Dear Holstein enthusiasts,

Welcome to the new issue of Hotspots. An issue which once again contains reports of one of the very best cow families from the US, the Larcrest family, and one of the very best families in Europe - the "Amarante" family. Both families are currently as popular around the world as they have ever been.

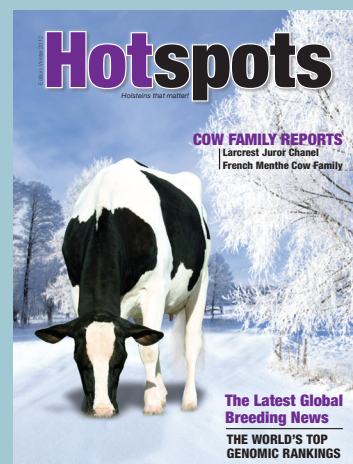

We also explain more about the possibilities sexed semen can offer for dairy farmers around the world. To add more value to our end customers, we also have to make use of the most up-to-date techniques.

Of course at the end of the day it is not only about making use of the best genetics and modern techniques; the single most crucial instrument on a farm is still the man/woman working with the animals. Hotspots free-lance Journalist Alice Booij is therefore writing a series of articles about various aspects of herd management, focusing on maximizing success within your breeding program and this issue includes an interesting feature about getting your bull calves ready for AI. We hope you enjoy reading this magazine and that it may be of some assistance in your work.

Best regards, The Hotspots Team

Hermann Meyer Oberende MONREAL and Fligh Higher PIONEER truly are two genomic giants, showing very high genomic values on both the German and the US base. Hermann Meyer Oberende MONREAL, the type specialist under the Man-O-Man sons, originates from the Gloriette EX-92 family (also: Bonatus) and amongst others stands for capacity, stature, wide rumps and outstanding udders. Fligh Higher PIONEER comes from the new and upcoming cow family of Hendel Durham Mitzi EX-90, which has many members with high genomic indexes. His high values for durability and Net Merit (NM 814) as well as his good index for feet and legs are some of his strong points. Hermann Meyer Oberende MONREAL and Fligh Higher PIONEER are used as sires of sons internationally.

# Larcrest Juror Chanel

## → Generation after Generation

Chanel, Champagne, Cosmopolitan, Crimson, Che-noa... the names recognized worldwide in this great industry for providing superior Holstein genetics. After one visit to southern Minnesota and the barn where the ladies of Larcrest reside another "C" word comes to mind – captivate. They catch your eye with their large massive frames, try to charm you with their bold personalities and are mesmerizing to watch attack a pail of grain or a pile of silage.

Generation after generation another great cow develops and another industry icon is born from this Minnesota herd, Larcrest Holsteins.

### Gary Housner, Bo-Irish

"By far the most aggressive family I have ever worked with. They eat volumes of feed and that spells milk. They are just my kind of cows and I have really been impressed."

### The Beginning

The Larcrest prefix spans for generation after generation but it was with one very special brood cow, Larcrest Juror Chanel EX-93 3E GMD DOM that this family really started to stand out. Chanel was the first cow contracted at Larcrest Holsteins and lived 15 full years on the farm. Today, Larcrest Holsteins is owned and operated by Jon and Ann Larson along with their son Tyler. Also active in the operation are Jon's sister, Linda, and her children, Chase, Bridget and Lydia.

The Outside mating on Chanel was a selection by Larcrest but Accelerated Genetics ended up contracting the pregnancy.

"Chanel is extremely dairy and open and needed maybe a little more strength in the front end and Outside did that." Jon shared. The result was a set of twins one male that went to Accelerated and one female,

Larcrest Oside Champagne-TW. With less than 10% of females born twin to a male turning out to be fertile, Champagne was a true blessing to the Larcrest herd and the industry of elite Holstein genetics.

Champagne classified EX-90 GMD DOM has thirteen daughters classified Very Good and has been a widely popular contract cow for the Larsons with over 17 sons in A.I. The magical mating of Shottle on Champagne was also a decision by Larcrest as Shottle was something new and interesting. The result was Larcrest Cosmopolitan, arguably the most popular Shottle daughter worldwide and known for her massive speckled frame and chart-topping offspring.

### The Great Mother-Daughter Duo

This former #1 CTPI Cow of the Breed is scored Very Good-87 DOM and today at six-years of age still finds her way near the top of the locator list with a GTPI of +2199. To pull a Cow Family Summary from Holstein Association USA you will find page after page and pedigree after pedigree listing the high genomic offspring by various sires of the great Cosmopolitan; however, one individual rises to the top quite handily, Larcrest Crimson-ET.

This Ramos daughter scored Very Good-89 in her first lactation with DOM status and was a contract mating for Scott Culbertson, Dairy Sire Analyst, Select Sires, Inc.

"Crimson has a special place in my genetic heart! She was the result of the Ramos mating on her massive Shottle dam, Cosmopolitan. I never dreamed she would be the world's largest Ramos daughter! Crimson has the distinction of being the youngest female I had ever contracted at that time and I tied her up for all male offspring until the completion of her two-year-old record. She was huge from day one and so well balanced. Then she calved and everything looked perfect; her massive frame, her personality, big sweeping rib and huge rear udder. Everyone who saw her wanted something from her. The components, health traits and high type values solidified her genomic ranking. Her phenotypic traits solidified what was on paper. And now after all the

### Scott Culbertson, Dairy Sire Analyst, Select Sires, Inc.

"Crimson has a special place in my genetic heart! She was the result of the Ramos mating on her massive Shottle dam, Cosmopolitan. I never dreamed she would be the world's largest Ramos daughter! Crimson has the distinction of being the youngest female I had ever contracted at that time and I tied her up for all male offspring until the completion of her two-year-old record. She was huge from day one and so well balanced. Then she calved and everything looked perfect; her massive frame, her personality, big sweeping rib and huge rear udder. Everyone who saw her wanted something from her. The components, health traits and high type values solidified her genomic ranking. Her phenotypic traits solidified what was on paper. And now after all the greatness she has completed through breed leading sons and daughters around the world, she is pregnant and will calve again and improve in everything. What a special cow," Culbertson said.

**Larcrest Cosmopolitan VG-87-USA DOM**

One of the greatest Shottle daughters with numerous high sons!

