Baxtino is one of the most complete Baxter sons worldwide and with Baltollo has an attractive full brother. He comes from the well-known Go-Farm Tina VG-89 (s. Goldwyn), the full sister to the Italian top transmitter GoFarm Artes. Next, via Jeffrey-Way Tolare VG-88, he goes back to Jeffrey-Way Formation Tate EX-93. Behind Baxtino are in total 10 generations excellent or at least VG-88 classified cows. The average-sized Baxtino daughters make an impression with their uniformity, great udders and outstanding feet & legs. They are compact, modern and attractive free-stall cows, that leave little to be desired.

Dear Readers,

Our industry, the genetic industry, is always full of new challenges and opportunities. The genetic industry has an impact on so many dairy farms and consumers around the world and is progressing all the time; of course we are now in the middle of the polled conquest and when all the top bulls become homozygous polled bulls, each dairyman's life is relieved from an unpleasant job. Maybe in 30 years we will not be able to imagine (and maybe more importantly, explain) that we once had to dehorn our calves.

Many breeders haven't thought about using only A2 A2 bulls yet, one example of what maybe yet to come. If we imagine that by selecting and breeding, 15% more people can drink our milk, the breeding industry can keep reinventing itself and keep proving that dairy products have a real nutritional value to millions of people over the world. We would like to thank people like Peter Kingston and Michael Boyd that see those opportunities and have started to work with them.

This magazine includes articles about some of the best cow families developed in Europe and North America - also, advertisements from breeders stand as articles on their own; what are these passionate breeders around the world currently working with and how? We hope you enjoy reading it.

Best regards, The Hotspots-team

→ Dominating the bull charts

The Coyne-Farms Ramos Jelly family is one of the most exciting and hottest cow families in the industry. Seldom has a cow family been as persistent and dominant in both the female and male charts. This dominance peaked in the August 2013 run when Facebook sons Jabir and Jetset, together with their cousins Jacey and Nominee, ranked in the Top 20 of the GTPI charts.

Coyne Farms has been in the spotlights of the International marketplace the last few years, especially with cow families like Daffers (Dorcy), Yaddas (Massey) and Myra (Mack). The Coyne Farms operation has claimed a position among the favorite herds of sire analysts. This article highlights a new cow family at the 1,000-cow herd of Coyne's that has stepped out of the shadows.

The Coyne-Farms Ramos Jelly family has been present at Coyne Farms, Avon, N.Y. for many generations, much longer than the other successful cow families. The cow family started with the purchase of Sugarcreek-Vu King Jessie (s. Cotterdale Astronaut King) in the 1970s from Philip Saunders of Dansville, N.Y. Jessie was from a good cow family and developed into a Very Good cow herself.

Over the years and generations, the Coyne's have continued to develop this family. Via multiple generations of Very Good cows, the first

cow to receive A.I. interest was Coyne-Farms Bestow Jell. This Excellent Bestow daughter had a VG-87 Aero Wade dam and a VG-86 Skybuck granddam, a different pedigree than most bull dams in those days. Greg Coyne, Coyne Farms explains: "The reason that there are some different bulls in the pedigree is because we started selecting for productive life before it became popular by other breeders."

Though Skybuck was born nearly 30 years ago, and Bestow 21 years ago, they still score +2.2 and +1.7 for PL, respectively. From Bestow Jell, sons by Magical and Shottle went to A.I. and she also had daughters scored Very Good by Magical and Shottle. One of these Very Good daughters was Coyne-Farms Shottle Jam VG-88, the dam of Coyne-Farms Ramos Jelly. Like the other Shottle daughters, Jam did really well at Coyne Farms. Coyne mentions "I think Shottle is the best bull we have used on the farm since Elevation, his daughters do exceptionally well here in the barn and produce tons of milk." Besides Jelly, Jam has several other good daughters at Coyne Farms, including two Very Good daughters by Freddie.

Coyne-Farms Ramos Jelly

The cow that put this family on the map was Ramos daughter, Coyne-Farms Ramos Jelly Very Good-85. Jelly was born in January 2008 but her career took off in January a year later. During that index run the

Highest GTPI daughter of Jeven and granddaughter of Jelly

Coyne-Farms Freddi Jeven VG-85 DOM
Sons in A.I. and numerous high testing daughters

Coyne-Farms Ramos Jelly VG-85 DOM
Numerous grandsons and granddaughters at the top of the charts

first genomic lists were published and Ramos Jelly ranked in the top 10. Because of her sky-high genomic index and different pedigree Jelly was one of the most popular females in the breed, and she was already flush-age. Her first flush was to Freddie and responsible for that mating was Lloyd Simon. Simon is now retired but worked as a Sire Procurement Officer for Genex at the time. Simon comments, “I really like this cow family, the Bestow was a heck of a cow and she had a great Shottle daughter. Jelly was high on the charts and we decide to mate her to Freddie. Freddie was at that time the No. 1 GTPI young sire and was a few daughters short of receiving his daughter proven index. The combination of his high genomics, and promising first daughters gave us much confidence in the bull. Moreover, Freddie was also great on the health traits, good for production, had an outcross pedigree despite being an Oman son, and never qualified for Europe.”

This flush to Freddie led to several great daughters that have been extremely successful for their owners. A male from the flush, Coyne-Farms Fred Jaguar, went to Alta and has a GTPI of +2161 with his first daughters now reaching breeding age. For the second flush on Jelly, it was decided to use high GTPI outcross sire, Massey. Lloyd states, “The mating to Massey was special since the maternal line of Massey also goes back to Coyne-Farms.” After the flush, Jelly was bred to another Coyne Farms product, Dorcy, a bull from the popular Daffers family. This resulted in Coyne-Farms Dorcy Jean VG-86. Coyne mentions, “We have been extremely lucky with our sire selection, those bulls ranked high at that time, who could have expected that they now rank No. 1, No. 3 and No. 4 on GTPI for proven bulls.”

The Freddiees

As already mentioned, the Freddie flush was interesting but the results went beyond expectations. The flush resulted in six daughters who all scored Very Good and proved themselves as excellent milk producers. “We really like our Freddiees, they are low maintenance and produce a ton of milk,” states Coyne. Two of the Freddie daughters were sold, including Coyne-Farms Freddie Jell, sold to Oakfield Corners Dairy, N.Y. Jell has been in a flush program and has high testing daughters by Doorman.

