Poppe SNOW RC (Poppe SNOWSTORM RC)

and HYVES are two exceptional transmitters, who inspire not only the lovers of R&W Holsteins. SNOW RC is a Snowman son with outstanding type and high longevity from the well-known Dutch Apina Pietje cow family. He is the highest German RC bull, which also makes him special among the Snowman sons. The very popular high-type bull HYVES is currently Nr.2 of the German top type list of R&W genomic bulls. He comes from the successful Grietje family from the Netherlands. Both SNOW RC and HYVES are used as sires of sons and should not be missed in any breeding program.

Dear Holstein enthusiasts,

We proudly present to you the Summer Edition of Hotspots 2012. In this issue we will feature two cow families that have influenced the global breeding industry in a big way: Braedale Gypsy Grand and Eastland Golden. We will also dig into what seems to be the latest fashion in Holstein breeding: Polled.

Cow families like Gypsy Grand and Eastland Golden remind us of the real value of strong maternal lines, something that may be slightly overlooked with the current focus on high indexes. It is fascinating to see how different breeders in different countries and environments have developed these families and delivered very valuable genetics to so many commercial dairymen around the globe. In line with the influence of these cow families, it is interesting to imagine how big an impact the first mainstream polled genetics will have, or for some people when, the majority of commercial dairymen start asking for this trait. Will Lawn Boy eventually appear in more pedigrees than Braedale Goldwyn and Eastland Cash? An interesting thought.....

Best regards, The Hotspots Team

Braedale Gypsy Grand

Premier Canadian Cow Family with Global Impact

Sale catalogs, Holstein articles and breeder ads world-wide feature the industry's elite with Gypsy Grand deep in the heart of the pedigree whether on the topside or bottom side. The impact of this tremendous brood cow family has already been seen for several generations and nearly two decades. But with the great young cows that keep emerging and promising young Goldwyn sons getting their first proof I think it is safe to say the impact of this great Holstein family is far from over.

The Beginning

While we will work our way forward from Gypsy Grand it is important to highlight that the pedigree doesn't start there. Behind the Aerostar dam of Gypsy Grand are five more generations Very Good carrying the Sunnylodge prefix with a total of 54 Stars. The Aerostar, Braedale Moonriver Good Plus-83-3YR-JPN, was sold and boarded ship to Japan as a young cow but left behind a heifer calf by Mark CJ Gilbrook Grand named Braedale Gypsy Grand. The 2003 Canadian Cow of the Year, Gypsy Grand, was scored Very Good-88-5YR-CAN with a total of 37 Stars and two Excellent, 18 Very Good, 22 Good Plus and four Good daughters.

"Gypsy Grand was just fresh as a two-year-old when I started working as a sire analyst in 1995. She was my first cow contracted at Braedale and I got lucky this great family was in my territory. She produced good daughters and sons every flush. Today the two branches that are most prominent trace back to her two Storm daughters, Baler Twine and Second Cut," shared Julien Chabot, Sire Analyst, Semex.

Baler Twine

A second generation Canadian Cow of the Year honoree, Baler Twine

has 32 Stars of her own and the admired dam to the industry's great Goldwyn. She is Very Good-86-2YR-CAN with four Excellent daughters, 14 Very Good, seven Good Plus and just two Good. Truly the complete package brood cow her offspring have exceled in production, show ring type and genomics.

With so many high scoring, high impact daughters it is hard to focus on just one but there is no doubt that the mating of Champion on this Maughlin Storm daughter was a homerun. Gen-I-Beq Champion Bally Excellent-95-CAN 4 Star is the highest scored daughter of Baler Twine and was the Reserve All-Canadian Junior Three-Year-Old in 2007. Bally's daughter by Duplex, Gen-I-Beq Duplex Balsamy, Very Good-87-2YR-CAN is the former #1 type cow in Canada. Overall the mating of Duplex worked well on Champion Bally producing a total of five Very Good daughters.

The #3 GPA-LPI heifer in Canada following the April proof run traces back to Baler Twine through Gen-I-Beq Champion Bambi, a full sister to Bally and scored Excellent-90-CAN 3 Star. OConnors Snowman Bermuda has a GPA-LPI of +3695 and is currently being worked with at Mapel Wood Holsteins. She is the daughter of Gen-I-Beq ManOMan Bibi also a former top 25 GPA-LPI heifer in Canada. Next dam is Gen-I-Beq Shottle Barbi Very Good-88-CAN 1 Star followed by Champion Bambi. Shottle Barbi also has a son at Semex, Gen-I-Beq Brawler, sired by Baxter.

"Brawler is one of the most promising bulls at Semex to receive his first proof this summer," Chabot shared.

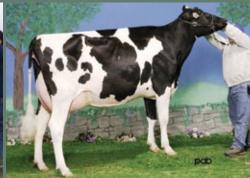

Gen-I-Beq Topside also at Semex debuted at #3 on the Top LPI Bull Report for April 2012 and is the last direct son of Baler Twine. Topside is sired by Sandy-Valley Bolton-ET and has an LPI of +2457 and is +13 for Conformation.

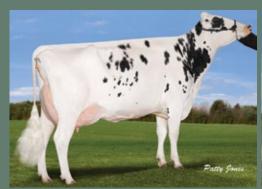

Braedale Gypsy Grand VG-88-5YR-CAN 37* Canadian Cow of the Year 2003

Braedale Baler Twine VG-86-2YR-CAN 32*
Canadian Cow of the Year 2007

Gillette Blitz 2nd Wind VG-88-3YR-CAN 35*
Canadian Cow of the Year 2011

Mapel Wood Baxter Bethany VG-85-2YR-CAN
Former #2 GLPI Cow in Canada I #18 GLPI Cow in Canada (4/12

Benner Planet Bessie GPA-LPI+3520 Former #5 GPA-LPI Heifer in Canada I #10 GPA-LPI Heifer (4/12

Another great Shottle daughter of Champion Bambi is Gen-I-Beq Shottle Brie Very Good-85-2YR and owned by Ladies First Holsteins. Brie has a Very Good-88 Bolton daughter that they are currently working with as well as high heifers by Iota, Observer and Super.