**Larcrest Crimson-ET VG-89-USA DOM**

The breed's largest Ramos and #22 GTPI Cow on Locator List!

**Larcrest Chenoa-ETS VG-86-2YR-USA**

The next generation of contract cows at Larcrest Holsteins!

greatness she has completed through breed leading sons and daughters around the world, she is pregnant and will calve again and improve in everything. What a special cow," Culbertson said.

In 2010 her daughter by Planet, Larcrest Case-ET, headlined the National Convention Sale in Minnesota and brought a commanding \$82,000 with Robert Goldmann, Iowa as the winning bidder. Case is now fresh and still resides in Iowa but under a new owner, Farnear Holsteins, where she just scored Very Good-85 VG-MS at 2-10. Her Dec. 2011 numbers came back at +2293 GTPI, watch for her in April to be among the top Planet daughters in the U.S. on the locator list.

Sons of Crimson are now available through several A.I. studs with two Planet sons at Select Sires, Calibrate (+2345G) and Camelot (+2236G). Larcrest Casual is a Superstition son from Crimson that will be released soon through ABS Global and has a GTPI of +2398, his full brother Certain (+2214G) is also at ABS Global and already available.

"Select has seven sons out of Crimson between +2200-2400 GTPI. Snowmans, Observers, Planets and Lightning make up the most exciting ones," Culbertson said.

Crimson has six daughters tested over +2300 GTPI headlined by Larcrest Cinergy-ET, a May 2011 Robust daughter with a GTPI of +2454. Cinergy sold on the Parade of Perfection sale for \$63,000 to new owners Morsan Farms, Alberta, Canada. Larcrest Cale is another high profile daughter of Crimson at Larcrest Holsteins with a GTPI of +2414. Cale is an Observer daughter with numerous contracts and a promising future! Other exciting young daughters of Crimson include a July 2011 Snowman with a GTPI of +2377 and an Atwood +177 over parent average at GTPI+2321 and 4.37 for PTAT.

## Across State Lines: Cosmos in WI

"I first learned about Cosmopolitan and Larcrest while traveling, networking and learning cow families/genetics with Dr. Marv JoÛson. He raved about the Debutantes, Eroys, and 'the best Shottle x Outside cross... Cosmopolitan'. So when she came onto the scene as a two-year-old with sale topping calves and choices, I couldn't wait to see the cow family for myself! In the past, the timing was never quite right to buy, but this past fall I jumped at the opportunity to visit Larcrest. Jon and Ann are as impressive and honest as the cows, and we struck a private deal for Comet," shared Neil McDonah, Speek-NJ Holsteins.

Comet is the Good Plus-84-2YR DOM daughter of Cosmopolitan with an extreme GTPI of +2226 and +1950 for milk. Coincidentally she is also the dam of the #13 GTPI Heifer in the U.S. that recently sold in public auction for an astounding \$160,000 to Elite Dairy Genomics.

"Comet has proven to be a genomic giant, and I look forward to working with Comet and Larcrest in the future," McDonah said.

Just north of Speek-NJ Holsteins resides Larcrest Carabella the Very Good-86 87-MS at 2-06 full sister to Cosmopolitan that has been attracting lots of attention since she freshened in June 2011. Carabella has a GTPI of +2230 with several high daughters by Bookem (+2401G and +2328G) and Radon (+2293G). Carabella and her daughters are owned in partnership between Matt JoÛson and Larcrest Holsteins. Also at JoÛson Holsteins is Larcrest Constance, the Very Good-85 VG-MS at 2-08 Mac daughter of Outside Champagne. Constance has a GTPI of +2066 and has high daughters by Snowman, Iota, O-Style and Man-O-Man.

The #1 Super daughter in the breed, Larcrest Cake-ET, resides at the well-known Sandy-Valley Farms. Cake is a daughter direct from Cosmopolitan with a GTPI of +2493 and is due this summer. Other family members currently being worked with at Sandy-Valley include a Ramos daughter of Champagne, Larcrest Cinnamon-ET Very Good-85 DOM and extremely high on her health traits. Larcrest Cato-ET is the Very Good-85 88-MS at 2-04 Alexander daughter of Cosmopolitan with a GTPI of +2062 and has numerous contracts and already high tested genomic sons and daughters.

## Our Cover Girl Chenoa

The next generation of the Juror Chanels calved in at Larcrest this past fall and easily scored Very Good-86 with a beautiful mammary, Planet Chenoa! Chenoa has already attracted attention worldwide with numerous bull and embryo contracts. She has daughters genomic tested by Robust (GTPI+2505 US 2/12), Kramer (GTPI+2374 US 2/12), Freddie (GTPI+2338 US 1/12) and other daughters and sons by Gold Chip, Lewis, Kramer and Robust awaiting results.

The early Chenoa embryos exported to Europe through Diamond Genetics resulted in a heifer calf, Bacchus Chennin (GTPI +2226 US 12/11). Chennin has two full brothers in Europe one which will sell in the May 2012 edition of the Online Elite Bull Sale organized by Diamond Genetics and the other tested in Germany and debuted with a sky-high index of gRZG +157, which makes him one of the highest genomic tested bulls in Germany.

## The Cosmopolitans in Europe

The worldwide popularity of this family is evident in the demand for embryos. The interest in genetics from this elite maternal line has been very high especially in Europe where the family continues to expand and find its way to the top of the charts.

## Paul Trapp, Regional Sire Analyst, ABS Global Inc.

*"I started stopping at Larcrest Holsteins about 10 years ago to see Juror Chanel who developed into an EX-93 cow at 9-06 with over 250,000 lifetime and became the cornerstone of their world famous cow family. Jon and Ann are wonderful people that are honest, hard working with great family values. I truly value their friendship."*

*When it comes to breeding cows, Jon is extremely opened minded to use the best bulls from around the world and make the best possible mating each time. ABS has several popular active bulls from the Juror Chanel cow family including 29H011931 Larcrest Control and 29H013829 Larcrest Chandon #74 TPI Bull. Currently, ABS has over 20 Larcrest bulls awaiting proofs plus more young sires standing at ABS waiting to be sampled, bulls on farm and contract matings to be born.*

*The Larcrest/ABS relationship has been very successful and due the track record of the Juror Chanel cow family combined with the integrity of Jon and Ann Larson - this relationship will continue for a long time," shared Trapp.*

O-Cosmopolitan is currently the #1 GTPI Planet son worldwide with a GTPI of +2472 and PTAT+3.61. A son of Shottle Cosmopolitan he is currently being used heavily in Europe and is now making his way to North America.