Jonathan Lamb, Oakfield Dairy

“We bought Jell because we really like our Freddiees, and like Ramos as a maternal grandsire. The cow family has consistently bred true, making balanced cattle that work well in commercial settings.”

The other Freddie that sold was Coyne-Farms Freddie Jeven; she sold to Butlerview and later to Farnear.

Jeven did really well for both of her new owners. At Butlerview, she was mated to Shamrock and Robust. The Robust mating resulted in Butlerview R Jewlen-ET (owned by Elite Dairy Genomics); scored GTPI+2367 with a GTPI+2379 Jerod daughter at Alta. The most successful mating was to Shamrock. To illustrate, seven full sisters ranked in the Top 25 Net Merit in April 2012! Another three family members were also in this top 25, making 40% of the Top 25 Net Merit Coyne-Farms Ramos Jelly family members. EDG also owns the highest Shamrock daughter of Jeven, Butlerview SR Jewel, with a GTPI of +2411. Jewel has high daughters by Mogul (GTPI+2526) and Liquid Gold (GTPI+2465). Another Shamrock daughter of Jeven owned by EDG is Butlerview SR Jeven Jala, an individual that has four daughters scoring above +2300 GTPI including a McCutchen at +2401 GTPI.

A +2308 GTPI Shamrock daughter of Jeven, Butlerview SR Julie, sold for \$90,000 in the 2012 International Intrigue to Richmond Farms, N.Y. “Julie is now pregnant and due in March,” states Chuck Richmond, Richmond Farms. Julie has daughters by Tango, Massey and Oak. The four Tango daughters all score above GTPI+2330 and the highest Massey scores GTPI+2335. Richmond-FD Tango July GTPI+2397, sold in the Sale of Stars 2013 to ABS Global for \$26,000. “We are really happy on how the family performs for us. We bought Julie because we saw Jeven and we really liked her. The family also performs genomic wise really well,” Richmond said.

Jeven has numerous daughters at Farnear.

Bill Rauen, Farnear Holsteins

“Jeven is a cow that is 10 years ahead of her time. She is the type of cow that farmers want, low in maintenance, competitive and with extremely high components. The only time you see her is when she gets milked or flushed, to me that’s the type of cow every free-stall farmer wants.”

Jeven was on an extensive flush/IVF program after being purchased by Farnear as a heifer. “Jeven was interesting for multiple reasons, she was one of the highest Freddie daughters and she had no Goldwyn or Planet in her pedigree which meant we could use many of the high bulls on her,” Rauen commented. Jeven is now pregnant and Farnear will continue to work with the family through Jeven’s daughters by Numero Uno and Mogul.

Daughter-Dam Duo

Coyne-Farms Freddie Jill VG-85 and Coyne-Farms Ramos Jelly VG-85 DOM

Jill and Jelly are currently housed at Sunshine Genetics where they continue to be flushed.

From the Freddie's that remained at Coyne Farms, Coyne-Farms Freddie Jill has been the most successful. Coyne explains, "Jill was the highest [GTPI] and the other ones were unfortunately *CV, so that's why we focused on Jill." Coyne-Farms Freddie Jill is the dam of high Facebook sons, Coyne-Farms Jabir and Coyne-Farms Jetset; both have been used extensively as sire of sons. Jill along with Jelly is housed at Sunshine Genetics, Wis. where they continue to be flushed.

Coyne states, "We have been really successful with Jill, most of her earliest daughters we sold." Freddie Jill's highest daughter sold at the New York International Spring Sale to Jeff Butler, Butlerview Farms, Ill. for \$70,000. Declan Patten, Marketing and Communications Manager for Butlerview states, "We had a huge amount of interest in this heifer. We really liked her cow family and she had a very strong maternal line that could make fantastic cows for any operation." T-Spruce Holsteins, Minn. owns a full sister to Jabir and Jetset, with high testing daughters by Cashcoin. Yannick Louis from GAEC Bon-Temps, France bought Coyne-Farms Ravish Jody; she already has five daughters tested over GTPI+2300 of which a Cashcoin daughter sold at the Sale of Stars 2013 to Morsan Farms, Alberta. Coyne states, "For the future, I think the line of Jill will become the most dominant as we have many pregnancies from her."

The Massey

As mentioned, after her first flush to Freddie, Jelly was flushed to Massey, one of the highest genomic bulls at that time. This flush resulted in a bull, Coyne-Farms Mass Jake, who carries a GTPI+2171 and is awaiting his proof at Genex. The heifer born from this flush was Coyne-Farms Mass Jill. Jill was flushed just once as a heifer at Coyne Farms resulting in only bulls of which Jacey is the most well-known. After this flush she was sold through the Legends of the Fall Sale to De-Su Holsteins, Iowa. At De-Su, she was flushed numerous times resulting in many offspring. Mass Jill has proven herself as a great brood cow with no less than 10 daughters above +2300 GTPI sired by Nu-

mero Uno, Shamrock, Super Layne, Observer, Platinum and Sudan and 16 granddaughters also over +2300 GTPI. Her highest daughter is De-Su 1851 with a GTPI of +2470; 1851 already has six daughters scoring over +2300G including the highest female from the Jelly cow family, De-Su Platinum 3347-ET GTPI+2570. 1851's full sister De-Su 1846 (+2381G) also has high daughters by Platinum (+2415G, +2364G and +2338G). A Shamrock daughter of Massey Jill, De-Su 1481-ET, has a GTPI+2521 Jabir at De-Su.

Besides high female offspring, Mass Jill has also produced several high sons for De-Su including AltaJackman, AltaJohnson and Nominee, with more sons to come. Mass Jill unfortunately slipped her calf prematurely and doesn't have a recorded lactation or classification score.

Dominating the bull charts

There was not a cow family that dominated the charts more last year than the Jellys. Jon Schefers, Regional Sire Analyst for Alta Genetics comments, "The true breeding potential of Jelly will likely be realized through her numerous grandsons, many of which were or are currently used as mating sires. Through her daughter Massey Jill, Jacey (s. Iota), AltaJackman (s. Snowman), AltaJohnson (s. Snowman) and Nominee (s. Numero Uno) have been extremely popular and through Freddie Jill the Facebook sons Jabir and Jetset got substantial use as sire of sons. Each of these sires offers the total package; production, health and conformation."