Former #1 GLPI, Bombi

Gen-I-Beq Shottle Bombi, the former #1 genomic cow in Canada is also a daughter of Champion Bambi Excellent-90-CAN 3 Star.

"The Bombi cow has and always will be a cow close to my heart. She has it all - sire stack, great type, fertility, genomics and the will to milk," shared Len Vlis, Mapel Wood Holsteins.

There is no doubt that Shottle Bombi has impacted the tremendous herd at Mapel Wood and has made her mark on the industry. Mapel Wood Man O Man Brooke is Bombi's highest genomic daughter with a GPA-LPI of +3198. Snowman Bombi is another exciting heifer at Mapel Wood direct from Bombi with a GPA-LPI of +3149.

Len Vlis, Mapel Wood

"Four of the top 12 heifers in Canada have Bombi genes running through them."

Mapel Wood Baxter Bambi Very Good-87-2YR-CAN is Bombi's highest scored daughter and has a Man-O-Man daughter at Mapel Wood with a GPA-LPI+2809 and is due in October to Epic.

"She has seven milking daughters with six being Very Good as twoyear-olds and all have the capability to have high testing genomics, even with Million in the pedigree," Vlis said.

Bombi's Man-O-Man son, Mapel Wood Boulder, has a GPA-LPI of +3178 and already has a son tested over +4200 GPA-LPI with a DGV of +4500. "We are excited about her daughters but maybe the excitement is with her sons," Vlis commented. Mapel Wood Brewmaster, Bombi's son by Garrett was tested in France and is one of the highest bulls on French base.

Mapel Wood Million Bombi 640 is another Very Good daughter of Shottle Bombi and is now owned by RockyMountain Holsteins and La Ferme Gillette. An exciting young cow to be working with, she has daughters selling on the Gillette Visions Sale this fall. Bombi was fresh again fall 2011 and sold to Siemers Holsteins, Newton, Wis.

Sherry Siemers, Siemers Hols.

"She is a medium sized cow but built beautifully. While I was traveling making sale selections she was the only genomic cow that made my hair stand up, she is just so beautiful."

Nicely adjusting to her new home, Bombi scored Excellent-92 94-MS at the age of six. The Siemers family is certainly excited about working with this new addition.

"We plan to utilize Bombi the best we can in our breeding program. She is just a beautiful cow that is capable of producing really beautiful offspring that have genomics. Bombi currently has pregnancies from Lexor, Meridian, Daddy and transfers by Supersire. We will be merchandizing from her in the near future." shared Sherry Siemers.

Mapel Wood Baxter Bethany, the Emerald-Acr-Sa T-Baxter daughter of Shottle Bombi calved in April 2010 at Benner Holsteins and has been in the spotlight ever since. She debuted at #8 on the Top GLPI Cow List in December 2010 and was as high as #2 in August 2011. Bethany is scored Very Good-85-2YR-CAN with an outstanding two-year three-month record of 18,745 kilograms of milk in 365 days with 871 fat and 647 protein.

Don Penner, Benner Holsteins

"We have enjoyed working with this family, they have tremendous udders and a tremendous will to milk."

Bethany has daughters by Planet, Alexander, Lauthority, Snowman and Atwood. Benner Planet Bessie, Bethany's most popular daughter to date, sold on the 2011 RockyMountain High Sale for a commanding \$71,000 to Canadian Agriculture Logistics and was the #1 GPALPI Planet and #5 GPA-LPI Heifer in Canada at the time. The #5 GPALPI Heifer in Canada following the April proof run is Benner Lavaman Boo Boo, the January 2012 Gen-I-Beq Lavaman daughter of Planet Bessie. This tremendous heifer from the Bombis sells on August 4 in the International Intrigue Sale at Butlerview Farms.

Over the past two years, the Bethanys have sold extremely well demanding top prices on North America's most elite sales. Benner Snowman Basanti, GPA-LPI +3046 topped the Prairie Classic National Convention Sale in Brandon, Manitoba this past April selling for \$48,000 to the partnership of Benner and Pennview Holsteins. Her maternal sister, Benner Lauthority Bash, the #1 Lauthority in Canada and the #2 worldwide sold in the same sale for \$14,500. Bethany's only other Snowman daughter, Benner Snowman Brinkworth, has a GPA-LPI of +3203 and sold for \$71,000 in the TAG Genomic Power Sale in November 2011 to Butlerview Farms. Benner Atwood Bentley, Bethany's only Atwood daughter sold in the 2010 International Intrigue Sale for \$26,000 to Ferme Jeanlu and Comestar Holsteins and was just fresh in May. Bentley's daughter by Shamrock, Comestar Benezra Shamrock, GPA-LPI +3339 is the #25 heifer in Canada following the April run and sold for \$57,500 in the April 2012 Genomic Giant Sale.

Bethany is proving to be quite the transmitter for the herd at Benner Holsteins and they look forward to continuing to work with this branch of the Gypsy Grands. Bethany is currently being housed at Boviteq and being flushed IVF. She has embryos that will sell on the Holstein Plaza Online Embryo Auction and inquiries are welcome.