The #2 GTPI Planet daughter in Europe and the #5 GTPI Planet daughter worldwide is a full sister to O-Cosmopolitan, Neerduist Planet Cherso GTPI+2429. Cherso is owned by Neerduist Holsteins and Diamond Genetics and is one of the hottest and most interesting heifers in Europe right now. Another daughter straight out of Larcrest Cosmopolitan is Drouner AJDH Cosmo, she is the #2 GTPI Freddie daughter in Europe and the #5 Freddie worldwide! In regards to type, she is one of the greatest Freddie daughters in the breed and sells in the 2012 Eurogenes Online Heifer Sale starting March 19.

Roccafarm Beacon Chrissy GTPI+2270 is the #1 GTPI Beacon in Europe and the daughter of Larcrest Chenile-ET Very Good-86-2YR. Chrissy sold for € 20.500 in the Eurogenes Online Heifer Sale to Rosetti, Diamond Genetics and DJM Genetics.

"We have really enjoyed meeting the visitors that have come from many countries. It has been very rewarding to see other people having success with our cattle, especially those who have helped us from the start. When a bull makes the active line-up or seeing the animals that have developed from the embryos exported go on to do great things it makes the hard work worthwhile," Jon and Ann shared.

## Market Interest to Drive the Future

With the non-stop embryo and bull contracts, Jon admits that it has driven the flush program at Larcrest Holsteins and greatly influenced the mating decisions.

When asked, Jon quickly credited Steve Berland, Scott Culbertson and Paul Trapp who have helped with the marketing of the Juror Chanels

since the beginning. "It is a group decision when we sell a high one or decide to offer a first choice female," Jon shared. All selections go through them.

"I started stopping at Larcrest Holsteins about 10 years ago to see Juror Chanel who developed into an Excellent-93 cow at 9-06 with over 250,000 lifetime and became the cornerstone of their world famous cow family. Jon and Ann are wonderful people that are honest, hard working with great family values. I truly value their friendship."

When it comes to breeding cows, Jon is extremely opened minded to use the best bulls from around the world and make the best possible mating each time. Jon and Ann have developed the wonderful Juror Chanel cow family that excels in transmitting outstanding type, modern health traits with high components.

ABS has several popular active bulls from the Juror Chanel cow family including 29H011931 Larcrest Control (O-Man x Convincer Chante EX-90) and 29H013829 Larcrest Chandon #74 TPI Bull (Buckeye x Outside Champagne EX-90). Currently, ABS has over 20 Larcrest bulls awaiting proofs plus more young sires standing at ABS waiting to be sampled, bulls on farm and contract matings to be born. ABS is proud to market Larcrest Cancun 2321 GTPI (Planet x Cosmo) and 29H016113 Larcrest Capitalize 2269 GTPI (Super x Cosmo) as ABS Primetime Sires. The Larcrest/ABS relationship has been very successful and due the track record of the Juror Chanel cow family combined with the integrity of Jon and Ann Larson - this relationship will continue for a long time," shared Paul Trapp, Regional Sire Analyst, ABS Global, Inc.

The industry certainly has a lot of admiration and respect for this emerging brood cow family at Larcrest. It has been exciting to watch generation after generation the next great emerge and with bulls like Numero Uno and Mogul being used on Cale, Chenoa and Crimson the future looks bright for this southern Minnesota herd.

Nominated Canadian Cow of the Year 2011

Winter Star will have her official GLPI in April. Currently, she is the #1 LPI Cow in Canada at LPI+3391 and from the same family as Windbrook, Windhammer, Willrock, Wildthing, Stanley Cup and many more! Winter Star is currently being flushed and inquiries are welcome. We have embryos available by Morningview Levi from her first flush.

# GOLDEN CALVES

*prove to be the right ones!*

## Mars YORICK

(Atwood x Farnear-TBR Bailey VG-87-USA 2yr.)

US 12/11 GPTI +2290 / PTAT +4.39

CA 12/11 DGV LPI +3296 / Conf. +22

**The #2 GTPI Atwood son in the Breed**

**The #1 GLPI Atwood son in the Breed**  
**International Sire of Sons**

Seller: Mars Holsteins (NL) / Buyer: Ascol (ES)

### Carlos Mendez, Ascol:

"Yorick is the best selling bull we have ever had. His complete semen production from the first year is already sold out! Our breeders just love this kind of bull!"

### Fustead BRISBANE

(Bowser x Fustead Oman Sammy VG)  
#8 RZG bull Germany & #1 Bowser!

### Shanael Planet BONANZA

(Planet x Regancrest G Brocade EX-91)  
#15 RZG Bull Germany & #2 Planet son

### Golden-Oaks PARMA PP-Red

(Mitey P x Golden-Oaks Perk Rae Red)  
Homozygous POLLED! GTPI +1902

### Holbra APPLEJAX RC

(Superstition x KHW Goldwyn Aiko)  
12/11 GTPI +2240!! Int. Sire of Sons!!

### Hood M-O-M EMMET

(Man-O-Man x Tramilda-N Baxter Emily)  
12/11 GTPI +2367 / DGV LPI +3287

### Hood CARWASH

(Sanchez x R-Z Baxter Caramel VG-89)  
#1 GLPI Sanchez son!!! And +18 Conf.!

# More than just extra females

In the U.S. the use of sexed semen is 'booming'. Not only to get more heifer calves, but even more important to give a first calf heifer, at a young age, a good start. Next to sexed female semen there is also sexed male semen available, to make higher bull calf prices! Below are some considerations and advantages to choosing a male or female pregnancy.

It looks like 2012-sexed semen is coming into a 'second youth'. The technique of sexed semen has been commercial since 2006 and lots of dairy farmers used it heavily in the beginning years. As the first heifers entered the milking herds, the use of sexed semen decreased in 2009, a reduction mostly caused by the low milk prices that year. Now sexed semen is on its return, positively. In the European Union dairy farmers are preparing for a quota free market, and insemination in 2012 with sexed semen means milking more heifers in 2015. For other countries like the United States it looks like farmers (thanks to a better milk price) have rediscovered the use of sexed semen. And not only to deliver more heifer calves, but now after five years experience with sexed semen, it is clear that there are more and maybe even bigger advantages.