Schefers is looking forward for the sons and grandsons, "I'm excited to see how well she can transmit through these sons."

Coyne mentions that the August 2013 index run, when the Jelly grandsons dominated the charts, is his most valuable memory so far. "As a breeder one bull in the top 20 is great, but four is an absolute dream." And there are more bulls to come; a high testing Gillespy son from Freddie Jill went to ABS Global on a lease deal. Coyne mentions, "The Gillespy is one of the first bulls we tested ourselves and we are excited about his future."

Other daughters

The story of great Jelly daughters doesn't end with the Freddie's, Massey and Dorcy daughters. Jelly's highest GTPI daughter is Coyne-Farms Srock Jill. Sired by Shamrock, she sold for \$116,000 at the Party at the Park Sale 2012 to MD-MRK, Md. Unfortunately, Srock Jill died in an accident shortly after the sale and wasn't able to produce any offspring. The highest GTPI (young) daughter of Jelly at Coyne Farms is Coyne-Farms Latimer Joan with a GTPI of +2345.

The Jellys are one of the few cow families that once genomics were introduced all the pieces of the puzzle fell together. People were looking for outcross pedigrees, new cow families, fitness, productive life, and the Jellys offered all of that and more. The fact that Jelly was flushed to the highest genomic bulls that now rank among the highest proven bulls increased the effect this cow family had on the breed almost exponentially. Today, the Jellys rank among the most popular cow families in the world and breeders and sire analysts are eager to find the next high one.

taurus-service inc. GENOMIC SUPER STARS

The goal of genomics is to identify cattle whose genetic inheritance is superior to their parent average while they are still calves. At Taurus, we are working with breeders and their time-tested cow families to source the industry's best young bulls. These are the bulls we hoped genomics would help the industry discover.

Currently our Top-10 young bulls
average +1848M +733NMS +3.64PTAT
& +2379GTPI. These impressive numbers
include the two bulls on this page that are
from the world-famous Barbie family.

HOLSTEIN PLAZA

THE ONLINE MARKETPLACE CONNECTING FARMERS WITH ELITE HOLSTEIN GENETICS

RUS & RUTH ROBIN, Kayton Holsteins, Australia
Purchased Savape Leigh Licovice Family Embryos

“Our experience with using the Holstein Plaza website has been a great one. I decided to do a search on the internet for embryos, one of the first places I looked was the Holstein Plaza website and to my surprise the embryos were very reasonably priced helped by the strength of the Aussie dollar. I looked into the associated costs, which were well laid out for me on the website, and applied for a user name and password. Within a short time I was bidding and the experience itself is a lot of fun. Once the embryos were won, the speed in which AMS Genetics processed the paperwork was fantastic. I found myself contacting Steve Mower to ask if the embryos could wait a shipment or two...so I could buy some more. Steve was very fast to respond, and I wasn't left wondering if emails were lost in cyber space. In fact the more I conversed with Steve, the more comfortable I was with the whole process, which not more than two months earlier seemed something we would have never actually have done. I found the best thing about the Holstein Plaza online auctions has been the chance to get into great cow families at reasonable prices. Those absolute elite families are available to purchase, but the spread of choice is the best part. We will definitely use Holstein Plaza and AMS Genetics in the future.”

LEONARDO MOREIRA C. DE SOUZA, Minas Gerais, Brazil
Purchased Gloryland Lana Rae Family Embryos

“I have imported some embryos purchased from Holstein Plaza with a lot of satisfaction. The whole procedure including shipping process is simple, fast, secure and efficient and the quality of embryos has guaranteed healthy pregnancies on my farm, what motivates us to continue using Holstein Plaza as one of our most important imported genetic supplier. Steve and Anna, thank you for your tremendous work.”

JACOB BEARDA, Flevo Genetics, Netherlands
Purchased KTHN Golden Aikeo Family Embryos

“As a recognized breeder, I was looking to increase the genetic status of my herd by buying some high profile embryos. I am very pleased with the first transaction I made with Holstein Plaza and AMS Genetics. They were helpful, quick to respond, and had my embryos to the Netherlands in a timely manner as I wanted to get them implanted. All of the embryos I purchased have resulted in pregnancies.”

WRITE YOUR OWN SUCCESS STORY

FROM BREEDERS THROUGHOUT NORTH AMERICA

JUAN FELISSIA, La Magdalena, Argentina
Purchased Morningview Shottle Lucy Embryos

“I received the embryos without any problems and AMS Genetics was very good to work with coordinating the shipment. I was able to purchase some unique offerings from *Morningview Shtl Lucy-ET* and *Twin-Spruce Gold Bailey-ET*. I was looking for some strong genetics to fit into my herd and I found them on the Holstein Plaza Online Embryo Auction.”

PAT MCEVOY, Pavime Holsteins, Ireland
Purchased Red-Vision Dony-Red Embryos

“I am very pleased with the Holstein Plaza website and how easy it is to use. I like all of the information that is offered on the site about the lots of embryos. There is always a good range of embryos from genomic to type...to black and white...to red and white. AMS Genetics' personnel were very helpful and they have a great, regular, low cost export of embryos to the correct destination. The embryos I received were all of good quality and all of the embryos implanted so far have held with 100% conception.”

PHIL & CLAIRE GILMAN, Lilleshall Holsteins, UK
Purchased Harvue Roy Frosty Family Embryos

“We have used the Holstein Plaza Online Embryo Auction several times now and have found it a very simple system to use. There is always a good cross section of bloodlines to choose from and we appreciate gaining access to some matings by sires not yet available here in the UK! Despite the export distance, our embryos have always been delivered within the time frame quoted too – a great service!”

BILL PECK, Welcome Stock Farm, United States
Purchased Eastside Leiside Gold Misty Family Embryos

“The Holstein Plaza Embryo Auction has been an outstanding source for purchasing embryos. I have been able to buy top quality genetics at a reasonable price. The timeliness of delivery and overall service provided by the staff at Holstein Plaza has been above and beyond my expectations. I would recommend anyone interested in seeking the highest end of the Holstein Breed to investigate Holstein Plaza Auctions.”

