Elevage. At this point we know that the American USDA will publish genomic breeding values for bull calves to breeders as of March 2013. If and when other calculation centers will follow is, at this point, not certain. It seems likely that some of these laboratories and calculation centers will market their techniques to breeders earlier since the development of these systems have involved high costs and the competition between labs will increase after 2013.

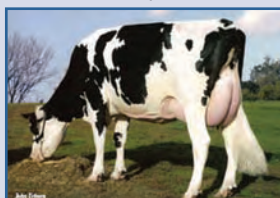

A few examples of bull packages in the first Online AI Bull Sale

Your chance on a son of
Cosmopolitan

RC son out of Debutante her
Shottle dtr sells!!

Grand sons of
De-Su Oman 6121

1st Choice from pregnancies of
Baviere! #1 Shottle in Europe!

Bull packages in the Sale

The bulls selected need to have an appealing pedigree to AI companies around the globe. There will be around 10 packages of bulls selected. The following types of packages will be offered:

• Packages of bulls born

The bulls must not have been tested for genomics before or during the sale.

• Bulls up to 8 months of age.

It is preferred the bulls are related to each other, but this is not necessary. A group of several highly interesting bulls from different families can also be composed.

The minimum number of bulls offered in one package is three.

Packages of pregnancies

It is preferred the pregnancies are related to each other, however this is not necessary. A group of several highly interesting pregnancies from different families can also be composed.

The minimum number of pregnancies offered in one package is eight. This number can be limited when the sex of the pregnancies is known.

Bulls with a genomic value

A bull with a genomic index that can be published by the purchaser. The organization that tested the bull has to provide genomic updates after each index run.

What bid options are there?

To protect the desires and interests from the sellers as well the buyers, two main bid options are developed. For each bid option there is the option to do one single payment or a payment with a royalty payment construction. Bid forms will then roughly contain the following:

Bid Options

Option A

Bid option 1:

An amount bid in one single payment . No further royalties.
The amount bid is for a First choice bull among all bulls offered or all bull calves born from the offered pregnancies. Subsequently the buyer has the right but not the obligation to buy a second choice bull for 75% of the price offered. Besides this the buyer has the right to buy all remaining bulls for 50% of the price bid for the first choice.

In cases where the genomic testing is being done through the Sale organization, the second choice bull is not available for the buyer but will go to the sale organization for the price of €5.000.

Bid option 2:

An amount bid in a payment and a royalty amount/straw. For the maximum of a certain number of straws sold.
Subsequently the buyer has the right but not the obligation to buy a second choice bull for 75% of the price offered. Besides this the buyer has the right to buy all remaining bulls for 50% of the prices bid. These percentages will be valid for the values bid but not for the number of straws sold.

In cases where the genomic testing is being done through the sale organization, the second choice bull is not available for the buyer but will go to the sale organization for the price of €5.000.

Option B

The buyer can also place a bid for all bulls/pregnancies being offered. The buyer only pays for each semen producing bull. When for example 5 male pregnancies are being sold for €30.000,- resulting in four semen producing bulls the amount to be paid is then $4/5 \times €30.000,- = €24.000,-$.

In cases where the genomic testing is being done through the Sale organization the second choice bull will go to the Sale organization for €5.000,-. In the case described above the buyer will get 3 semen producing bulls and will be invoiced $3/5 = €18.000,-$.
There is no guarantee for levels of genomic values, however semen production is guaranteed.

The bid form will then contain the following

Bid option A1

First choice bull between all bull calves offered: € _____.

No royalties included.

After this the buyer has the right to purchase the second choice bull for 75% and all remaining bulls for 50% of the price bid.

Bid option A2

One single payment : € _____ Royalty /straw € _____ with the maximum of _____ straws/or unlimited.

After this the buyer has the right to purchase the second choice bull for 75% and all remaining bulls for 50% of the price bid.

Bid option B1

One single payment:€ _____. No royalties included.

Each semen producing bull will be invoiced.

Bid option B2

One single payment : € _____ Royalty /straw € _____ with the maximum of _____ straws/or unlimited.

The total nr of straws sold will determine the total amount of royalties to be paid.

Questions (Q) and Answers (A):

Q: How to choose between the different bids?

A: The Sale organization will present the seller with the followings bids after the Sale is closed:

- Only the highest within the Option A1 and B1
- All bids within the Options A2 and B2

Q: Will the bids be made public?

A: Only the successful bidders will be announced. The Sale organization and also the seller will be treated with confidentiality.

Q: Who and where will bulls be evaluated genomically?

A: The purchaser has the right to receive blood or hair or tissue within 3 weeks after birth of the last bull being born. This in order to perform a genomic test. After material for evaluation is sent, the purchaser should make his choice within 6 months. If the purchaser has no access to genomic evaluation of bull calves, the Sale organization offers the possibility to evaluate the bull calves. In this case the second choice bull will not be available to the purchaser. This is the case for all bid options. When the Sale organization performs genomic testing on the bull calves the seller has to agree to sell the second choice bull to the Sale organization for € 5.000,-.

Q: Will there always be a deal?

A: Bidders and purchasers cannot formulate minimum genomic criteria. The bull(s) however should produce semen and needs to meet all technical and health issues involved, as formulated in the Sales conditions.

Q: Are sellers obliged to deliver?

A: Yes, sellers are obliged to actually deliver the bulls they have offered and sold through this auction. The Sale organization guarantees the sale of at least one bull per Sales lot for € 5.000,-

Q: What about existing bull contracts?

A: Both Holsteinplaza and Eurogenes will respect valid bull contracts between sellers and AI organizations.

Q: Can I offer bulls or pregnancies to this Online Sale in which AI organizations have expressed interest?

A: In case contracts are being signed we strongly advise you to respect these. Also in cases of firm and clear verbal agreements.