**Ron Kutz, Kutz Dairy**  
"Sexed semen helps us breed our own replacements and become less reliant on outside sources for growth. As well, we've been able to cut down on some of the health issues we experienced before when we were bringing in 200 head from 30 to 40 different herds."

### Easy calving

Using sexed semen on your heifer also means that she will have an easier calving. In turn this makes her start as a milking cow less difficult and of course more productive. The calving for heifers is a big stress and with a light calving the heifer will have a better start and a better chance to adjust

in the herd and live a longer life. She will be fit to walk to get feed and go easily to the milking parlor. From all heifer calvings, one out of 10 are considered difficult. With sexed semen you can reduce culling of poor performing heifers and after spending a lot of money rearing them you don't want to lose them in the first months of the lactation. The value of replacement makes using sexed semen immediately profitable.

Think the other way around: sexed semen also makes it possible for heifers to calf at an earlier age, for example 21 or 22 months and in turn can start producing and making money in advance. However, this will only work with the proper feeding and nutrition plan.

### Lower conception rate

Next to all the advantages, sexed semen has a big disadvantage: a lower conception rate. On average this conception rate is about 20% lower compared to conventional semen, but the variation between farms is huge. On average a 14-month-old virgin heifer would have a conception rate of 56 percent with conventional semen and a 44.8 percent with sexed semen, the University of Wisconsin analyzed.

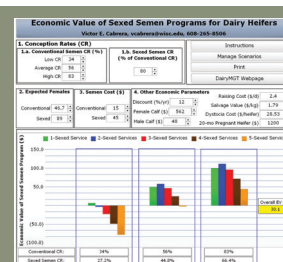

It's proven to work the best on heifers because they have a higher conception rate than adult cows. The lessons learned in the beginning with the use of sexed semen will help to improve the pregnancy rates in the future. Now we know that the details with inseminating, feeding and housing are of great importance. Farmers who had to deal with low conception rates had a wake up call regarding their management and the way they handled the semen. The results with sexed semen made the weakness clear. For example, the temperature of thawing the straws and of course the feeding of young stock proved to be very critical to achieve the best conception rates.

### Economics

Is it economical to use sexed semen? This is a difficult question that has a range of answers depending on market circumstances. Of course a good return on investment starts with good pregnancy rates. It also depends on

### Internet tool available from the University of Wisconsin-Madison

The University of Wisconsin-Madison Dairy Management Team has created a free user-friendly tool to evaluate the sexed semen reproductive programs with heifers. This calculator can be used for farm-specific conditions to replicate analyses presented here. The tool called 'Economic Value of Sexed Semen Programs for Dairy Heifers' is available at the website [www.dairymgt.info](http://www.dairymgt.info) under the menu tools

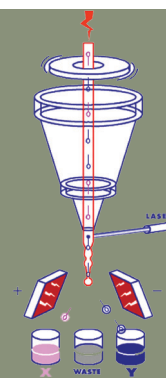

## The sexing technique is short

The principle of sorting semen with the (most common) flow-cytometer is the difference in DNA between X and Y bearing sperm. This variation is between 3, 6 and 4.1%. The semen will be mixed with a fluorescent dye and sent through the flow cytometer. Because an X-chromosome (female) is larger, it emits slightly more light than a Y-chromosome (male) bearing sperm cell. A detector measures the amount of fluorescence and separates the sperm, which will give about 90% purity. After this 'sexing' only 10 to 15% of the semen is ready to put in a straw. This fact makes the price of sexed semen two to three times as high as conventional semen.

image courtesy of [www.sexingtechnologies.com](http://www.sexingtechnologies.com)

the price difference between conventional and sexed semen, the value differences between bull and heifer calves and the price of replacement heifers. Every farmer has their own incentives. Research at the University of Florida points out that sexed semen is most valuable in virgin heifers, and then primarily in the first insemination and with diminishing returns in later inseminations. Sexed semen could have value in some cows if the reduction in conception rate is modest, heifer calf prices are high compared to bull calves and the price of sexed semen is reasonable compared to conventional semen.'

## Jack Dutton, Dutton Simmentals

"If you run the economics of using semen, particularly in flushing, you make a whole lot more money using sexed semen than conventional semen. I've done five flushes now, and I would not use conventional semen for flushes if I had sexed semen available from a variety of bulls. Conception rates on embryos are as good as they are with regular semen."

But you can also think of more value of sexed semen next to economics. It helps you to grow your herd and protect (improve) the health status of your herd. You are not bringing in new animals, which can mean a risk for the health status. In this way you diminish the risk of getting diseases in the herd with buying replacement heifers. It also helps you to increase the quality of your dairy herd. For example, use sexed semen on your best heifers (discovered with a genomic test) and you will invest in getting a higher quality herd. Use male sexed semen (from beef bulls) on cows where you don't want to have heifers from and they will bring more valuable bull calves. The higher price of the bull calves pays the higher price of sexed semen.

## Fred Schuetze, Buzzard Hollow Ranch

"We will see the sexed semen industry grow quite strongly now that we know this sexing process works. Conception rates in virgin heifers are constantly at 65-68% with one service. The gender selection rate has been great. In the last A.I. program with female sexed semen, out of 62 calves born 61 were heifers."

At our last sale, heifers bred to sexed semen brought an average of \$500 more than heifers bred to conventional semen. On semen sales, the price of sexed semen brought an average of \$350 per straw; whereas the unsexed semen averaged \$100 per straw, this proves people's interest in building a strong female herd. I think sexed semen is definitely worth what it costs to be collected."

## Martijn de Jonge, DJM Genetics

"Until now we did six flushes with sexed semen on which we produced 53 Grade A embryos, three of the flushes had no unfertile embryos at all. In total we had an 83% fertility rate on the embryos. We are extremely satisfied and the current four cows we have on program for flushing will all be served to sexed semen."

## Gary de Graaf, Jer-Z-Boyz Ranch

"About 80% of our heifers are mated with sexed semen and the remaining 20% with conventional semen. We see tremendous potential for Jersey replacements and growth of the national Jersey herd. Sexed semen fits our business plan right now because it helps us supply Jerseys for regions of the country where cheese production is expanding."