EUGENE REA, Childers Cove Holsteins, Australia
Purchased Scientific Blessing Rae Embryos

“While looking into purchasing high quality embryos from North America, I came across the Holstein Plaza website and found everything I needed! Access to the best females in the best herds in North America and the latest information on cow families, the genomics and top sires. The auctions offer something for everyone with very realistic prices. We have purchased several and have been updated on the shipping process until the embryos reach our vet.”

WITH NORTH AMERICA'S ELITE THROUGH HOLSTEIN PLAZA ONLINE EMBRYO AUCTIONS
online auctions held the first and third week of each month at holsteinplaza.com

SHOW Spots

Story: What a year it was for junior owned Cleland Advent Korie. She started the season being named Grand Champion and winning Aged Cow of the Minnesota State Fair Red & White Show. Korie went on to be named Senior and Grand Champion at the Grand International Red & White Junior Show and also won Reserve Supreme Champion of the World

CLELAND ADVENT KORIE-RED | EXCELLENT-94 EEEEE

Breeder: Cleland Holsteins, Wisconsin, USA

Owner: Stranshome and Ryan Lauber, Minnesota, USA

Show Results:

- All-American and Junior All-American Red & White Aged Cow 2013
- Reserve Supreme Champion Junior Show, World Dairy Expo 2013
- Grand Champion, Grand International Junior Red & White Show 2013
- 1st Aged Cow, Grand International Red & White Holstein Show 2013
- Grand Champion, Minnesota State Fair Red & White Show 2013
- Nominated All-American Red & White Five-Year-Old 2012
- 4th Five-Year-Old, Grand International Red & White Holstein Show 2012

Dairy Expo Junior Show! Shortly after World Dairy Expo, she increased her score to Excellent-94 and is due back for the 2014 show season.

Breeder Comments: Reid Stransky: "Korie was tied in our string during World Dairy Expo 2012 and exceeded all expectations placing fourth in a strong class of five-year-olds. An extremely youthful udder and balanced frame we decided to buy Korie with partner, Ryan Lauber. Ryan has

worked with our string for several years and was looking for a nice show cow for his final year as a junior member. To say that Korie once again exceeded all expectations is an understatement. Winning the aged cow class at World Dairy Expo for a group of hard-working junior boys is something they will never forget and standing in the lineup for senior champion with three Apples was an absolutely amazing feat. Korie is bred back and we are looking forward to the 2014 season."

Story: Over the past couple of years, Cookview Goldwyn Monique has become one of the most consistent and successful black and white show cows on the tanbark. Monique was named Reserve Grand Champion at World Dairy Expo the last two years and was also Reserve Grand of the Royal Winter Fair 2013 and Honorable Mention Grand in 2012.

COOKVIEW GOLDWYN MONIQUE | EXCELLENT-95 EEEEE

Breeder: Cookview, Ontario, CAN

Owner: Jeff Butler, Joe and Amber Price, Illinois, USA

Show Results:

- Reserve Senior and Reserve Grand Champion, Royal Winter Fair 2013
- Reserve Senior and Res Grand Champion, International Holstein Show 2013
- All-American Four-Year-Old 2013
- All-Canadian and Unanimous All-American Senior 3-Year-Old 2012
- Intermediate Champion and HM Grand Champion, Royal Winter Fair 2012
- Intermediate and Reserve Grand Champion, World Dairy Expo 2012
- Grand Champion, Quebec Spring Show 2012

Monique concluded her 2013 season with an All-American title and was also recently classified Excellent-95. Monique was bought by Jeff Butler and Joe and Amber Price

at the 2012 International Intrigue Sale, where she was the high seller for \$490,000.

Breeder Comments: Declan Patten: "Walking into the barn every morning certainly is a pleasure when the first box stall is occupied by Cookview Goldwyn Monique EX-95. Ever since

she arrived at the farm she has continued to impress us with her overall style and continued development. A cow that every dairymen can appreciate, not just through her show success, but Monique is an easy everyday cow to manage. We are excited to see the next generation, her natural Atwood daughter topped our PTAT list at +4.36 back in August and since she has some more daughters that are extremely impressive. The best part we believe, is that Monique is just getting started!"

Story: Rosedale Lexington won the five-year-old class at this year's International Holstein Show and was part of the impressive Goldwyn domination at World Dairy Expo. However, this wasn't the first time Lexington did well at Madison. As a junior two-year-old she also placed first and came back

ROSEDALE LEXINGTON | EXCELLENT-94 EEEEE

Breeder: Rosedale Genetics Ltd., Wisconsin, USA

Owner: Rosedale Genetics Ltd., Wisconsin, USA

Show Results:

- All-American Five-Year-Old 2013
- Reserve All-American Junior 3-Year-Old 2011
- HM Intermediate Champion, International Holstein Show 2011
- Reserve All-American Junior 2-Year-Old 2010
- 1st Junior 2-Year-Old, International Holstein Show 2010

as a junior three-year-old placing second. Lexington is a two-time Reserve All-American. Backed by a very strong pedigree, Lexington's dam is a VG-89 Cousteau daughter of Rosedale Lea-Ann EX-93 2E GMD who is also the granddam of Laverder Ruby Redrose EX-96 4E. Lea-Ann is the K. Leader daughter of another show ring matriarch, Stookey ElmPark Blackrose EX-96 3E GMD DOM.

Breeder Comments: Mark Rueth: "We have had a number of big winners at expo resulting in three

supreme champions and two reserve. With that being said, Lexington may be the most correct cow at Rosedale. She continues to develop and grow from a pedigree tracing back to Blackrose and Speckles and completes five generations of national show winnings cows. There are five Goldwyn sisters all maxed out at EX-92 (second lactation). Lexington has a son by Bradnick going to ABS St Jacobs, and daughters by Redburst, Sid, Bradnick and Private. She is transmitting solid type and looks to carry on a tradition at great cows at Rosedale."

CHOOSE YOUR FAVORITE *European or North American* SHOW COW

online voting at holsteinplaza.com or eurogenes.com

Story: Galys-Vray is another great cow with a super future from the herd of Vray Holsteins, France. They are also well known as the breeder of last year's summer contest winner Ashlyn Vray EX-96-ES. Now, it's the beautiful Atwood daughter, Galys-Vray, participating in this contest. She is one of the most promising young cows in the world today. Sired by

Excellent cows in her pedigree. This is also the same cow family as the influential Holstein bull Besne Buck. Galys-Vray highlights so far were Intermediate Champion at the Swiss Expo 2014, which she won for her new owners Al-Be-Ro Holsteins, Junker and Stauf.