Q: Should breeders still sign bull contracts?

A: We estimate that in the future Sales like these enables the breeders to market bull calves with high potential to their full extend. For this reason it is difficult to predict the value of bull calves in the future and for that reason breeders do not want to get caught in to low prices for their bulls. On the other hand it is always to advise to make good clear agreements between buyer and seller.

Q: When will the first Auction take place and till when can I consign pregnancies or bulls?

A: The first Online Sale will be held from November 15 to 20. Offerings should be with us by October 15, 2010 at the latest.

For more information you can always contact Eurogenes tel: 0031 643985150 email: info@eurogenes.nl or Holsteinplaza tel: 001 240 520 5906 email steve.mower@amsgenetics.com or download the form on our websites www.eurogenes.nl or www.holsteinplaza.com and return this to us before October 15.

We look forward to receive your consignments!

→ Holstein Plaza Has Arrived

Why Become A Member?

- Increase the marketing potential of your genetics by becoming part of an extensive network of breeders across North America
- Members receive a continuous 50% discount towards advertising in Hotspots and can get a full-page, full-color advertisement for \$300
- Monthly updates are provided to keep each member's information as current as possible
- Gain access to online auctions, special organized trips, and tours to unique events and sales
- Stay up-to-date in the industry with current news and events, top genomic animals, mating sire lists, and videos highlighting recent shows and news

Holstein Plaza is bringing a new dimension to marketing. Holstein Plaza is a site that is designed for its members to promote, merchandise, and connect farmers and breeders throughout North America and the world with elite Holstein genetics. The site will serve as an online marketplace by hosting several online auctions each year, featuring top consignments from its members. Tie this up with its affiliation with Hotspots magazine, the Journal of International Holstein Breeding, and your promotion program is in overdrive.

Holstein Plaza will allow its members to spotlight donors they are currently working with, providing up-to-date information on who is available for flushing or contracting. With the search parameters, prospective buyers can see what donors are available on the site which meet their buying specifications.

You will also find valuable information in a simple, user-friendly format, such as the current top genomic animals, mating sire lists, current news and events, and videos highlighting recent shows and news. Members will be supplying news of happenings within their herds including classification updates, sale consignments, and other important information they wish to feature on the site.

Membership has it benefits and privileges

Members will see what the power of the internet can do for their breeding and merchandising program. Holstein Plaza will bring breeders and AI companies right to your barn doors when they look at your farm page and see what you have to offer. By being a member-driven website, it allows potential buyers easy access to the best genetics for whatever their breeding goals may be. The Holstein Plaza team works with the members on a continuous basis to maintain the most current and highest quality information on their page. The focus will also be on promoting the site to a wide variety of potential buyers for embryos, calves, and top donor cows, which in turn will increase the bottom line of their operation.

By becoming a member, you will also become part of an extensive network of breeders around the

United States and Canada who are marketing genetics to North America and throughout the world. Membership also gives you a 50% discount on advertising in the Hotspots magazine. That means you can place a full-color, full-page advertisement in a magazine read by over 10,000 people in 36 different countries for \$300. We are talking major exposure to the international Holstein scene. In fact, if you place a full-page advertisement in the four issues of Hotspots and consider the 50% discount, you will pay for your membership and have money left over while advertising to the world. Holstein Plaza will also build camaraderie amongst its members by organizing special trips, tours, and unique events and sales for the benefit of the members. We are welcoming new members every day and invite you to become part of Holstein Plaza and utilize the website to its fullest. Breeders such as Stanton Brothers in Ontario, Passion Holsteins in Quebec, and Recipient Solutions in Maryland did not think twice about increasing their exposure and becoming part of an active marketing site.

The Breeder's Page

Each member of Holstein Plaza has a breeder's page on the website, which features the contact information, a brief description of the farm and/or breeding program, and pictures of the operation and logo. Members can feature up to fifteen cows from their herd, and each animal will have a brief biography and photo as well. Each donor featured will have its own page that will provide the current classification and production information, along with pictures, pedigree, and consignments. It can also include embryos that are available, live offspring, flushing schedule, or any other pertinent information. Each member's page and donor information is updated on a monthly basis to keep it current.

The website also features a donor search where a potential buyer can search under index, classification score, common name, or family name to find cows that meet their interest. This feature gives members' donors another opportunity to be exposed to buyers looking for a particular family or index level.

Online Auctions

Throughout the year, Holstein Plaza will host regular and special online auctions featuring embryos, choice of flushes, and live heifers from its members, which will entice breeders all over the world. The auctions will allow members to develop a domestic, as well as an international, embryo market from their breeding program. The sales will offer a wide variety of pedigrees, from show-type to index, to appeal to the broad marketplace. All auctions will be done in cooperation with AMS Genetics who will handle the sales and all export shipping. This affiliation with AMS Genetics will open up the international marketplace, so buyers do not have to worry about how they are going to get the embryos they buy. The auction site is a major aspect of marketing Holstein Plaza members' genetics and driving potential buyers to their herd.

The Informational Site

Holstein Plaza is a source of information to help you keep up on what is happening in the industry. You will find the mating sires list, which is the list of sires that AI Studs from around the globe are using as sire-of-sons. You will also find the current top Genomic lists from the U.S. so you can see where your heifers or cows are rating on the domestic front. The news and events will keep you up-to-date on what is happening in the industry, and the Hotspots section of the web site will allow viewing of an online edition of the magazine while keeping track of the next advertising deadline and features.