A Breeders's

# → A young bull awaiting A.I. is no show calf

With the high popularity of young bulls it's even more important to rear them in the right way. They should have a good body condition score, advises Semex Sire Analyst Thierry Laberge.

"And not look like a show calf. The better the feeding in the first 30 weeks is, the better the semen production."

Although it looks like 'common sense', there are a few details to assist in the success of feeding, housing and healthy raising of the youngest generation bulls.

### Young bulls like high genomic females

"Some females have a value of sometimes 50,000 to 200,000 dollars. So you should treat young bulls who go to A.I. the same way", advises Laberge.

Every year an A.I. organization receives about 250 new young bulls in their barn, and they can make good recommendations how to handle and bring up a young bull the best.

"Keep them isolated as much as you can", says Laberge as one of the first things that breeders should do when a bull is born. "You avoid contamination of the bull with all kinds of diseases. For some farmers

this is a hard job because you have to make space somewhere in the barn," Laberge shares.

Keeping the bulls with heifer calves could mean that they get 'infected' with vaccines that you use for the females.

### Thierry Laberge, Semex

"There is a big no, no for using vaccination on bulls who go to A.I. Don't vaccinate them, because after blood testing we can't see the difference between the vaccination or antibodies of the disease."

### Genomic Test: ASAP

Another important thing to do right after the bull calf is born is to send in for the genomic test.

"It can be done right after he is born; you don't need to wait until the bull has reached a certain age. The DNA won't change when he is getting older," Laberge said.

The sire analyst experiences that breeders sometimes wait for two or three months to send the sample; yet, the sooner you get him genotyped, the sooner the breeder will know if the bull can go to A.I. In the end, it is expensive to keep the calves longer than necessary.

Semex inspects every young bull on the farm when they are about six months old. "A lot of bulls have heifer mothers. At six months of age

### Choose a Marketable Name Thierry Laberge, Sire Analyst, Semex

'Bin Laden.' A young bull entering the Semex barn got this name from his breeder, but this name didn't make it. "We changed it", Sire Analyst Thierry Laberge says. "It should be a neutral name, so it should have nothing to do with religious or politics, it is not supposed to offend anyone. That's very important when you choose a name."

Although Semex tries to respect a bulls name as much as possible, sometimes they change the names. "We check in our computer system if there is no other bull with the same name, to avoid confusion with the straws," he notices one condition for approving a name. "Ideally it has to be a marketable name, English or French, so every farmer all around the world can pronounce the bulls name and can remember it easily."

their dams are usually milking, which brings extra information to the bull," shared Laberge.

Six months is also the best time to start health tests on bulls to maximize their chances to pass. "Before six months the bull can still have antibodies in the blood thanks to the colostrum of their mother," shared Laberge.

By the way, management of the colostrum is very important as well. It should be free of all diseases like IBR, Leucosis, etc.

"Make sure that the mother is free of these diseases. If not, test another cow just before she is calving when you want to use her colostrum, or use replacement colostrum. The same advice we give with feeding milk: use milk replacement to make sure the bull stays free of all diseases," Laberge stated.

At a later stage, dehorn the bull at the same age as you are dehorning the heifer calves.

## Good Body Condition

Make sure the bull calf gets enough energy to develop well. "It's not a show calf," warns Laberge.

"You like a heifer calf to be sharp and have dairy type, but a bull needs to have a better condition. So it needs more energy in the ration, more concentrate." The development in the first 30 weeks is very important for a high quality and quantity of the semen production, he quotes out of a research.

## Thierry Laberge, Semex

"Bulls who are fed better, also develop their testicles better and then they produce semen in an earlier age and they produce more semen up to 30% more. That is nowadays very important with young bulls who are used so heavily on a young age."

Laberge has an example of a young Snowman bull in their barn. "He has the highest genomics of all bulls and we want to use him as a sire of sons as soon as possible. We started him up at the age of nine months to try to get semen."

When the bull is about to go to the Semex barns, the sire analyst always comes to see the bull before transport. "We want to see with our own eyes if it's healthy and developed well," Laberge says.

They also pay extra attention to the development of his testicles. "That gives an indication about his semen production. If I have two full brothers with the same genomics that are similar for type and I would have to pick one, I definitely will pick the one with the bigger testicles. He will produce more semen," stated Laberge.

A better production is not only a big plus for the A.I. organization. "As we return breeders royalties on their bulls, it's also in their interest that a bull produces well, so it pays back to invest in a young bull."

## La Ferme Gillette Bull Facilities

A special thanks to Eric Patenaude, La Ferme Gillette for sharing these photos

Show barn where all embryo calves are born

Sudan x Gillette Goldwyn Jenny destined for A.I. as so many are each year

After 3 to 4 days heifers and A.I. bulls move to outdoor hutches

After weaning the bulls move into a small freestall - 4 to 6 months

The bull barn where they stay from 6 months of age until about 8 months when they are ready to leave for A.I. They are kept in separate pens in order for them to get tested to enter A.I.

## Pontiac, Illinois

Interglobe Genetics is one of the nation's most well respected bovine semen collection centers. Located in Pontiac, Illinois, we are committed to providing the most dependable, professional service in the industry. Your animal's health, reproductive performance, and care are our primary goals. Our facilities are design to accommodate the housing and collection of bulls for both domestic and international owners. Our services also include the storage and shipping of semen internationally or within the U.S. Visit our web site for more detailed information, or send us an email. We have programs to fit everyone's genetic goals.

### International collection barn

The international and CSS barns house bulls for collection to various countries including the European Community, Australia, Canada, Mexico, and New Zealand.

### Domestic collection barn

This is our main barn for housing and collection of semen for domestic use. Many of the stalls have the convenience of an outside run, for the bulls comfort.

### Office, lab and semen storage

The Interglobe business office, laboratory and semen storage are housed in this facility. The Interglobe staff provides dependable, professional service to customers by offering semen storage, shipping, AI supplies, and more.

### Round barn with sign

Built in 1918 the round barn at Interglobe Genetics has become a symbol of the business. This barn is on the list of National Historic Sites and is one of the few barns of its kind left in the country.