GALYS-VRAY | VG-88-FR 2yr.

Breeder: Elevage Vray Holsteins, France
Owner: Al-Be-Ro Holsteins, Italy
Stauf and Junker, Switzerland

Show Results:

- Reserve Champion 2-Yr. Old National Show France, SPACE 2013
- Intermediate Champion Swiss Expo 2014

Atwood, from a Damion and out of a deep French cow family with three

Breeder Comments: Jean-Paul Bichon (Vray Holsteins): "I like Galys for so many reasons, she comes from our best type family in the herd and she is the perfect young cow in my eyes. She has so much dairy strength, a tremendous udder and she moves very well. I think she is the kind of cow that will continue to get better with age and could develop into the next EX-96 point cow, like Ashlyn Vray is."

Story: GS Alliance Jodie Red is a daughter of the Talent son Alando, followed by four generations of high Excellent cows. Her dam won a first and second place at the Swiss Expo and is an EX-94 Sep-

one of the very best Red & White cows in Europe.

Breeder Comments: Edwin Steiner (Herd Manager GS Alliance): "We are really happy with the Jodie's

GS ALLIANCE ALANDO JODIE RED

Breeder: GS Alliance, Switzerland
Owner: GS Alliance, Switzerland

Show Results:

- Intermediate Champion & Best Udder Swiss Expo 2014

tember Storm from the All-American Fradon Encounter Jodie EX-94-CAN. Jodie Red was the Intermediate Red & White Champion and Best Udder of the Swiss Expo in Lausanne 2014! She has a great future to turn out as

in our herd. Alando Jodie calved three weeks too early in her first lactation and we were never able to show her as a two-year-old. Now in her second lactation she came back tremendous, producing around 40 kg/day and was the eye catcher in the Intermediate Class at the Swiss Expo. She will be shown at the Expo Bulle and after that she will be flushed. In the heifer barn we have an awesome red Armani sister from her as well."

Story: Praline 2 is well-known as one of the very best show type daughters of Dudoc Mr. Burns. She is also backed by a great pedigree, being a granddaughter of Windy-Knoll-View Promis EX-95-USA (Mr Burns x Durham x Promis EX-95). Praline 2's

in front of her and gives the legacy through to her promising daughters. Praline 2's first milking daughter at Giessen Holsteins is by Snowman, and has a full brother in A.I.

GIESSEN PRALINE 2 | EXCELLENT-90-NL EX-93-MS

Breeder: Giessen Holsteins, Netherlands
Owner: Giessen Holsteins, Netherlands

Show Results:

- Res. Intermediate Champion National HHH Show 2012
- 2nd Mature cows National HHH Show 2013
- Res. Champion Mature Cows Christmas Show Wanneperveen 2013
- HM. Intermediate Champion Summer Show Beilen 2012

show highlight was the Reserve Championship at the National HHH-Show, she is the type of cow which is getting better with age and has an amazing udder! She certainly has a great future

Breeder Comments: Theo van Vliet "As a young heifer, Praline 2 never really caught the eye as a potential show cow. After calving, she immediately took the attention as a huge production cow. Now, Praline 2 is the highest production cow in the herd for combined fat and protein. Even after an accident in her first lactation she kept producing heavily. We started showing her in her second lactation and she is getting better and better every time."

➔ Upgrade your milk price:

What type of milk do your cows produce: A1 or A2? Most farmers won't have a clue, but it's worthwhile checking into. In countries like New Zealand, Australia and the UK farmers get paid a premium for producing A2 milk, and even make a special breeding plan to make A2A2 cows.

All milk is white, but not all milk is the same. Consumers in Australia, New Zealand and the UK can choose to buy A2 milk instead of regular milk. A growing amount of people are purchasing A2 milk, notices Sam Holl from the British Kendrall Agency, working for A2-milk.

Sam Holl, Kendrall Agency

“It started in Australia where about 6 percent of sold milk is A2. Now it comes to the UK where we have started recently selling A2 milk and notice that the interest is growing. I think the rest of Europe will follow later.”

Holl notices that A2 brings a new group of milk-drinking consumers. “There are people who don't enjoy drinking milk because it upsets their stomach. They are intolerant for the A1 casein in milk and with A2 milk they don't have these negative side effects and complaints.” An estimated 15 percent of the world population has problems drinking regular milk, making the market for A2 milk huge, even bigger than organic milk.

DNA test

What is exactly A2 milk? Milk contains different types of protein, one group being caseins. The main type of the beta casein fraction is A1

and A2. Most cows have milk with A1 beta casein. “Certain breeds like Guernsey and Jersey have a lot of animals producing A2 milk,” Holl shares. But also Holstein bloodlines have A2 lines. “You can test your cows with a DNA test.” In New Zealand, the A2 Corporation has the license for this DNA test, which is available in different countries all over the world.

In several countries, the A-beta-casein code is mentioned in the bull catalogs. Almost every A.I. center knows what the codes of their bulls are. The inheritance of beta casein is singular with equal value for A1 and A2 and neither being dominant. It means in a mating that half will come from the bull, half from the cow. If the bull is A2A2 and the cow has type A1A1, all offspring have type A2A1. Using an A2A2 bull again will result in 50 percent homozygous A2 offspring, and 50 percent with A2A1. Using this method, the whole herd will be an A2A2 herd within a few generations and can produce A2 milk.

No genetic shortage

Peter Gatley, LIC

“The demand of A2A2 bulls is still very small. It's less than 5 percent, and 56 percent of our current top bulls are A2A2, so there is no shortage of genetic material.”

With screening 2000 bulls on genomics yearly he knows that within the three main breeds in New Zealand: Holstein, Jersey and KiwiCross, the allele frequency A2A2 is quite high. “We haven't actively selected for A2, we have a natural variation,” Peter Gatley, General Manager of Genetics, LIC of New Zealand says. Howies Checkpoint,

What is A2 milk?