The Goldwyn Impact

It doesn't matter if your herd is striving to breed the next supreme champion at Madison, production record holder or genomic giant likely Goldwyn has left his mark in your breeding program. The Shoremar James son of Braedale Baler Twine quickly rose to the top getting his proof early with impressive numbers and limited semen. Across the globe, Goldwyn was producing daughters that exceled in all types of environments. They were distinguished by their beautiful well-attached udders and long dairy frames, he was an instant sensation!

Goldwyn was as high as #2 on the LPI list in Canada and over eight years later is still in the Top 25 holding strong with an LPI of +2039 following the April run. In the U.S., his index has also held firm with over 52,500 daughters in his proof and keeping him among the Top 50 proven bulls for GTPI at +1985 and among the Top 20 proven bulls for type at 3.07. However, his type credits go way beyond the numbers on paper. Since 2008 Goldwyn has captured the Premier Sire title at World Dairy Expo and at the Royal Winter Fair since 2009. He has had 101 daughters nominated All-American and in the past three years a total of 95 nominated All-Canadian. In Canada alone Goldwyn has sired 732 daughters classified Excellent and 9,726 Very Good. While the remaining straws of Braedale Goldwyn are classified to many as liquid gold, the sons and grandsons of this industry great are already making headlines. If you didn't get a chance to use Goldwyn early there is ample opportunity in some of the very promising sons like Destry, Fever, Gold Chip, Atwood, Goldsun, Jordan, Guthrie and Dempsey to name a few.

2011 Cow of the Year, 2nd Wind

Baler Twine's full sister, Braedale Second Cut Very Good-86-CAN 23 Star started the global phenomenon of 2nd Winds at La Ferme Gillette, Embrun, Ontario.

"Louis purchased a first choice Wade from Gypsy Grand back in 1997

in the Alta Genetics Sale. When he went to Braedale to make the choice he fell in love with a little calf that was tied up in the alley behind the cows. He asked Mark Beaton what that calf was and Mark told him it was a female Storm from Gypsy Grand. Louis asked if he could have her instead of a Wade which the Beatons agreed to," shared Eric Patenaude when asked how they acquired Second Cut.

The Blitz mating on Storm Second Cut was a decision by the team at Ferme Gillette and resulted in six heifer calves. Select Sires was interested in a bull but unfortunately there was not any.

From those six heifer calves developed Gillette Blitz 2nd Wind Very Good-88-CAN with an impressive 35 Star brood cow status.

Eric Patenaude, Ferme Gillette

"We started realizing that Wind was for real when her daughters were calving out and we started seeing a pattern of incredible udders and scoring Very Good as two-year-olds.

"Out of 17 daughters in milk, 15 are Very Good. But what really hit us is when she put out bulls like Windbrook, an FBI son which nobody was talking about because he never had the top genomic numbers as a young sire and came out with awesome numbers. Even Wildthing and Willrock, who would've thought Marion could have two bulls debut at #5," Patenaude said.

This past April, 2nd Wind was recognized with Canada's most prestigious award, Cow of the Year at the 2012 National Holstein Convention in Brandon, Manitoba. 2nd Wind is undoubtedly making an extreme impact to the Holstein breed with five Class Extra sons including Gillette Windbrook, Gillette Windhammer, Gillette Stanleycup, Gillette Wildthing, and Gillette Willrock and all among the Top 50 LPI bulls following the April 2012 proof run.

2nd Wind daughters are also making quite a splash in the pool of elite Holstein genetics topping the GLPI lists and continuing to produce the next generation of genomic greats.

One of Bolton's greatest daughters and the winner of Hotspot's "Your Favorite Bolton Daughter Contest", Gillette Bolton 2nd Sleep Very Good-89-CAN is without a doubt 2nd Winds most popular and sought-after daughter.

"I think our favorite branch of 2nd Winds is Bolton 2nd Sleep and then her daughter Planet 2nd Snooze. At the moment it's definitely the branch we are mostly working with," Patenaude shared.

When it comes to mating decisions for the family, Patenaude explained that they try to just use the best bulls available, either young genomic or proven, and they have been fortunate that the contracts have just come along.

Every special cow family has its own unique set of characteristics and the 2nd Winds are no different. "The 2nd Winds have high wide rear udders, good feet and legs and are balanced cow but the quality of udder is what really made the family," shared Chabot. "I think this pattern will be seen through her bulls as well. Also 2nd Wind doesn't have the highest genomic numbers out there but today I think people are realizing that the family has proven itself. When her daughters calve out and get their official proof they shoot right up the GLPI list, not only that they are also beautiful individuals to work with," Patenaude said.

Looking ahead the team at Ferme Gillette is pretty excited about what's coming up. "The matings we have done at Trans Ova will give us (personally) a pretty good insight about how genomics will turn out," Patenaude said.

After spending the last two years at Trans Ova, 2nd Wind has all sorts of offspring coming and from a variety of sires both genomic and proven from Shamrock and Evolve to Aftershock and Observer and proven sires like Lauthority, Jordan, Garrett, Super, Sudan, Iota, Levi and Hero.

The 2nd Wind family is certainly having a huge impact on today's Holstein gene pool and because of the family's continued success generation after generation the impact on the breed will surely be felt for years to come. The family of Ferme Gillette is excited to invite Holstein breeders and enthusiasts to their Gillette Visions 2012 Sale and feel it is a great opportunity to share in their success.

New York Holstein breeder Green and Gold Genetics is already finding success in a purchase from the 2nd Winds. Gillette Roumare Winter Star the #1 GLPI Roumare in Canada was successfully purchased privately by Green and Gold Genetics this past winter. Winter Star is scored Very Good-87-2YR-CAN and is the daughter of Gillette Elegant 2nd Wind Very-Good-87-2YR followed by 2nd Wind herself. Embryos from the Roumare have already been exported and they are excited to continue flushing and working with this tremendous 2nd Wind granddaughter!