# Genomic Testing

## Choice of Genomic Test

- ☐ **6K Genomic test** US \$ 55  
(Reliability between 65% and 70%)
- ☐ **50K Genomic test** US \$ 135  
(Reliability 72%)
- ☐ **800K (HD) Genomic test** US \$ 250

## Extra costs

(Herdbook administration, registration and sending) € 35 / animal

## What do you receive?

### - Official Genomic Sheet Holstein USDA

On the sheet you will see the Genomic figures in comparing with the Parent Average

### - Official Genomic Sheet Canadian Herd book

Only with animals tested with the 50K or higher test.

Hereby I register my female animals for Genomic Testing through Eurogenes:

Name	Registration #	D.O.B.	Sire	Dam

Name	_____		
Address	_____		
ZIP Code	_____	City	_____
Country	_____	VAT #	_____
Tel.	_____	Email.	_____
Datum	_____	Handtekening	_____

Send the form back, by email, fax or post to:

# Dairy Expo

## Promotes UK Genetics

Friday 2nd – Saturday 3rd March, 2012  
Borderway, Carlisle, UK

This prestigious new event is being organised by Harrison & Hetherington, and is aimed at both commercial and pedigree breeders. With international judges and entries coming in from all parts of the UK and Europe, the event is already set to become one of the key events of the UK Dairy farming Calendar.

The UK Dairy Expo begins on the Friday with the International Dairy Youth Championships. The focus on the Saturday is the dairy cattle classes. After judging and the presentations, the Global Classic Sale will take place with animals from the most prolific cow families in the world of dairy genetics.

In addition to the judging, youth competitions, and top quality livestock on sale, there will be in the region of 150 Trade Stands, with Commercial and Educational Exhibits, Machinery Show & Demonstrations, the latest in Dairy Technologies and Industry Seminars.

"We have been amazed by the interest and support from breeders for UK Dairy Expo," says Glyn Lucas from Harrison & Hetherington. "...with entries numbering around 300, it looks like we are going to have a huge turnout," he says.

The importance of Dairy Expo is highlighted by the high profile Canadian judges selected to place the dairy classes', both are key industry figures and highly respected internationally. Donald Dubois, from Princeville, Quebec will have the pleasure of placing the Holstein show and Brad Sayles, from Ayr, Ontario, will judge the Coloured Breeds as well as Showmanship classes.

The clipping section of the International Dairy Youth Championships will be judged by one of the industry's most recognised female figures and leading authorities in preparing dairy cattle for the show ring, Erica Rijnveld, from Holland.

"Dairy Expo is being held at a time when the UK Dairy industry is more positive than it has been for a number of years," says Glyn, who

emphasises the background to the event:

"We know that there is an opportunity in the industry for a National Dairy Event and already the response has been very positive. Our aim is to ensure the ongoing development of the UK Industry, so UK Dairy Expo will focus on both the commercial and pedigree aspects of the dairy business."

After the closing ceremonies, the 2012 Dairy Expo concludes with a banquet where the 2011 All Britain winners will be announced by Holstein UK. Anyone interested in attending can contact the show office for tickets.

The Borderway Centre is a state of the Art Livestock Exhibition space at Hetherington & Harrison's site at Rosehill, near Carlisle. Next to junction 43 on the M6 it is geographically the United Kingdom's most central location, and situated on the country's main north-south transport route.

**NEAREST AIRPORTS;**

## Diamond Genetics is your source for the World's best Holstein Genetics

Diamond Genetics has always a wide range of World Class embryos available. Currently we will have embryos available out of the World Class cows below. Do not hesitate to contact us for more information.

### Larcrest Chenoa VG-86-USA 2yr.

Planet x Larcrest Crimson VG-89-USA EX-MS 2yr. x Larcrest Cosmopolitan VG-87-USA La 1.

Larcrest Chenoa VG-86-USA 2yr.

One of the Hottest cows in the World right now. Chenoa's dtr by Robust came back with index in February with over 2500 GTPI and her Freddie son in Germany came back with g RZG +157, one of the highest tested bulls in the German system.

Chenoa's mother Larcrest Crimson is still in the American GTPI Top 25 and is the highest scored dtr of the famous Larcrest Cosmopolitan VG-87-USA La 1.

Read everything about Chenoa's family on Page 12 in this magazine!

Buy embryos out of our Covergirl.

### Leaderwin Jeeves Mace VG-87-USA 2yr.

Jeeves x VG-89 Shottle x EX-90 BW Marshall x EX-90 Patron x EX-90 Leadman

Leaderwin Jeeves Mace VG-87-USA 2yr.

A true Genomic Giant. Her dtr Leaderwin Domain Misty is the #4 GTPI and #5 PTAT heifer in the USA (GTPI +2589 / PTAT +4.72) and sold for \$ 159,000 at the International Intrigue Sale '11 at Blondin. A unique combination between so high GTPI and PTAT!

Another dtr by Observer has GTPI +2476!

The cow to produce the NEXT #1 animal!!

### Diamond Genetics

Wipstrikkerallee 95 - 8023 DW Zwolle - The Netherlands

# The French Menthe Cow family

## ➔ “Consistency All Over...”

The French had already known for several years that this family was special and now the rest of us are also aware that it's not only one of the very best families in France, but also competes with the best families in the World! The family really caught the global spotlight with Cabon Ferdinand at Semex who is seeing international use as a sire of sons, and with the 2011 French National 2yr-old Champion Carf Emeraude VG-89 2yr, later sold to the Netherlands.

### American background

The family originates from America with their roots going back on the American born and bred Ikes-Acres Rag Apple Elly May, born in 1978 and imported to France where she scored VG-87. Elly May had a deep American pedigree consisting of numerous generations of registered Holstein cows.

When the family arrived in France, it overwhelmed the French with every combination and every generation another good cow. If we take a look on the sire stack behind the current top donor cows, there have been questionable bulls in the pedigree, but this strong family survived every combination and really put the transmitting power in from the maternal side to make the very best cows, with classifications up to EX-94!!

The family started at Cabon Holsteins since they purchased Menthe at the Salon '96 in Paris for 45.000 French Francs. From that moment they have been extremely successful with this family. Menthe produced three Number 1 Index cows in France for Cabon Holsteins with Rame VG-86 (s. Aaron), Rosiere EX-90 (s. Convincer) and Otarie VG-89-FR (s. Demand). All of them made their own very successful branch

in the Cabon herd and expanded through different French breeders who have each experienced the great consistency in quality of this cow family.