A2 milk contains the A2 type of β -casein protein rather than the more prevalent A1 protein. A1 and A2 β -casein are genetic variants of the beta-casein milk protein with different chemical structures. The A1 β -casein type is the most common type found in cow's milk in Europe (excluding France), the USA, Australia and New Zealand.

A genetic test, developed by the A2 Corporation, determines whether a cow produces the A2 or A1 type protein in its milk. The test uses hair from the cow's tail to determine this. The test allows the A2 Corporation to give licenses to milk producers once these producers prove their cows produce A2 β -casein protein in their milk.

(Source: Wikipedia)

breed cows with A2 milk

a KiwiCrossbred bull, is an example of this strategy. “He received his progeny test in 2011, and has been the biggest selling bull in New Zealand over the last three years and is A2A2.” While LIC is distributing Checkpoint in the fresh semen circuit, the bull produces 300,000 straws annually. “Also in the Holstein population there are plenty of homozygous A2 bulls to choose from as sires of sons.”

If the industry decides to select for A2 we could easily fit the demand, Gatley says. “Thanks to our fresh semen technology we can mate every cow in New Zealand with an A2A2 sire.” Really excited is the LIC manager about the technique of fresh and sexed semen. “Also some A2 bulls are in that group. By combining Sexing Technologies process with our fresh dilute we have sexed semen at near normal conception rates (within 5 percent). For a seasonal system such as ours, conception rate is extremely important which is why the standard frozen sexed semen has not been popular in New Zealand. With these techniques and allele sequences of A2A2 in the population, we can switch very quickly and vast to produce more A2 milk.”

Premium

How popular is producing A2 milk among farmers? In the UK there are about 20 farms producing A2 milk, and this is the first year their milk will be manufactured as so. It gives them a premium of several pennies per liter milk, necessary to pay the extra costs involved in

checking their herd on the type of beta casein.

The Australian Coomboona Holsteins, with 300 milking cows and 1500 head, already has a small herd with A2A2 animals, manager Michael Boyd says. “We have tested animals and put A2A2 together into a small herd to produce A2 milk.” Most Holstein bulls have the type A1 in their genes, but Boyd selects specific A2A2 bulls for his A2 herd.

Michael Boyd, Coomboona

“In the catalogs of all major A.I. studs, bulls are displayed with a symbol. It's easy to choose.”

It is not a huge market Boyd knows.

“But if it takes off, we are in position.”

Peter Kingston, Dairy Farmer: 80 percent of my cows produce A2 milk

This will be the first year dairy farmer Peter Kingston sells his milk as A2 milk. “I'll get a bonus of five cents per kilo milk,” Kingston says. Three years after starting to breed his Holstein herd to produce A2 milk his efforts are paid back. “The main reason for me to start breeding for A2 milk is that everybody can drink this milk. While only 15 percent of all people have an intolerance for A1 milk, there are more and more rumors about health problems caused by drinking the regular A1 milk.” Although scientifically unproven, Kingston takes all the stories on autism, diabetes and others serious. “Don't get carried away, but you could scare everybody away from milk.” In Australia about 7 percent of all milk is A2 milk, Kingston knows. “Four years ago it was less than 1 percent, the goal is 10 percent, it's big business. With A2 milk they have succeeded to bring people back to drink milk.”

Twenty-five percent of all Holstein cows have A2A2 milk, estimates Kingston. “I thought I had to go to another breed like Jersey or Guernsey to produce A2 milk, but there are several really good bloodlines in Holstein breeding to transmit A2 milk.” For example Planet and Windbrook. “They have A2A2. Shottle and Goldwyn have A2A1, so half of their offspring will have A2 milk.” The breeder tested every animal in his herd. “Sixty percent of the milking cows and 80 percent of all the newborn heifer calves are A2A2,” he knows. Forty percent of his milking herd has A2A1 in their DNA and he mates all these animals to an A2A2 bull. “Half of them will be A2A2. If I keep testing animals and mate A2A1 to a bull with A2A2, the whole herd will give A2 milk in a few generations. That is my goal.” Therefore he doesn't use A1A1 bulls. “Like Fever, he is a A1A1 bull. You lose the homozygous A2 status in one generation. When you put an A1A1 bull on an A2A2 cow all progeny will be A1A2.” Kingston explains that A1 and A2 are equal in dominance. “It's a matter of calculating the probability.”

Gillette Windbrook
A2A2 bull available at Semex

E'LL OPEN UP THE WORLD TO YOUR GENETICS

EURO GENES opens up the world to your genetics. The website is one of the fastest growing resources for latest breaking news on industry events. Stop in daily to find out show and sale results, breeding trends and who's topping the charts now. Plus, use our online breeder directory to tap into Europe's finest breeding herds and their genetics. Use our donor search feature and read details about current mating sires. It's just one click away!

EURO GENES monthly online embryos sales and annual live cattle sales offer you the chance to be the first to buy from some of the world's best cow families. Members enjoy the opportunity to consign and the world has the opportunity to buy and the results so far have been great!

EURO GENES magazine Hotspots is a great new source for detailed reports on cow families and news about the breed that you can enjoy anywhere in a beautiful four color print magazine that makes for easy reading!

The Neblina's

The family which does it everywhere!

Neblina is a new, highly used upcoming name in the Global Holstein breed, a new name, but with a very rich background from American roots. The American brood cow Tui Onyx Nick is the foundation cow of this family, which has now developed a branch in Europe transmitting desirable traits time and time again. The Neblina's are a branch which stamps great functional cows; high production along with high fat and protein components, and strong genomic scores in many different test systems. Some examples of family members topping the current charts are the #1 NTM bull (which is the #1 GLPI & #3 GTPI Goldwyn son worldwide), the #2 GTPI heifer in Europe, the #1 gRZG bull in Germany amongst others! Here we look at how this family has gained such a strong position in the Holstein population.

The foundation

No family comes to the fore without having a strong developed background, and the foundations of the Neblina family were built in the USA. Boot Mark daughter Tui Vanessa Boot Mark VG-USA born in 1983 was the first VG cow in this pedigree and passed on the right genes to her Bell-daughter, Tui Odyessa Bell VG-86-USA, who earned the Gold Medal Dam and Dam Of Merit brood awards, but it was Tui Onyx Nick VG-86-USA 2yr. a few generations later that really gained global brood cow attention. Onyx Nick born as a twin turned out to be one of the highest daughters of United Nick of her generation and sold to the Etazon program later.