Gypsy Grands Worldwide

North America has certainly been spoiled with the prominence of this great brood cow family but with the export of embryos and semen the dominance can be felt and measured worldwide. In the UK where there are several Baler Twine daughters a few sort themselves to the top. Woodmarsh Morty Gypsy Queen is scored VG-88-UK and sired by Stouder Morty-ET; her daughter, Woodmarsh Bolton Gypsy Queen 2, is scored VG-87-UK and is currently the #3 GTPI outcross cow in Europe with a GTPI of +2203.

Still, the influence of the family overseas has primarily been through the success of the Gypsy Grand bulls, which have proved incredibly popular. In the UK no less than eight of the top 10 £PLI cows are sired by Goldwyn and index is not their only strength; at last year's National Holstein Show two of the four section champions and three of the four reserve champions were sired by Goldwyn!

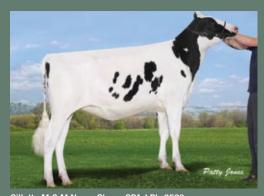

As the branches continue to develop and the Gypsy Grand family continues to leave its imprint one thing is certain, this family is truly among the greatest in the world! The deep Canadian roots and careful matings generation after generation are now allowing this family's elite Holstein genetics to reach all corners of the globe and impact the progress of this great breed.

Six of the Top 25 GTPI heifers from the April run carry the De-Su prefix! The #1 GTPI female, De-Su 1438-ET, with a GTPI of +2734. 1438 is a Shamrock daughter from the Clear-Echo HershI D Rac-822 family. Her full sister, De-Su 1439-ET, is the #2 GTPI Heifer at +2645.

K-Manor Holsteins www.holsteinplaza.com/k-manor

K-Manor B Mistaken-ET is among the Top 25 GTPl outcross (no Goldwyn, Shottle or Oman) females in the U.S. Mistaken has a GTPl of +2331, +676NM\$ and +3.46T. She is the Bookem daughter of Green-Corner Bolt Mattie-ET VG-87-2YR (pictured) and backed by the Lead Maes!

Farnear Holsteins www.holsteinplaza.com/farnear

Currently working with the high profile Planet daughter from Crimson, Larcrest Case. Case is NOW VG-86 VG-MS and has a GTPI of +2330 making her the highest Planet daughter of Crimson and the #8 GTPI Cow from the Locator List (scored GP-83 or higher).

Bosside Holsteins www.holsteinplaza.com/bosside

Holstein Plaza welcome new member Bosside Holsteins, John and Tineke Boschma family. Bosside is currently working with several high profile donors in their new tie-stall barn where they focus on their true passion... genomics and breeding top-quality Holsteins.

Crasdale Farms www.holsteinplaza.com/crasdalefarms

Crasdale Farms invites breeders and Holstein enthusiasts to the Heatwave Sale to be held Friday, August 10 at the farm featuring the Elite of Crasdale plus other high calibre consignments from across North America.

Larcrest Holsteins www.holsteinplaza.com/larcrest

There is only one Crimson and this very special Ramos daughter moved back up the list as the #13 GTPI Cow on the Locator List (scored GP-83 or higher) following the April run. Watch for more updates as Crimson is due back this summer!

My Ladys Manor Farm www.holsteinplaza.com/my-ladys-manor

Ladys-Manor RD Gracious-ET a full sister to Grafeeti (Freddie x Goldwyn Grace) is now Very Good-87 88-MS at 2-06. My Ladys Manor is also home to the #1 GTPI Grafeeti daughter, Ladys-Manor Graf La-La-ET. La-La (Grafeeti x Glen-Toctin Super Lavena) has a GTPI of +2557.

Pineland Farms www.holsteinplaza.com/pineland-farms

CONNECTING COMMUNITY WITH THE LAND

Holstein Plaza welcomes new member Pineland Farms. Fifty percent of the Pineland herd is from the Trina family with over 10 Excellent females and six 10 generation Excellent groups. In addition to the Trinas, the herd includes outstanding individuals from several other nationally known cow families.

WITH THE RIGHT TOOLS, ANYTHING IS POSSIBLE

Many breeders recognize how the reproductive tools of In Vitro Fertilization and Reverse Sorted Semen make a powerful combination. IVF can work well on virgin heifers, pregnant females, and/or problem donors. Using Reverse Sorted Semen with IVF can allow you to produce pregnancies of the desired gender from almost any bull, which can make a huge impact on your operation's profitability.

Breeding Management 5 | POLLED

Horns removed by polled sires

Horns or no homs? It's a serious question for Holstein breeders with the amount of polled sires available at the moment. Animal welfare organizations are enthusiastic and Al centers also have an emphasis on creating bloodlines without homs. Is it a 'gadget' or a trend? Hotspots gives an overview:

Dehorning calves is not the most pleasant job on a dairy farm. You have to anaesthetise the young calves, take the horns out and hope the calf recovers quickly. In addition, it costs money (estimates put this at between €10 and €50 per calf), compromises growth rates and causes trauma. Although necessary in modern dairy farming, dehorning is not an animal friendly treatment but an artificial intervention and therefore included in political agendas.

Animal welfare

As animal welfare organizations all over the world voice their concerns around dehorning calves, the dairy industry has answered with the huge amount of young polled bulls now available. It looks like polled breeding has outgrown its pioneering niche status at the right time. Consumer opinion often contributes to a change in direction within agricultural practices, but with polled genes we seem to be ahead of public demand. Ask society what they think of polled animals and they will answer that the animal should be as natural as

possible. Dehorning doesn't fit into that picture, but breeding for polled also sounds 'unnatural'. People quizzed in an opinion poll thought it sounded more like genetic manipulation, therefore positive communication that the polled gene is a natural characteristic in the cow population is essential.