Other ways to promote on Holstein Plaza

Breeders can also promote their operations in other ways on the site as a member by submitting videos to the Holstein Plaza YouTube Channel, which can be featured on Holstein Plaza. The team encourages members to submit videos of their special donors, field days, shows, and other special or fun videos. Members can also submit news articles and information to let the breeders know the highlights of their last classification, show, sale, special recognitions, or other news about their breeding program, which can be featured in the news section of

the website. It is a member-driven site, so make the most of the site to help promote your breeding program. Holstein Plaza offers plenty of banner advertisement possibilities for special promotions. The home page has a sale feature section that is for members only to promote embryos, sale consignments, or private treaty offers. Contact a Holstein Plaza team member to find out more about this special promotion section.

Kim Lundgren is the person on the other side of the phone entering in your data and making sure information is up-to-date. Kim has a dairy background growing up on Sco-Lo Holsteins in West Union, Iowa. She now lives in Hagerstown, MD, with her husband, Chris, who is herdsman at Recipient Solutions and their 2 year-old son, Jaxson.

Becoming a Member

Becoming a member is easy, and we welcome you to become a part of Holstein Plaza. Contact a member of the Holstein Plaza team today and decide which membership level you want. Membership is based on the number of donors you want to promote on your breeder page at any given time. Give the team member the information about your operation and the donors you want to feature, pictures, and any other information you feel is important for your page. Then leave the rest up to us. We will also do research to add any other additional information on your donors and your page will be up within a matter of days.

Make Holstein Plaza an Innovative part of Your Marketing Program

Holstein Plaza gives you the total package. Not only does Holstein Plaza promote your genetics, but it also serves as your personal marketing tool to help you increase sales on your farm. Add Hotspots and the international network of AMS Genetics, and you have a marketing program that goes full circle. Turn your embryo inventory and donor herd into an active part of your merchandising program by becoming a member today!

For the best in world class donor care Recipient Solutions is your answer. Three facilities offer the ability to customize the type of housing your donor needs. You can choose from box stall, pack barn or tie stall housing. The herdspeople at Recipient Solutions are experienced in caring for elite cattle. They are committed to giving your donor the quality care needed to optimize the genetic impact of your donor through embryos, pregnancies and calves.

Donors housed at Recipient Solutions have access to the cutting edge embryo transfer technology. Services available are embryo transfer, IVF and IVF with reverse sorted sexed semen and several different recipient options. The Veterinary Staff and ET center are approved to handle all your export needs.

Whittier-Farms Leadman Mae

➔ Brood Cow Extra Ordinaire

Seldom do we see a high EX cow with such brood cow power as Whittier-Farms Lead Mae EX-95. Mae is bred from a great family and surpassed her owners and investors high expectations in her very own way. She is the matron behind #1 CTPI cows and a key factor in the high success rate of the Lead Mae bulls in this genomic era. This cow family has shown that it is able to do many things right in a great 'Lead Mae way'. Are you ready to learn more?

Ven-Dairy Wonder, the nr.
1 GTPI Shottle son and
from the Lead Mae's!

Top 5 Genomic bulls from Lead Mae cow family:

Dirigo, Whittier-Farms and Wauregan

Steve and Debbie Keene from Dirigo Holsteins in Maine sold the dam of Lead Mae as a pick of a flush to Whittier-Farms in Massachusetts. There, Raymau Bstar Monica, bred by the Keenes from a deep cow family, got flushed as a fancy maiden to Leadman. When Raymau Blackstar Monica calved at Whittier-Farms her natural bull calf was purchased by an AI station even before she got recorded or classified. Then Bruce Smith from Wauregan Farms in Maine heard about this very promising Blackstar. He immediately went down and purchased both Monica, now VG-89 on her very first classification, and her Leadman daughter. At Wauregan she unfortunately died only a few months later after an allergic reaction to a herd vaccination. Daughter Whittier-Farms Lead Mae however turned out to be as good as her dam. She calved at Wauregan Farms and classified VG-89 too, right away in her first lactation. Visitors at that time remembered this Leadman as one of the best Leadman's they had seen. Maybe not the wet-test heifer, but her type, frame, feet and legs and especially her udder were astonishing. Moreover, she held the promise of a much higher classification score with her youth and correctness. A promise she turned into reality!

Crocket-Acres and Wabash-Way

Every time Dave Franzer from Crocket-Acres and All-Star Genetics in Ohio visited Wauregan he could not stop thinking about this fine Leadman and became determined to own her or at least something from her. He eventually succeeded in buying her Bellwood and Rudolph daughter that were born in Canada. The Bellwood went on to score EX-91 and the Rudolph scored EX-90. Both have started their own families and proved to be fantastic brood cows. As Dave Franzer did not have his own herd he decided to move some of the younger Lead Mae's he had bred to a farm nearby. This herd, Wabash-Way of Terrence Stammen, then housed and eventually owned several famous Lead Mae descendants such as Crocket-Acres Mtoto Elly EX-90, the Mtoto from the EX-90 Rudolph and dam to the former nr. 1 CTPI cow Crocket-Acres Elita VG-87 by O-Man. It was here that Elita's Shottle daughter Wabash-Way Emilyann VG-88 was born, the Mae descendant that is now writing her own chapter in this unparalleled success story.

Mae's career at Mayerlane

Meanwhile Lead Mae herself was classified EX-94 and dry when Don & Liz Mayer and Dr. Scott Armbrust purchased her in 1997. They flushed her another 18 months and succeeded in producing and sell-

ing quite a few embryos from her. When Don Mayer calved her out again in 2000 she classified EX-95 and made a fantastic third lactation of 18.725kgM with 4.8%F and 3.3%P in 365 days. The Mayerlane track record in calving out older flush cows is great and Lead Mae's qualities came to new heights at this well managed Wisconsin herd. One of her best daughters at Mayerlane turned out to be Mayerlane-SA Durham Mae EX-92. From Durham Mae her daughters, so far 7 out of 8 classified EX with second calf! She actually sold to Wallman Dairies in Nebraska but stayed at Mayerlane as Lead Mae's very first daughters by Rudolph and Bellwood did before they went to Wabash-Way. Looking back it can be concluded that most of Lead Mae her own sons that went into (European) AI have not left great impressions. In Spain at Aberekin AI, however they were pleased with her son by Eland named ALH Everest. Also Durham son Durango has a good proof in Spain. We now know that Lead Mae her daughters DID perform: Most of them have started tremendous families of their own in several breeding herds. At the Stantons in Ontario for instance and at Morningview in Iowa, where they had great success with a Durham daughter from the original EX-91 Bellwood daughter of Lead Mae. A Durham they purchased on a Mayerlane Sale.