### Amarante – A family on it's own

Amarante is one cow who will write her own story. She just calved for the 3rd time and looks tremendous. Angelo Pozzatti: "I have seen Amarante when she was just fresh with her last calf and she looks absolutely tremendous; for me one of the greatest Shottle daughters type-wise". Amarante has already demonstrated her great type throughout previous lactations with two Top 3 positions at the National Shows in France, and winning the Family prize at the National Show in Lezay 2010! Alongside her extensive show career, Amarante is now proving her transmitting ability, with many outstanding descendents on different farms developing both impressive show type with high Genomics.

### Family party at Space '11

The French National Space Show 2011 was a real family affair in the Jr. 2yr-old class. Carf Emeraude, at that time owned by GAEC Carfantan, won the class with the Reserve Championship won by Cabon Elegante VG-88-FR 2yr! Both sired by Goldwyn, both Picston Shottle as maternal grand sire and two maternal sisters as grand dam, Toulouse and Umelin!

## 9 Generations average EX-90

### Genomic Show star leaves France

The National Jr. 2-yr old Champion, Emeraude, bred by GAEC Carfantan out of Shottle daughter Agathe VG-88-FR (Intermediate Champion SIA Paris 2010), had an extremely successful show season of 2011 in France. International interest followed after her high Genomic Index was taken into account - in May 2011 she ranked as the #2 Type cow in France with +3.8 and combined it with a very all-round ISU index of +162. After her victory at the National Space Show '11 she left France for Holland when JK Eder Holsteins & Diamond Genetics purchased her. Emeraude went on to receive the maximum 2yr-old score in the Netherlands (VG-89 2yr), placing 1st in her class at the National HHH-Show and came back with a skyhigh Genomic Index. CA 01/12 DGV LPI +2294 / Conf. +18 which ranks her in the top global rankings for Conformation!

**Danoise VG-87-FR 2yr.**  
Dam to Cabon Fernand @ Semex

**Carf Emeraude VG-89-NL 2yr.**  
National Jr. 2-Yr. Old Champion & +18 g Conf.!

**Agathe VG-88-FR**  
Int. Champion SIA Paris '10 - Dam to Emeraude

**Audreay VG-87-FR**  
Dam to Dambriul - #5 ISU Roumare son

## Terrific Toulouse

The cows behind Emeraude have been a very successful branch of the family with a top Genomic heifer tracing back to Toulouse. Dam to the successful Shottle son Avous @ Dynamis (ISU +16) and the cow behind Xacobeo daughter Cherrygirl bred by Danion Herve and GAEC Toullec (Xacobeo x Bolton x Shottle x Toulouse), she is the #1 overall Type heifer in France (Conf. +4.3). She is 0.3 points higher than the #2 heifer and is the #12 ISU heifer overall in France (ISU +181). In the Global rankings, Cherrygirl is listed as the 4th highest Xacobeo daughter for GLPI!

## Sire Success

The list of successfully tested Amarante sons is growing, with the

### Angelo Pozzatti (Semex)

“This is one of the most consistent transmitting cow families in Europe”

popular Craneur (s. Roumare), Extragold (s. Goldwyn) and Esquibien (s. Sanchez) at Genes Diffusion. Esquibien is the #1 ISU Sanchez son, in France and Extragold the #3 Type bull, she has also bred the #7 GTPI Roumare son in the world, Colaro, who is at Semex. The undoubted star at the moment however is Amarante's grandson Cabon

Fernand at Semex. Fernand's mother, Cabon Danoise VG-87-FR 2yr. is a fantastic Bolton daughter who stood 3rd in a strong class of Jr. 2yr-olds at the National Show in Le Mans '11. Her high scoring son Fernand is in big demand as a sire of sons at the moment; he is the #6 GLPI bull in the World with DGV LPI +3665 and for GTPI (+2386), he is the #8 GTPI Man-O-Man son in the breed!

Other male members of the family are also looking to put their stamp on the Holstein population. One of these top bulls is Domin Euro, the #4 Roumare son in France based on ISU (ISU +172) and already used

## Fernand, the #6 GLPI bull in the World and has DGV LPI +3655!!

as a sire of sons. He goes back through a Shottle daughter of Toulouse's full sister, Toscane. The Top 5 of Roumare sons is completed by another member of the family, Drambreuil at Genes Diffusion with almost the same pedigree as Domin Euro. Drambreuil (ISU +170) is a son of Shottle Bottle, another daughter of Toulouse who herself is the dam of Avous (s. Shottle) at Dynamis, a top ranking Shottle son in the French index list with ISU +160. Caesar, again at Genes Diffusion, is also in the Top 10 Shottle sons for ISU in France and is bred from yet another branch of the family.

## What do other people think about the family?

### Angelo Pozzatti (Sire Analyst Semex)

“For me this cow family is one of the most consistent cow families I have seen in Europe. They have the ability to transmit their qualities in both the male and female sides with numerous great quality cows and several successful daughter proven bulls already. At Semex we are very fortunate to work with the Roumare son of Amarante (Colaro) and Amarante's grandson Cabon Fernand, who increased a lot in the last index run and is in use as a sire of sons now in different countries. Amarante is my favorite cow of the family, I just saw her fresh again in her 3rd lactation, and she is one of the best Shottle cows for type I have seen.”

### Frederic Lepoint (Sire Analyst Genes Diffusion)

“We have already worked with this cow family for many years, even before the Genomic era. After the introduction of Genomics, the figures underlined the qualities of this family that we were already aware of. This is certainly one of the very best cow families in France for both Type and Index to work with. Even with lower type bulls in the pedigree, the quality of this family comes through, for example the Dutch Boy son Texas which has still +1.7 for type with over 500 dtrs. He sired the Jr. 2-Yr. Old Champion at the last Eurogene-tique show”

### Jean-Luc and Patrick Cabon

“The Menthe family is getting better and better every day. It is the complete package of Production, Type, Health and Index. The impact of Shottle 5-6 years ago first brought this Menthe family into the top level. Last year was especially great, with the bull Cabon Fernand with Semex breaking into the top gLPI listings. This family even performs really well on the show scene in France, winning Space championships with both Elegante and Emeraude.”