A century of polled

Breeding a polled animal is not new. Genetically, a hornless state is already over 100 years old. In the Holstein herdbook the first administration recording polled animals is found in 1905. In the Netherlands, public records show the presence of polled even further back. One book describes a show in 1886 with a special category for polled animals, but for Dutch farmers at that time, cows without horns were not wanted as the horns were used to brand registration numbers in. The horns were also used to tie up animals. Knowing this, it is logical that polled animals were considered undesirable and eventually almost disappeared in the breed.

Breeding is easy

Breeding for polled is actually quite easy. Polled is a singular gene with dominant transmission (see 'How does polled genetics work'). If you keep using polled genetics it is only a matter of time before the whole breed will be polled - in breeds other than Holstein, for ex-

Marco Hellwig: "Polled is commercially interesting"

"In Germany there is a lot of talk of banning dehorning practice, therefore A.I.'s are very interested in buying young polled bulls." Marco Hellwig is a Holstein breeder, buys high quality embryos and sells the calves. In the Holland Master Sale he is offering an exclusive calf: a polled and red heifer out of the Barbie family. "It was not my first goal to breed a polled calf, it is more important that the combination is right. But in this case, Colt P was a good match, "the fact that he is polled gives something extra". From six embryos he got five calves: two were polled and one of those two was also red and a heifer calf. "And with a very high genomics", Marco says, "I was very lucky." A full red brother to the sale calf went to A.I. "He wasn't polled, but still interesting enough. That is what I mean - don't make a combination only because the bull is polled, but make a combination that looks right." He knows that you need more calves on the ground if you only focus on polled. "If you ended up with horned animals, you have nothing. The risk on focusing only on polled is too high." Still, Marco thinks polled breeding

will have a good future; "regulation is in the air". He also has some embryos from Ladd P and Magna P on the way, "I buy these embryos because they are commercially interesting, polled animals are expensive."

The mentioned calf is RZH Brescia-P-Red - US 4/12 GTPI +2177 / PTAT +2.99 (#1 R&W heifer, #3 Polled heifer Europe) Pedigree: Colt P x VG-86-CAN 2yr. Alexander x VG-87-CAN 2yr. Mr. Burns x VG-88 Shottle x Regancrest Barbie - see picture.

Mathias Leissen, RSH Germany: "Every year 3-4 polled bulls"

Like every other A.I. organization, RSH in Germany has a number of polled sires available. One of their most popular ones at the moment is Parma PP, a red son of Mitey P (s. Goldwyn) out of Rae and the Roxy family, purchased through the Online Elite Bull Sale (www.onlinebullsale. com). "There is a huge demand for Parma; because he is homozygous polled, every calf will be hornless", says Matthias Leisen. "Because of the Schmallenberg virus, we can't export his semen to the U.S., otherwise he would be sold out easily." Leissen notices that farmers are using the polled bulls more often "with the restriction that these bulls must have a breeding value which can compete with other bulls. Then they sell themselves." To breed such a bull is the challenge for the A.I. organizations. "Over the last year we have tested 40 to 50 potentially polled young bulls on genomics, only three have passed the test. They will be accepted with slightly lower breeding values or less milk because they have extra value with polled, but still they need to be competitive, you don't want a 'compromise' bull." The strategy of RSH is to breed the polled gene into strong, reliable and popular cow families. "We need to make the polled bloodlines wider, therefore we mate good cow families

with polled bulls. Still, it takes two or three generations to find that one special homozygous bull like Parma." This Mitey P son has already been used as a bull father. "Yes, a little bit. He is good in type and durability, but needs support in milk yield. We try to mate him with the best." This way RSH hopes to releases three to four polled bulls every year. "Coat color is not an issue."

ample the Hereford and Black Angus, the number of polled animals is substantial. Over the last few decades, a small number of farmers put a lot of effort into breeding polled Holstein animals, so the polled gene stayed 'alive' but within a small population. The result was very few bulls with average or low breeding values for commercial use. This is now changing and the use of genomics makes this even easier and certainly much faster.

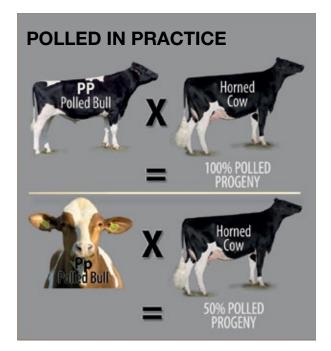

The turning point for polled genetics was without a doubt, Aggravation Lawn Boy P-Red Excellent-94. He managed to gain interest from Holstein breeders all over the world thanks to his high breeding values in combination with the polled gene. His impact is even more impressive if you know that it was very difficult to get A.I.'s interested in testing this son of Dudoc Bacculum, then an unproven sire, so breeder Bob Feldwich from Aggravation, Ohio USA started a Lawn Boy syndicate to get the bull tested.

Lawn Boy inherited his polled status from his mother, a VG-86 Manfred daughter with high components. His grandmother was a VG-87

red carrier Aerostar daughter who passed the 200.000 pounds of milk mark. The source of the polled gene was his third dam, a daughter of Larry-Moore Crosby B Poll-Red. Thanks to this polled status, Lawn Boy became very popular and used as a sire of sons, with his polled daughters becoming bull mothers.