The Morningview connection

Crocket-Acres Durham Mae VG-87 GMD DOM really got the Mae's moving for Morningview Holsteins. Every single daughter they freshened from her has generated bull contracts and has been flushed. 'This is quite an achievement and we feel the Lead Mae's deserve a

Jim Stanton:

“ We have found this family to excel in many areas. They are super uddered cows with exceptional feet and legs. They have the ability to produce large amounts of milk and have enough strength to do this easily”.

special place in our breeding program' says Tom Schmitt. The Durham has 16 (!) sons with a proof of which Champion son Chicago is a welcome addition to the Aberekin sire line up whilst her Oman son and sire of sons Morningview Legend from ABS Global is one of the bulls that prove there is more than just great cows to rise from the Lead Mae gene pool. The Chicago bull has an EX-92 full sister at

Whittier-Farms Lead Mae EX-95
Brood cow extra-ordinaire with an EX-97 MS.

Wabash-Way Emilyann VG-88
Cow family, production, type, index, sire stack, Emilyann has it all. Her first choice Superstition son sold for € 53.153 to Generations in Canada as a Holland Masters Sale Lot.

Morningview and the Schmitts have freshened a promising Mac from a VG-87 Shottle daughter of this Morningview Champion Martha cow. A super uddered Goldwyn granddaughter from Durham Mae VG-87 is now EX-90 with second calf and is making another high component lactation. A cow the Schmitts have marketed heavily from is Morningview Shottle Lucy VG-86, a Shottle from Legend's full sister. Her first choice Domain recently sold for USD 38.000. Lucy is due to calf any day again. Her Millions are really high on genomics and Lucy herself is the current # 31 GTPI cow in the US breed.

Canada and the US

The Lead Mae family has many descendants in the US and also in Canada. This is quite a special feature and is not seen that often. Wau-regan Farms started to market from Lead Mae herself into Canada and Stanton Brothers in Ontario discovered the family not much later and actually well before the first Mae's started to cream at the top of the CTPI lists. Jim Stanton says that a Wade direct from Lead Mae and two daughters from Lead Mae's EX-91 Bellwood daughter were their first purchases. Later on Mtoto Elly and two of her daughters by Finley and Outside joined the Lead Mae clan at Stantons. Of course Oman Elita VG-87 that captured the nr. 1 CTPI spot took the family to a higher level and Jim Stanton says that everyone that comes down to see her is amazed by her size and scale. About the family in general Jim states: "We have found them to excel in many areas. They are super uddered cows with exceptional feet and legs. They have the ability to produce large amounts of milk and have enough strength to do this easily". The Stantons are glad they stepped into the family and own some of the most prolific members. Their investments are paying off too as they sold Stantons PS Eden (Shottle x Outside x Mtoto Elly) for CA\$ 105.000 at last year's Sale of the Stars to Ponderosa Holsteins in Spain, Europe.

The best of the best

Crocket-Acres Elita VG-87 by Oman, her dam by Mtoto and now Wabash-Way Emilyann VG-88, the Shottle daughter from Elita, they all have made it to the top of the (genomic) CTPI lists. Elita was a nr. 1 for a long time as well as Emilyann. Also Emilyann's full sister Evett VG-86 has great production, type and index. Elita's full brothers Eight (currently nr. 6 LPI in Canada) and Otto are seeing considerable use although they transmit the Oman type more than the legendary Lead Mae profiles. It seems that the shift of the global Holstein breeding goals towards more durability and functional type did help the Lead Mae family to deliver it's very best. Bulls like Rudolph, Durham, Mto-

to and Oman have all been used and have done extremely well. Especially Wauregan Rudolph Elly Mae EX-90 has a key role in the development of this family. She is at the base of today's best of the best Mae branches. In Holland, Excellent Holsteins has two May 2009 Mac daughters direct from Elly Mae and they look awesome. For Carlos Ugarte from Aberekin in Spain the Lead Mae's are from a very special league. "We see Lead Mae as a very important source for type and health traits. Bulls from her family excel in these traits." Breeders in England and Spain have also invested in the best of the best. Willsbro Holsteins from Cornwall, England, bought Planet embryos from Shottle Emilyann VG-88 through ADI Cattle Corporation, ADI co-owned Emilyann for a while, and got three heifers. They have sold the highest genomic indexed Planet for over GBP 90.000 on their first Willsbro Sale, also to Ponderosa Holsteins in Spain. This good looking heifer will remain at the excellent Willsbro facilities for time being and these three Planets will all be flushed this autumn. Via an Eurogenes Online Heifer Sale, Augustin Romero from Ponderosa Holsteins also bought a great looking Mac daughter from Rock-Home Outside Macey EX-93..