The Alta Orie branch

Before Tui Onyx Nick VG-86-USA 2yr. sold to the American breeding program of Holland Genetics (now CRV), Etazon, she did a great job for Mar-River Holsteins. Of all her daughters bred from high indexing bulls, the combination with Bellwood produced some of the highest ranking CTPI cows of that time, Mar-River Bellwood Olivia, Oriole and Orange. Oriole was at Regancrest Holsteins where she bred some Excellent dtrs, Olivia was the mother of the proven sire Vision-Gen Ozzie (by Lord Lily) and there has been a very strong influence from Mar-River Bellwood Orange VG-87-USA, from Applouis Holsteins, Wisconsin. She delivered several daughters with global success, including the former #1 CTPI cow in the USA Vision-Gen Omega and in Europe, Omega's full sister Alta Orie was born in France and was well known as one of the best daughters ever of Fatal. Alta Orie scored EX-92, later sold to Germany and even performed well in the showing. Her Convincer daughter Petunia EX-90-NL was owned by Diamond & Twin Genetics from the Netherlands and became one of the most successful bull dams of her generation. Petunia finally delivered over 100.000 kg milk, became an EX-90 cow and left the farm at 14 years of age!

The exclusive BW Marshall's

The new upcoming branches of these families have their roots through Tui Onyx Nick's other daughter, Etazon LL Neon VG-85-USA. Neon

was amongst the highest index cows in the USA, sired by the Dutch Holstein millionaire Etazon Lord Lily. The European AI Stations were searching for genes from Mara-Thon BW Marshall as this bull topped the American bull rankings and it was known his semen would never be available in Europe. It was the German AI station RUW who imported the BW Marshall embryos from Neon and this great mating resulted in 3 heifer calves from which one died, one called Nimry and the other Neblina. The first mentioned, Nimry VG-86-USA 2yr. went from Germany to the Italian All-Margherita herd of the Gandolfi family. Nimry was been flushed extensively and has a huge number of descendants in the Gandolfi's herd right now. Over 20 sons went to AI Stations; the Shottle son Scaloni at the German AI station RBB is one of the most successful sons. He is still amongst the highest daughter proven Shottle sons for RZG in Germany. Nimry later on went to the Netherlands at the Vanholland herd where Ramos daughter Rozalin VG-87 2yr. has been an extremely popular bull dam and her Oman daughter Nik Gaps VG-85-NL 2yr. made an impact on the Overvelde herd in the Netherlands.

The Veenhuizer start of the Neblina's

The other sister, Neblina, is one which will write her own history. Neblina sold from Germany to Holland where she finally went to the Veenhuizer Holsteins herd of Jannes Uineken. As an early and exclusive daughter of BW Marshall a, it was no wonder that Neblina was one of the most popular donors of her time. Several embryos from her first flushes were sold and multiple bulls have moved to AI stations around the globe; her Mascol son Manur at RSA has been in the Top 10 for daughter proven RZG bulls in Germany for a while. Neblina also still has a great influence in the Veenhuizer herd, particularly through her Man-O-Man daughter Veenhuizer Nelleke VG-87-NL

Grafit is the #1 dtr proven bull in Scandinavia and the #1 GLPI & #3 GTPI Goldwyn son World Wide!

2yr. Nelleke has delivered many sons to studs after high genomic tests and made some high ranking offspring for GTPI & RZG with the out-cross Marion son Emerald, some of which have been sold for prices over € 10.000. From the multiple embryos sold out of BW Marshall Neblina, some Oman embryos went through Diamond Genetics to the Danish breeder combination between Tirsavad and Anderstrup Holsteins. This resulted in one of the most important brood cows from this family, Tir-An Oman Neblina VG-87-DK 2yr.

#1 Goldwyn son World Wide!

Oman Neblina's flush to Goldwyn only resulted in bulls. But these resulting sons proved this mating was a hit with VH Tirsavad Golwyn Grafit being the current #1 NTM daughter proven bull in Scandinavia with NTM +33 based on 243 daughters in his index. The NTM index is an index where health traits are an important factor in the total index. Grafit also ranks as one of the best Goldwyn sons in the world with an RZG index of 148 in Germany, a MACE GLPI index in Canada of 3000 (which makes him the #1 GLPI Goldwyn son) and an American GTPI index of GTPI 2105 (#3 GTPI Goldwyn son). His full brother Gren is the #12 GTPI Goldwyn son worldwide.

The Stol Joc cross

The cross on Oman Neblina with the outcross Jocko Besne son from France, Stol Joc, has put a huge stamp on the current leading family members. In previous runs, three full sisters out of this combination were in the Top 25 for gRZG in the German ranking. Some to highlight here include Nele VG-85-DE, the former #1 RZG cow in Germany and still the #1 GTPI Stol Joc daughter worldwide with high

Niels Erik Haahr: "The family never disappoints in any way; beside the great production power, this family's great quality is the transmission of high genomic numbers in different test systems."

sons in German studs. Nena 7 VG-86-DE (La1 305d 10.678kgM 4.4%F 3.8%P) is the mother of the former #1 RZG bull in Germany. Beauty, at OHG, is still the #1 RZG Beacon son with RZG 153 (12/13). And of course there is Tirsavad Stol Joc Nemo VG-87-DK 2yr. She is the #5 GTPI Stol Joc daughter in the breed (12/13) and made an impressive list of high ranking descendents including Tirsavad Supersire Ninna (Top 10 GLPI Supersire in Europe, DGV LPI +3466), and the four Klassic Big Time daughters Tirsavad BT Nemesis VG-87-DE 2yr, Noma VG-89-DK 2yr, Nokida and Nola NC. These four animals were in the top of the European GTPI ranking as young calves. Niels Erik Haahr from Anderstrup Holsteins who lost his connection with the family after Oman Neblina, had always recognised the strength in the family and stepped in again. Niels Erik Haahr says: "I knew the great quality of this cow family and over time, more selections were made based on Genomics and I saw this family had something special in their genes with so many positive sons and high ranking daughters. After the Big Time daughters came up so strong in the global GTPI rankings I decided to go into this family again which was a great deci-

sion! The Big Time daughters are milking at Anderstrup Holsteins, and despite Big Time not having a high milk index, these four heifers are all milking really well. Nola, who isn't scored yet, producing between 40 and 45 kg milk a day, just like her full sister Noma which scored VG-89 as a 2yr. old. The family never disappoints in any way; beside the great production power, this family's great quality is the transmission of high genomic numbers in different test systems, for example nine bulls from Noma were tested, seven of which were accepted by AI Stations after high Genomic numbers!"