Expanding bloodlines

The biggest challenge now for polled breeding will be to widen the bloodlines to provide alternative polled sources which can be combined to create homozygous polled lines where the polled gene will be transmitted to all progeny. AI organizations are fully aware of that; prices paid for polled animals with a high genomic test are rising, so it means that farmers can expect more polled bulls in the future. A smart breeding strategy is to use high polled bulls on cows with high genomics. The goal is to breed offspring which will have the best of both worlds: high and desirable genomics, including the polled gene. If this mating pattern is followed, it will only take a few generations to get 'fresh' blood and a top bull! The story of polled breeding will be continued...

- Sire housing possibilities offered
- Semen can be exported World Wide
- Highest health status facilities

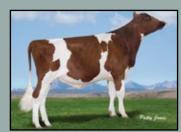

Sire Lodge Inc. is located in beautiful Southern Alberta, Canada close to the Rocky Mountains and not far from the Montana, U.S.A border. The facility was originally built in 1975 and was designed to provide optimum bull care and safety for the handlers. Purchased by Sire Lodge Inc. in 2002, the facility can house up to 300 bulls in group and individual housing. Inspected and approved by the Canadian Food Inspection Agency, Sire Lodge Inc. is an IBR free facility that exports semen worldwide. Working with a number of Canadian and International clients, Sire Lodge provides optimum care and semen production in a secure facility with minimal risk.

International meeting point for dairy farmers!

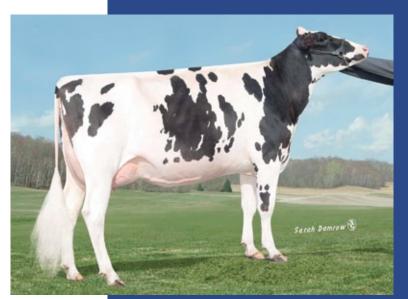

Diamond Genetics is your source for the World's best Holstein Genetics

Diamond Genetics has always a wide range of World Class embryos available. Currently we will have embryos available out of the World Class cows below. Do not hesitate to contact us for more information.

SUPERSIRE x Nova-TMJ Shottle Evelyn VG-86-USA 2yr.

VG-86-USA 2yr. Shottle x Nova-TMJ Golden Edie VG-87-USA 2yr. x UFM-Dubs Eroy VG-87-USA 2yr.

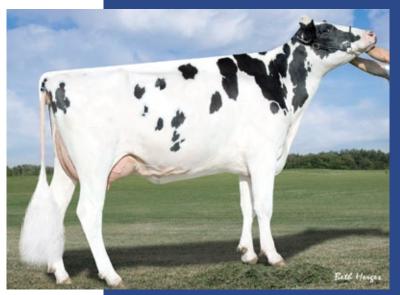

The new star of the family. Extremely reliable pedigree as a Shottle x Goldwyn and having GTPI +2332 / PTAT +3.53! Which makes her the #2 GTPI Shottle cow in the World and ranks her still in the American GTPI Top 10. Her Bookem dtr test at GTPI +2463!

Her mother is the full sister to Echo, which is the mother to Maxim in Germany. Maternal sister UFM-Dubs Sheray VG-88-USA is famous World Wide is mother of many high ranking progeny.

Nova Shottle Evelyn VG-86-USA 2yr.

LITHIUM x Sully Planet Montreal VG-87-USA 2yr. DOM

VG-87-USA 2yr. Shottle x Sully Shottle May VG-85-USA 2yr. x MS Sully Uman Muetze EX-90-USA

Sully Planet Montreal VG-87-USA 2yr. DOM

Top ranking GTPI cow in the American GTPI Ranking with GTPI +2248 from the fantastic Sully Shottle May!! Montreal is the mother to Movierush @ Select Sires (s. Robust) with GTPI +2441.

Montreal is the maternal sister to McCutchen (#3 GTPl bull) and Mayfield @ Select Sires. Her full sister is the mother to Meredian @ Semex and Mandora @ CRI. All these bulls are in the Top 25 for GTPl.

Very exclusive family for Europe.

Diamond Genetics

Diamond Genetics always have a wide range of very interesting embryos. Do not hesitate to contact Diamond Genetics and ask for the most up-to-date embryo portfolio.

MASCALESE x Muri Planet Popsy VG-87-IT 2yr.

VG-87-IT 2vr. Planet x FX-90-IT Bolton x VG-85-IT 2vr. Mtoto x Bench Eddie x Storm x Ked Juror

Popsy is the #1 GTPI Cow in Europe, #2 World Wide and the #1 Outcross cow in the breed!
Watch these incredible numbers:

US 04/12 GTPI +2463 / NKM \$ 903 / PTAT +2.73 CA 04/12 DGV LPI +3512 / Conf. +13

Her first tested dtr is the #1 GTPI End Story is by far the #1 GTPI End Story in the breed with GTPI +2300.

Complete new cow family with deep background. Trace back on a Canadian imported cow.

Muri Planet Popsy VG-87-IT 2yr.

Genervations LATIMER x Bertaiola Alx Lidia VG-87-NL 2yr.

VG-87-NL 2vr. Alexander x VG-86-NL 2vr. Bolton x EX-90 Boss Iron x VG-IT Mtoto x EX-91 Astra x VG x VG x EX x VG x V

One of the very first embryos of Genervations LATIMER (Freddie x Comestar Goldwyn Lilac VG-89-CAN 4yr.), the #2 Freddie World Wide, GTPI +2459!

Dam to the embryos is Bertaiola Alx Lida VG-87-NL 2yr, the #1 GTPI Alexander dtr in Europe (GTPI +2160) and the #2 GTPI Cow in Europe with no Shottle, Goldwyn, Oman or Planet in the pedigree!

Her Snowman sister sold for € 40.000! Goes back on a deep Italian cow family with several successful showand brood cows in the pedigree.

Bertaiola Alexander Lidia VG-87-NL 2yr.

The Eastland Golden Cow family

"Golden Opportunities.."