Today's leading Mae's

Emilyann VG-88, she made USD 630.000 in the 2008 ADI Global Glamour Sale and was sold again privately in 2010 to the Stantons, has moved the family to the Upper Class position and now her Bolton daughter looks like she will be another hot Mae. We mentioned the fresh Mac and Shottle Lucy VG-86 at Morningview and Jim Stanton says that a VG -85 Bolton from a VG-85 Goldwyn granddaughter from the VG-88 Convincer daughter of Lead Mae is attracting quite some attention: Stantons Bolton Marge VG-85 is projected to over 13.000kgM. In Europe there are also Mae's milking. A direct Durham daughter in Holland, Marwil Leadmae 1 VG-88 has daughters by Titanic and Goldwyn that index extra-ordinary well. Especially two Goldwyns at Ven Dairy have extreme genomic indexes on the Dutch base and have sold many embryos into Dutch AI. One of the Goldwyns, ALH Willie VG-85, is the dam of the nr. 1 GTPI Shottle son, Ven-Dairy Wonder*cv, that is now being marketed by AI Total. Another full sister is at Jan van Zoelen's herd in the province of Zeeland. She is also a bull mother and has similar qualities. Also the Titanic

Rock-Home Outside Macey EX-93

Super Outside daughter and a magnificent Mae. She has Mac daughters in Europe.

Wabash-Way Bolton Emery VG-86, owned by Genervations, Canada.

daughter has a really high Shottle son at RSH in Germany. Ven Dairy has kept buying into the family and bought a Bolton calf from Oman Elita through a Eurogenes Sale. They have just freshened her and this Anderstrup Bolton Elita is a big strong heifer who starts to milk heavily from a well attached udder. Her Sanchez sons test well genomic

Jan van der Ven:

"The Lead Mae's have done better than I ever could have imagined. This family is THE family for me right now"

cally and will leave for AI soon. An Alexander daughter of this promising Bolton is testing extremely high at Bachus Holsteins in Holland. Back in Canada two full sisters to this Bolton already classified VG. Genervation owns Wabash-Way Bolton Emery who classified VG-86 with a VG-87 MS and she makes a good record. Bolton has also done well on one of the Outsides from Durham Mae at Mayerlane. Green Corner Bolt Mattie has scored VG-87 as a first calver and has been sold to Genes Diffusion from France.

Looking back we may conclude that this Leadman that everybody liked in the nineties, indeed has exceeded everyone's high expectations. As the family moves on into this century we are convinced we will hear much more from the Mae's in the years to come.

Ven Dairy Wonder

He is presented already on these pages as the nr 1 GTPI Shottle son worldwide. This VG-86 Shottle son is now 18 months old and is demand all over the world. Peter van Beek from AI Total states: "We are glad we are able to offer a bull with this level of index and pedigree to our clients and we believe that this great individual will bring customer satisfaction. Ven Dairy Wonder shows that the combination of a fantastic cow family and super sire stack can move the Holstein breed further in the right direction". His dam was purchased as a bred heifer by Jan van der Ven from Ven Dairy together with a full sister. Jan van der Ven says: "The Lead Mae's have done better than I ever could have imagined. I did expect good type but the production and late maturity as well as the overall correctness has surprised me. This family is THE family for me right now".

Supplier of Success...

Diamond Genetics sourced and delivered some of the World's best, most interesting and most popular donor cows to new owners all around the World. All have them have one thing in common; they have been very successful for their new owners

Diamond Genetics can offer you the best for either top show, high Genomics or the complete package through the delivery of bulls, embryos, heifers or complete bull dams.

WWW.DIAMONDGENETICS.NL

All the animals below have been bred or sold through Diamond Genetics either as the result of purchasing embryos, heifers or milking donor cows.

Bertaiola Bolton Serena VG-86-NL 2yr. & Bertaiola Bolton Lidia VG-86-NL 2yr.

Serena and Lidia are a perfect example of what Diamond Genetics can offer you.

Both were imported through Diamond Genetics from Italy as virgin heifers and now they are performing great in the herd of Ven Dairy Holsteins (NL). Embryos from both have been exported around the World and Lidia is dam to Europe's #1 Alexander dtr, GTPI 2132

Eurogenes Touring

See some of the the World's greatest cows, herds and shows

The chance to import the World's very best Genetics

Join in and let Eurogenes take care of the rest!

Canada Royal & Inspection Tour November 11th till 17th 2010

This tour will give you the ultimate opportunity to see the best of the Canadian breeding and perhaps bring those genetics to your own farm. Obtaining Canadian top genetics can be one of the reasons for this tour. The Canadian Holstein cows are well-known because of their fantastic show type, with some of them combining the type with high production and great indexes. Everybody knows great cows like Comestar Lautamie Titanic, Gillette 2nd Wind, Braedale Gypsy Grand, Glen Drummond Splendor and others as well as the great proven sires like Outside, Stormatic, Mr. Burns, Champion, Goldwyn, Jordan and more!

Program

Start Royal Agricultural Winter Fair Toronto

Farming tour through farms like Stanton, Gillette, Comestar, Misty Springs, Deslacs, Blondin, Gen-I-Beq, Boviteq, Delaberge and more of the leading Canadian farms

Flight back from Montreal

European Show Tour October 29th till 31st 2010

This year will be the first European Show in 4 years! Cremona will be the place to be for the global Holstein breeders on October 30, 2010, where the best cows from Europe will face each other.

Join Eurogenes on this great 3-day tour and see some of the best cows in Europe!"

Eurogenes will take care of the travel, hotel accomodations and dinners for these trips.

Contact Eurogenes for more information about the Fall 2010 Eurogenes Tours.

Eurogenes Online Heifer Sale

WWW.EUROGENES.COM

Sale by Dutch auction through the Eurogenes Sale website at www.eurogenes.com

Every day the prices will go down until the moment of purchase. Register yourself at the sale site for your personal bid number which enables you to watch the current prices and place your bids. Place your bids safe, fast and easily at the on-line sale catalogue.

Quality Sale Animals

All sale animals have been inspected by the sale organization, and have passed the test for great quality. Watch the sale site for the online pictures of the sale animals or contact any one of the sales contacts for more information on the sale animals. It's also possible to inspect the sale animals on the farm prior arrangement.

Contracts

Plenty of sale animals will sell with lucrative bull- and embryo contracts and huge contract interest.