# The New Show Queen of the Netherlands

"This would be the cow which will put  
Holland on the International Map"

John Gribbon (UK) during the National HHH-show '11

## Veenhuizer Damion Winnie EX-92-NL (Max. Score)

(EX-92-NL Damion x VG-89 Jocko Besne x VG-89-DE Mandel x VG-88 Leadman x VG-88 Blackstar x VG-86 x To-Mar Wayne Hay EX-90-USA)

Res. 2-Yr. Old Champion HHH-Show '09 (Judge: C. Mc Kinven, CAN)  
Grand Champion & Jr. 2-Yr. Ol Champion Int. Show Libramont '09 (Judge: E. Junker, SW)  
Grand Champion & Int. Champion National HHH Show '11 (Judge: J. Gribbon, UK)

Veenhuizer Damion Winnie EX-92-NL is one of the greatest show cows in Europe right now! Scored the maximum VG-89 as a 2yr. Old and now the maximum EX-92-NL in her 2nd lactation! In her 1st lactation she was Grand Champion at the International Show in Libramont and back in her 2nd lactation she won the Grand Championship at the National HHH-show!! A great performance!

She has the complete package with a great pedigree going back on the American To-Mar Wayne Hay EX-90-USA, the mother to the legendary To-Mar BLACKSTAR!! Winnie's mother, is the full sister to the proven sires Janosch, Jannsen & Jackpot in Germany!

Winnie has dtrs at Veenhuizer Holsteins by Goldwyn & Gerard and she will be in IVF programm in the Spring of 2012.

# Ensenada Taboo PLANET

## Choose your favorite PLANET daughter

Ensenada Taboo Planet has been popular from the start when he received his very first index. He came in sky-high and had a very alternative sire stack with Taboo x Amel x Duster. Now, February 2011, Planet already has almost 4,000 daughters in his American index and still is the #5 TPI proven bull in the U.S. and #2 second crop bull.

His current index shows a lot of milk (+2267M) and over two points for type. In numerous different countries his daughters are in the genomic top rankings and are currently the most popular bull mothers. With Hotspots we made a selection of his most popular and interesting daughters. Choose Your Favorite Planet Daughter!

All selected Planet daughters have calved, scored and been pictured at the day of selection.

### A Ralma Planet Tabea

**Owner** Diamond Genetics (NL) & Twin Genetics

Planet x VG-86 2yr. Oman x VG-87 Outside x VG-89 Convincer x Ralma Juror Faith EX-91-USA

#### Genomic Index

US 12/11 NM \$ 714 / PTAT +2.49 / GTPI +2228

**Proj.** 2.01 305d 9.790kgM 3.6%F 3.3%P  
**Conf.** V V V V V / VG-85-NL 2yr.

One of the highest cows of the Ralma Juror Faiths!

She is in the Europe Top 20 for GTPI and her Jordan is the #1 Jordan (GTPI +2267). Her Lonar is the #1 GTPI Lonar daughter!

### B Larcrest Chenoa

**Owner** Larcrest Holsteins (USA)

Planet x VG-89 Ramos x Larcrest Cosmopolitan x EX-90 Outside x EX-93 Ked Juror

#### Genomic Index

US 12/11 NM \$ 637 / PTAT +2.20 / GTPI +2156

**Prod.** 2.04 175d 7.178kgM 4.1%F 3.7%P  
**Conf.** VG-86-USA VG-MS 2yr.

One of the hottest Planet daughters right now! Her

Robust dtr came back with over 2500 GTPI and she has a Planet son with g RZG +157! Great branch of the Cosmopolitans!

### C MsChartrois Planet Leoni

**Owner** Velthuis Farms & Boldi (Canada)

Planet x VG-88-USA 2yr. Shottle x Lylehaven Lila Z EX-94-CAN x EX-94 Formation x EX-94 Starbuck

#### Genomic Index

CA 12/11 Conf. +17 / GPA-LPI +2703

**Proj.** 2.01 143d 12.300kgM 3.7%F 3.0%P  
**Conf.** VG-86-CAN VG-87-MS 2yr.

Dam to Let it Snow at Semex with over 4000 DGV

LPI and #1 bull in the breed! Planet granddaughter of the Million Dollar Cow, Lylehaven Lila Z EX-94-CAN! Same family as the #2 bull Lexor!

### D Ladys-Manor PL Shakira

**Owner** De-Su Holsteins LLC (USA)

Planet x EX-90 Shottle x EX-90 Debut x Ladys-Manor Ruby Jen EX-94-USA 2E

#### Genomic Index

US 12/11 NM \$ 953 / PTAT +3.74 / GTPI +2552

**Conf.** VG-85-USA VG-MS 2yr.

The #1 Cow in the World, GTPI +2552! Milking and scored VG 2yr.

already. Full sister to the former #1 bull Shamrock! Sold for \$ 50.000 in the 2011 Nat'l Convention Sale.

### E Gillette S Planet 2nd Snooze

**Owner** Gillette Holsteins (Canada)  
T-Wave Holsteins (Japan)

Planet x VG-89 Bolton x Gillette Blitz 2nd Wind VG-88 x VG-86 Storm x Braedale Gypsy Grand

#### Genomic Index

CA 12/11 Conf. +15 / GPA-LPI +3205

**Proj.** 1.11 305d 15.515kgM 3.7%F 3.3%P  
**Conf.** VG-86-CAN VG-87-MS 2yr.

The #2 GLPI cow in Canada! Dam is the full sister to Windhammer & Stanley Cup and maternal sister to Windbrook and Wildthing! From the great Gypsy Grand cow family!

### F Saluden Etoile RC

**Owner** Diamond Genetics FR & Saluden Holsteins

RC Planet x VG-86 Shottle x Juror Capri x Patron x Corsaro x Benchmark x Southwind x EX x EX x EX

#### Genomic Index

US 12/11 NM \$ 584 / PTAT +3.14 / GTPI +2153

**Prod.** 2.02 144d 4.101kgM 3.4%F 3.0%P  
**Conf.** VG-85-FR VG-88-MS 2yr.

The #1 RED CARRIER cow in Europe and one of the highest in the breed! Same family as

Esquimau and Jargo! Goes back to Queen 2!

Planet daughter of the HUGE Crimson

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 29 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasize your selection criteria, so we focus on the genetics that will do the best job for your goals.

### **Services:**

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States