It was the Dutch Etazon program that first introduced the US Latuch Laurie Golden family to Europe and at Eastland Holsteins, the Netherlands, the family achieved their first big European successes. Now spread across the globe this family is as alive and kicking as ever and is offering many breeders and sire analysts great satisfaction. The Goldens offer lots of opportunities ready for you to harvest!

Latuch Brothers, Pennsylvania, US

The Goldens originate from a deep cow family at Latuch Farm in Rockwood, Pennsylvania, USA. Brothers Roger and Dave Latuch developed this 'L' family for years and with the arrival of a Nugget x Penstate daughter, Latuch Laurie Golden VG-85, the European sire analysts found their way to this breeder herd. The Etazon program, managed at the time by Jacob Chardon, wanted to work with high % protein Nuggets and the Latuch family has also marketed a number of bulls to Japan from this 'L' line. Latuch Lexus and Latuch Blackstar Samson have done well for HLIA and Genetics Hokkaido respectively. Today the branches from the same EX-92 Penstate daughter produce high g TPI's. Latuch Freddie Lewis at Genex -CRI is at 2287 gTPI and is 10 generations away from a dominant Wayne, a maternal sister to the Nugget. And Latuch Garrett Laramie, he is 2360 gTPI at ABS Global. Roger Latuch says: "We have done ET and selective matings for over 25 years on the family and it has paid off. We now have 30+

animals contracted and several high genomic young females that often trace back to the Aerostar Linda VG-87 cow, a great granddaughter of a Wayne sister to the Nugget". However, right there in the late eighties, the Dutch decided to purchase Penstate Laura's VG-85 Nugget daughter. This proved to be a great decision: her Cleitus embryos got it all started in the Netherlands as the resulting female out performed anything else in the Eastland herd in Holland!

Golden's luck

The somewhat older readers of this article will recognize that the nineties can be seen as an era in which speed, through shortening the generation interval and use of young sires, was one of the most common features in progressive Holstein breeding programs. It was also recognized that the highest indexing females resulting from US and Canadian embryo imports should be used intensively and at a young age. Often, this rush has not brought much. Indexes often had lower reliability levels and were not as complete as they are today. The 'L' family at Eastland however has been able to handle the pressure because the Cleitus Golden heifer was lucky enough to be flushed to two of the breed's greats as a virgin: Skalsumer Sunny Boy and To-Mar Blackstar!

Sunny Boy and Cash

When Eastland Golden came into heat as a virgin, the Oosterink brothers of Eastland Holsteins, straight away started using Sunny Boy, the brand new nr. 1 bull in Holland. When the bull calf Eastland Cash was born in February 1991 they thought his full brother, by the name of Casino, was a much better bull. However it was Cash that became the moneymaker for owner CRV. Casino never got any further then

Cash is the bull with most 100.000 kg + cows in Holland

his initial group of test daughters but Cash now has an unbelievable 172.500 daughters in his proof. Over 55.000 daughters are milking abroad, from which 21.000 are housed in the UK and Ireland alone. Eric Elbers from CRV confirms that CRV sold 1.2 million straws of semen of which over one third were exported to 49 different countries. Breeders expecting high type were disappointed, breeders that needed trouble free and long lasting cows were happy and wanted more of these 'Dutch genetics'. Cash his daughters did proved to be very durable. He tops the lists of sires with NL daughters over 100.000kgM. Both in 2010 and 2011. And at Eastland, Cleitus Golden VG-88 herself lived up to the age of 16 yrs!

From Gala to Glenda

Sunny Boy turned out to be a breed great and so did Blackstar. East-

Terbeek 7856 EX-90-NL 16.000 in 305d Sold in the Halles I

land Golden VG-88 was also bred to him as a virgin and the resulting calf, Eastland Gala, was a fantastic individual. Very much a Blackstar type wise with the production that was so typical of the cow family, Eastland Gala classified EX-90 and she was bred to many bulls that topped the charts in the nineties. Amongst them was Etazon Laudia

Frans-Jan ter Beek, NL

"The Glenda's have done all a breeder can dream of. It is a family with hardly, if any, misses"

Lexus. The resulting bull, Eastland Figaro EX-94, became one of the first sales toppers for Cogent UK. Eastland Glenda VG-86 by Mascot was born from her maiden heifer flush and in turn flushed as a maiden to Etazon Celsius. The resulting bull, Eastland Festival, was a phenomenon production wise. However, his type pattern was weak, and did not meet the international market demands. As a first calver Glenda VG-86 was flushed to Lord Lily. That mating doubled up on Blackstar and DID work. The resulting heifer, Molenvliet Glenda VG-87, was a BIG hit!

The Glenda's today

The cows behind Emeraude have been a very successful branch of the family with a top Genomic heifer tracing back to Toulouse. Dam to the successful Shottle son Avous @ Dynamis (ISU +16) and the cow The Molenvliet Glenda VG-87 heifer was purchased as an embryo by Kees van Schaik at Ijsselstein in the Utrecht area and his dreams came true with this very fancy Lord Lily daughter after she gave birth to

daughters by different bulls. In South Africa Spock embryos from her VG-85 Holim Boudewijn daughter produced an EX cow. Today this Spock daughter is the dam of one of the most interesting new young proven sires in that country named Taranaki, by Goldwyn and his full sister classified VG-88 in the herd of Mr Boet Reinecke. Delta Herald embryos were also marketed and Alta Genetics in Holland tested a great VG-87 Herald daughter from her. From the Herald a VG-87 Timlynn Adam daughter was born in the herd of TerBeek Holsteins and this Adam is one of the all-time favorites of Frans-Jan and Sascha

Paul Miller (Shanael Holsteins)