Genomics

Every live animal sells with genomic results, giving you complete confidence in your investment.

Export of animals

The animals are housed in different countries and are all qualify for export to all European countries! Eurogenes has a wealth of experience in exporting animals and will take care of your purchase till they reach their destination. Eurogenes have exported animals already to England, Ireland, Netherlands, Denmark, Germany, Belgium, Luxembourg, France, Spain, Italy, Switzerland, Czech Republic and more!

Bidding

Bidding in the online sale is safe and easy to do on the Eurogenes Online Sale site (<http://sale.eurogenes.com>). Bids can alternatively be placed with one of our contact persons. You can place your maximum bid, when this price is reached the sale animal automatically becomes yours, or you can keep an eye on the current price and buy the sale animal for the "buy now" price.

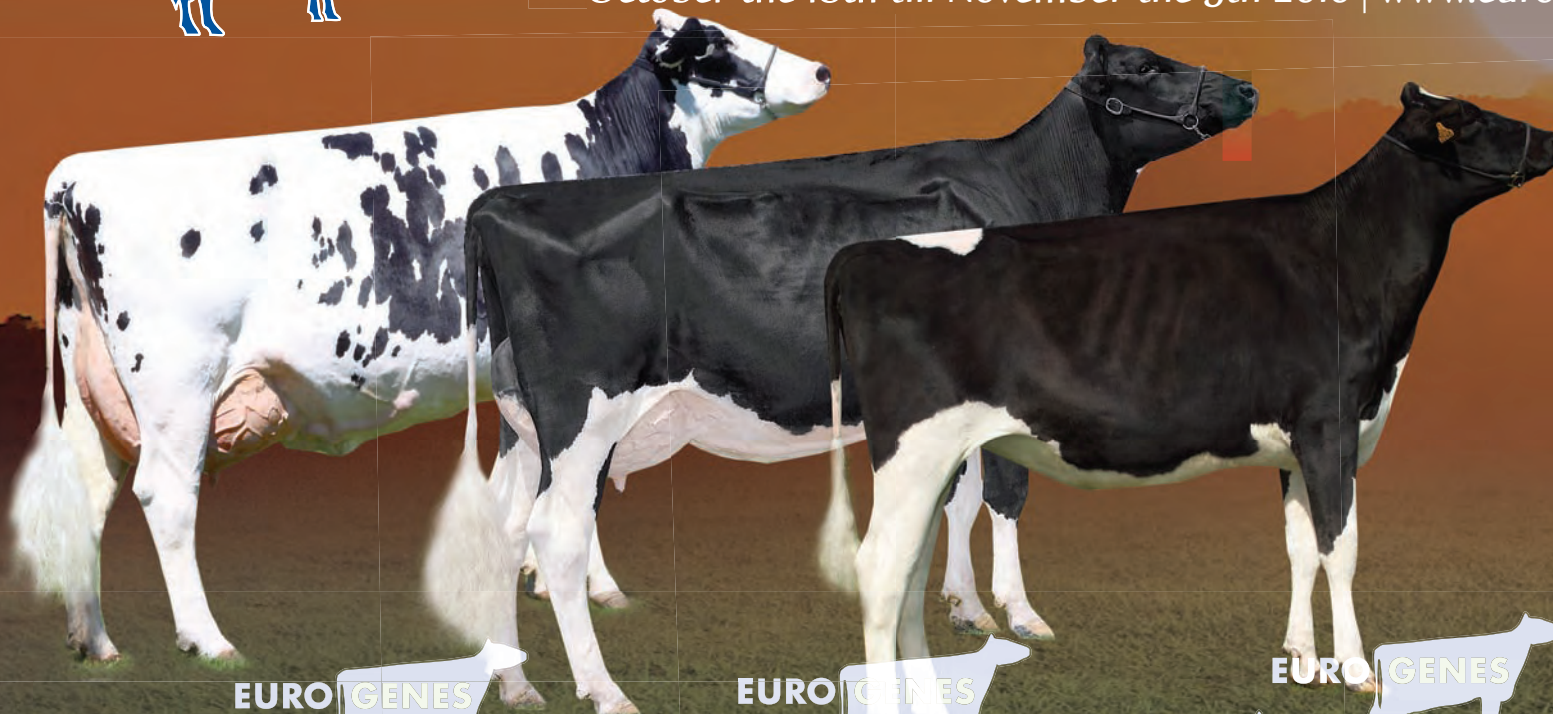

The Catalogue will be online at www.eurogenes.com

Watch the next 2 pages for some examples of the World Class animals which will sell

Have you heard of the Mia's? This top-genomic family is making shock waves throughout the industry and it isn't all about numbers. The family unit hails from generations of highly productive females with Excellent udders producing peak amounts of milk.

Starting with MEMPHIS, he is one of O Man's highest type sons available and his Morty dam completes five generations of Excellent udders!

MAGNUM is 536H00322 JANCE's first son and follows in his family's footsteps of solid type, top components and positive production.

Finally, LANCASTER hails from Shottle May, a superstar among this great family. This Bolivia son leads his half brothers for type and fat, while maintaining plus production.

Each generation, the Mia family adds to its thriving reign. Why not add some of these highly successful genetics to your herd? Give us a call to order semen on MEMPHIS, MAGNUM and LANCASTER!

The Ghost Family

→ When only the best will do

UK breeders have long appreciated the qualities of the Ghost family. Imported from Canada in the nineties, the family is renowned for making great cows, and show-stopping type. In this issue of Hotspots we look at the story so far, and examine what makes this family so popular amongst British breeders and why AI's are expressing an increasing amount of interest amongst the family.