The next Generation

The next generation is impressive, and shows this family going from strength to strength. Current highlight of the family is Tir-An Uno Nyala, the #2 GTPI heifer in Europe with GTPI +2527. She is also one of the highest daughters of Numero Uno for RZG with RZG 157, and she was the #1 NTM heifer in Denmark. Nyala was the topseller of the Eurogenes Summer Sale 2013 where she was purchased by Diamond Genetics and Rijnhof Holsteins for € 84.000. Nyala's full sister at Tir-An has RZG 156 and her maternal brother Lexington at ZBH, sired by Lexor, is the current #1 gRZG bull in Germany right now with RZG 162! Nemesis has a GTPI +2388 Numero Uno daughter, Tir-An Uno Nelina, who sold for € 19.000 to Hul-Stein in the Netherlands, and so the influence of this family continues to spread, with interesting sire stacks and consistent scores proving to be of interest to all systems. A truly modern, global phenomenon – N for Now!

#1 GOLDWYN SON

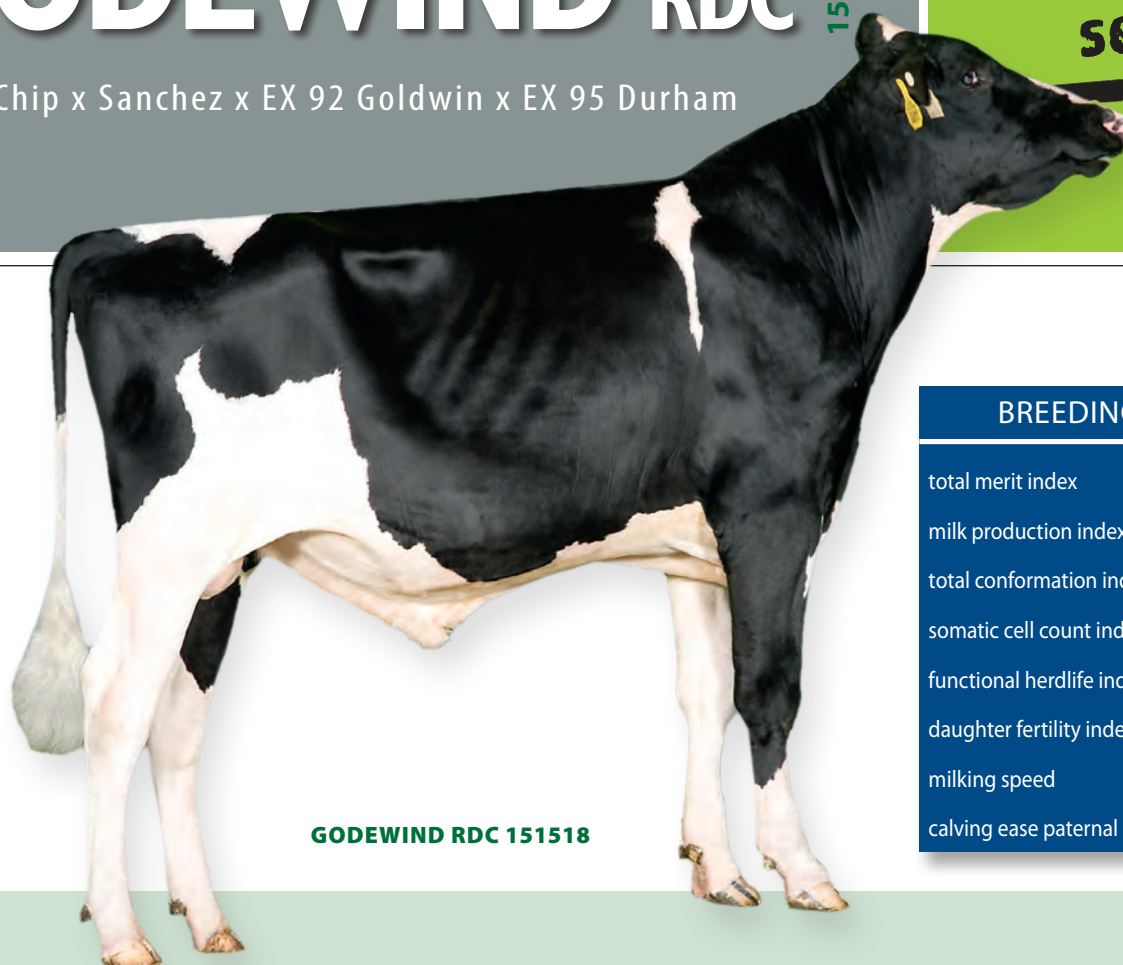

VH Tirsavad Grafit is the Goldwyn son of Tirsavad Oman Neblina. He is the #1 dtr proven NTM bull in Scandinavia and the #1 GLPI & #3 Goldwyn son World Wide based on more than 200 milking daughters.

AMS Genetics has 30 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 30 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States

Flevo Genetics Snowman

Choose your favorite

SNOWMAN daughter

The Oman son of Broeks MBM Elsa, Flevo Genetics Snowman was born in 2005 and was the first bull ever bought by WWS Germany. He produced just under 16,000 doses in his career, of which majority was marketed before he died. Snowman's impact has been astounding considering his limited availability. He was released as a young sire prior to the era of genomic proofs; and it wasn't until his first daughter-based proof that he moved to the top of the charts. By this point Snowman had already passed for breeders Jacob Bearda and Harry Broekhuis, the Netherlands. Today, across the globe breeders continue to be more and more impressed with Snowman, as the second-crop daughters calve in. The young Snowman have an extreme will to milk, good dairy strength and above average type. In Canada alone, 141 first-lactation daughters have been scored with 62 Very Good and 70 Good Plus. With very limited semen at this point, most breeders can consider one of Snowman's fantastic sons.

A Ven Dairy Lidia 4