Canadian roots

During a visit to Canada's Royal Winter Fair in 1993, Scottish breeder Jimmy Hodge visited Robin Parish's Robrook farms, in Woodville, Ontario. At the time he was looking to purchase something that extra bit special, intent on taking it back to grace the UK show ring. On arriving at Robrook, Jimmy remembers being really impressed, by a milking heifer that was just 4 or 5 days fresh. "Ghost really stood out, she was tall and dairy and nearly all white. She had a fantastic bone structure, and even though she was only a few days calved she already had a great mammary". Backed by 4 generations of VG dams, and out of a Triple Crown dam, the deal was done and on a spring day in 1994, Ghost arrived into Manchester airport, mid-way through her first lactation.

Ridgefield Shottle Ghost VG-89 3yr
Currently one of the family's biggest stars- owned by Willsbro Holsteins

Facts:

- Since the first member of the Ghost family was born in the UK in 1995 -1948 females and 146 males have been registered from the family!
- Every female member of the Ghost family has tested over 3 points on GPTAT
- There have been 6 successive generations of Ghosts' classified over 92 points in the UK!
- Riverdane Gallant (James X Ridgefield Storm Ghost 2 EX-93 2E) is the first proven sire from the Ghost family - 92% of his dtrs GP or better

The Challenge

Witbourne Counselor Ghost EX-92 as Jimmy puts it was "a challenging cow to work with", put her in amongst the herd and she was without doubt the "head cow" the challenge was working with her on an individual basis, or indeed trying to get anywhere near her with a needle for flushing!

The next year in her 2nd lactation she enjoyed considerable success in the show-ring including Honorary Mention at the 1995 National Holstein Show, and Reserve All Britain Junior Cow in Milk.

The Counselor bred 6 daughters, sired by Skychief, Chesapeake, Royce, and Storm which averaged nearly 89 points. At Lemington the family still runs into double figures, and undoubtedly the strength of the cow family is in their fantastic mammary systems.

Skychief success

Soon after arriving in the UK Ghost was bred to Donnandale Skychief, who was one of Semex's top type sires at the time, so successful was this cross that breeder Jimmy flushed the Counselor again to him years later. This proved to be the catalyst of the cow family, resulting in Lemington Skychief Ghost. Following Counselor Ghost's success during 1995 Jimmy decided to consign the Skychief calf to the Black and White sale in the November, and she sold for 6,000gns to the Bown family. Richard Bown really admired the calf "she was really stylish, with a super sweep of rib and tremendous length of body, I thought she had great potential and wanted her for the Holstein show the following year". She continued to develop and in the February of 1996 she won her class and went on to win Champion calf under Canadian judge Don Johnston. Upon calving she classified VG-88 as a 2 year old winning milking heifer classes at the Cow of the Year show,

3 generations of Show winning type

Witbourne Counselor Ghost EX-92

Lemington Skychief Ghost EX-95 3E

Castlerhydd Milan Ghost EX-94 4E

and the Royal Welsh, her mammary system was picture perfect, she had a tremendous rear udder with superb veination throughout- something which all the Ghost family have notably inherited. Every lactation she won shows, and she went on to win classes at the Royal show in 2000 and 2002, classifying EX-95 3E. Her Counselor dam perhaps wasn't the greatest milker, and Skychief's were not renowned for massive yields either, but Skychief Ghost was a great producer and twice gave over 15,000kgs in 305 day lactations!

Traditions

The tradition of selling the first female of the family continued, when Castlerhydd Holsteins (now known as Richaven) consigned the first heifer from the Skychief - Castlerhydd Milan Ghost to the Semex Celebration sale in 1998. As a calf the Milan, was very dairy and long, but inherited a little too much set in her leg like her paternal sire and grandsire, she realised 2,700gns, selling to Ridgefield Holsteins. At Ridgefield she developed into a great cow, and typical of the family got better with age, scoring EX-94 4E, with yields of up to 13,797kgs, she bred 6 daughters which averaged over 90 points classification, including Excellent daughters by Lee, September Storm, and most notably the type specialist and legs and feet transmitter Storm, which resulted in amongst others Ridgefield Storm Ghost 2 EX-93 2E a key cow in this family.

There and back again

Storm Ghost 2 was sold as a milking heifer as part of a package of 4 animals to Ridgefield's ET vet and well known Holstein breeder Mark Nutsford, She calved in 2003 for the second time at Riverdane, and proved to be a formidable cow on the shavings, winning her class at both the National Holstein Show and the Royal - the UK's two premier shows, and was awarded All Britain Junior Cow in Milk. At this time and with new management in at Ridgefield, Storm Ghost 2 was re-purchased privately for a considerable amount by Ridgefield, to headline their show team. She made a successful

Chris Norton, Auctioneer, Norton and Brooksbank

Over recent years the Ghost family has been incredibly in demand in the UK auction ring. It is one of the best uddered families in the world in my opinion and this reflects in the auction prices the family has commanded in recent years.

comeback to the show ring in 2005 when she was Reserve Champion at both the National and Royal shows and repeated her All Britain success as a third calver.

Successful brood cow

Storm Ghost 2 has proven herself to be an exceptional brood cow as have the generations before her, 11 classified dtrs from her average 88 points! Her natural calf that she had at Riverdane -Riverdane Terrason Ghost went on to break the UK record for an in-calf heifer sold at public auction when she realised 27,000gns selling to Eurogenes member Bev Baker of BB Holsteins , she is now classified EX94 2E and already her first 2 dtrs by Allen are both classified EX-92 in Bill Nadins Sterndale herd, and she has a VG-87 2yr dtr by Damion (EX mam) at BB.

During her time at Riverdane Storm Ghost 2 was flushed to Spirit and James, the James cross resulted in the bull Riverdane Gallant VG-88 being marketed by Kingstreet Sires – a joint collaboration between Bill Nadin and Mark and Sue Nutsford. “ Having worked with and admired the show type of several generations of the family, it was easy to market Gallant off the back of this” says Mark. Gallant's daughters display the type typical of the cow family particularly great udders, he has 27 daughters classified of which 25 are GP or bet-

Mike Halliwell, Five Star Breeders, Wales

I worked with 3 successive generations of the Ghost family. They were all great cows to work with. Our Customers are farmers who appreciate milking good cows, when we were looking to invest in a young sire from a proven British cow family, the Ghosts were at the top of the list!

ter! Upon moving back to Ridgefield she was successfully flushed to Shottle, this flush resulted in all 4 female progeny scoring VG 2yr olds and an average selling price of over £7500 for each of them!

Eurogenes members

Many UK members of Eurogenes have Ghost family members within their herds, BB, Drointon, Richaven, Roevalley, Sterndale and Willsbro, such is the transmitting capability of this cow family.

At Sterndale the family continues to go from strength to strength and they are milking potentially the 7th consecutive generation of EX in the form of VG-88 2 year olds by Shottle and Goldwyn from Sterndale Allen Ghost EX-92. Sterndale Shottle Ghost VG-88 2yr has been shown with considerable success and was 2nd Jnr Heifer in milk at this year's National Holstein Show' when asked how the Ghost family has impacted his herd Bill is quick to point out that they are a great asset to Sterndale, "They have excellent udders and are just such consistent breeders" says Bill.

At Roevalley they have a show-winning Morty grand-daughter from the Skychief- Aldingham SM Ghost 3 EX-94 2E, whilst at Drointon they have the final daughter from the Storm Ghost, a really exciting RC Talent heifer that is due soon to Jotan. At Willsbro, Ridgefield Shottle Ghost VG-89 3yr is attracting a lot of attention and is internationally contracted, having completed a first lactation of 11,754kgs in 305 days 4.25%^f 3.18%^p, her first son by Goldwyn is in AI and being tested by Five-Star Breeders.

Breeders satisfaction

It is incredible to think that in the space of less than 15 years over 2000 Ghosts, have been registered in the UK herdbook. It's clear to see that this family is held in very high esteem amongst the British breeders, and rightly so.

From a personal note, and having worked with many of them, I have never seen a family that consistently delivers this level of type. Now with the introduction of genomics the family is seeing more interest from International AI's and in the future we can fully expect to see the Ghost influence continue to grow as bulls from this family enter AI.

Ridgefield Storm Ghost EX-93 2E
2X All Britain in milking form

Sold for 27,000gns (EUR 34,000) as a bred heifer

Sterndale CB Allen Ghost EX-92

Genomics

Ridgefield Shottle Ghost VG-89 3yr owned by Willsbro Holsteins is one of the current stars within the family, with a GTPI +1966 and GPTAT +3.07, she has been at her height amongst the Top 25 GTPI cows in Europe. Few would have expected such a successful genomic result, with sires like Storm X Milan X Skychief X Counselor X

Triple Crown in quick succession, but then one of the benefits of this new technology is highlighting new cow families and alternate bloodlines. Ask any breeder in the UK that has worked with the family, and they will quickly confirm the qualities of the Ghost family, Genomics has only told the geneticists what breeders have

known for years, as a result of her genomic test, now sire analysts are paying attention to the family. Ridgefield Shottle Ghost is dam to the #1 and #2 Duplex daughters in Europe, Willsbro Duplex Ghost and Ghost 2 both of whom have GTPI scores of over 1800 and over 3 points on GPTAT!

The Ghost family

♀ **Bruwin Judy VG-CAN 2***

Have your herd in “The Spotlight” every day

Eurogenes receives over 15000 Global visitors a month

Hotspots – a magazine published by Eurogenes to Global Holstein Breeders.

Recognised worldwide as the premier solution to market your herd

Mike Halliwell- Golden Promise syndicate

“Eurogenes have done more to promote UK genetics to European breeders than any other organisation in the last 10 years”

Paul Miller- Shanael Holsteins

“Within days of becoming a Eurogenes member, we sold embryos to Europe, the results speak for themselves”

Mathew Wills- Willsbro Holsteins

“Marketing Willsbro abroad is of unparalleled importance-Eurogenes allows us to showcase our genetics to a global audience”

Volker Reinermann- Zuchtbetrieb Reinermann

“Eurogenes is my favourite website to check the daily breeding news and find Europe’s most interesting donor cows”

Bolton

Choose your favorite Bolton daughter

Sandy-Valley Bolton has surprised many with his second crop proof, being rock solid in his initial proof figures: lots of milk, dairy frames and really good udders. He has sold a lot of semen ever since his first release by ABS Global in May 2006. Both breeders and more commercial operations have used Bolton heavily.

Bolton passed away in May 2010 but even before reaching his second crop status he did sell over 1.000.000 straws of semen. All in all 1.200.000 doses of semen of which 300.000 in his last year alone have been mar-

keted. Breeders that used Bolton had great success with him. He did well in the USA, Canada, where he reached the nr. 1 LPI position, Germany, the Netherlands, France and many other leading Holstein countries. Bolton does show weaknesses in the daughter fertility area. Also his protein% could be higher. However he is now seen as a bull that marks the breed and Bolton daughters are in high demand for bull breeding programs.

Cow A

Giessen Cinderella 20 VG-87-NL 2yr.
Owner: JK Eder Holsteins, NL

VG-87 Bolton x VG-89 Shottle x
VG-89 Durham x EX-92 Encore x

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the World.

Although many things changed over the 29 years, one thing is still a constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need.

If you are looking to purchase embryos to introduce new genetics into your AI Company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

Sourcing and locating Embryo Donors
Herd Visitation Selection Tours
Contracting of Donors
Complete Coordination of: Embryo Recovery
Health Certification & Documentation
Inland Assembly & International Shipment Insurance
Housing & Management Assistance for Cattle housed in the U.S.