"The Golden family are the best we have worked with, showing a true willingness to milk"

ter Beek, in Muiden, the Netherlands. When Glenda was mated to breed greats like Shottle it seemed the sky was the limit. Four resulting daughters classified VG as first calvers. One of them, now EX-90 and selected for this year's NRM Show as a third calver, sold for € 22.000 at the Holland Masters Sale 2008 to Twin Genetics in Dalen, The Netherlands. Another one is now VG-88 as a second calver. These Shottle Glenda's are amongst the best Shottle's in the Netherlands today. The highest g TPI member of the family is a fancy, springing Man-O-Man from Shottle Glenda 7340 VG-88, a full sister to Alta's g TPI and g LPI topper TerBeek AltaGhost. Frans-Jan says: "The Glenda's have done all a breeder can dream of. It is a family with hardly, if any, misses. They are great looking, easy to manage cows. I do want more of them so I continue to flush the best ones".

The Holland Masters Sale and the Glenda's.

Eastland Golden, Glenda and Gala were moneymakers for owner Eastland Holsteins in the nineties. In the following decade the Shottle's from the Adam from the Molenvliet Glenda line grossed good money for owner TerBeek Holsteins. In 2008, TerBeek Shottle Glenda 7856, now EX-90, was auctioned for € 22.000 and went to Twin Genetics in Dalen. She was a prolific flush cow and also provided the Meppelink family with a good return on investment. So did the VG-88 Bolton from Shottle Golden for Shanael Holsteins in the UK.

This year's Holland Master Sale will auction the just fresh 2186 g TPI Man-O-Man daughter from Shottle Glenda 7340 VG-88, the full sister to AltaGhost with 2224 g TPI. This Man-O-Man also has a DGV of +3140 LPI and is +16 for conformation! She ranks in the top g LPI animals in Europe and provides a Golden opportunity. She could be the money making Glenda this decade!

Terbeek 7856 EX-90-NL Sold in the Holland Masters Sale '08, now EX-90

RED Glenda's

An O-Man daughter straight from the VG Herald from Molenvliet Glenda VG-87 was one of the fanciest O-Man's in the Netherlands. From this line TerBeek Holsteins also bred some really nice Red and White's. They flushed O-Man Gina VG-87 to Poos Stadel Classic-RED and got a rare RC Glenda: TerBeek Glenda 2703*RC VG-86. She was done to Delta Fidelity-RED and her Red and White calves in Holland and the UK are now in calf heifers and they look awesome! There are also R&W bulls from the Classic awaiting proofs in Holland and the UK.

Glenda's in Northern Ireland

A maternal sister to Molenvliet Glenda VG-87 arrived as an in calf heifer to the well-known Ballycairn herd in Northern Ireland. Andrew McCollum remembers their purchase very well: "This Gibbon from Eastland Glenda did really well for us. She classified VG-86 in first lactation and made it to a 4* brood cow despite being bred to bulls like Delta Webster and Ricecrest Brett. Her best daughter was sired by Brett. This one went EX-92 2E and produced almost 14.000kgM with 3,2%f and 3,2%p in her 2nd lactation. Another daughter by Jocko Besne classified EX-90 and this Jocko is the granddam of Ballycairn Ramos Glenda EX-90, probably the best Glenda we have today. We have a Burlane Tennyson daughter fresh from her and we look forward to further developing this line. From a VG-85 Bo-Irish Alton Glenda we have a Leko son now in test for genomics at Genus ABS. The family seems to transmit high volumes of milk with usually lower fat% but protein% just as high or higher" Andrew says. "They are fantastic producers with sometimes a bit more udder volume but they do have great udder texture. The Glenda's have done really well for us and you will find many in our herd today".

Andrew McCollum, N-IE

"The Glenda's have done really well for us and you will find many in our herd today"

Goldens in the UK

Eastland Cash had some interesting full sisters as well. The best known was Eastland Golda VG-88. A really fancy Sunny Boy daughter with a super udder and born on the same day as Cash. According to Eastland Holsteins, nine of her sons made it to the bull charts, amongst them Limburger (by Lord Lily), Eastland Judge (by Luxemburg) and Jeltan Jabot (by Jabot) in France and Canada. Another full sister, born 3 years later (!), was rather anonymous for a long time. This Sunny Boy, Moet Sunny Golden A, classified VG-85 in the UK Moet herd, produced over 100.000kgM and delivered, amongst others, two EX-90 and one VG-88 Lord Lily daughters. One of the EX-90 Lord Lily's produced numerous VG and high yielding daughters, amongst them a VG-86 Roylane Jordan daughter. This Chalclyffe Roy Golden cow, again line bred to Blackstar, was bred to Shottle with Shanael Shottle Golden EX-91 as a great result. This Shottle did it all. She made 14.519kgM in 305d in her 3rd lactation and she produced

two high VG daughters to date. The best known one is Shanael Bolton Golden*TY VG-88 who was placed 3rd Junior Heifer in Milk at the National Holstein Show just two weeks fresh on her only show appearance! She is not just good looking: at 2.02 yrs she gave 16.160 kgM with 3,7%f and 3,1%p along with +2068 g TPI. Bolton Golden*TY VG-88 is a one of a kind bull mother and the best Golden so far in milk. She has also produced many embryos and has been a true cash cow for Shanael Holsteins. Paul Miller confirms the sentiments of other Golden breeders; "Shottle Golden was a fantastic cow, but Bolton Golden is another step up, the best milking animal we have ever had. The family shows a true willingness to milk, in fact she has now produced over 36,000 kgM in her first lactation after an extensive flush program and is still milking. We sold several Iota embryos from her to Semex and are delighted that two sons have been accepted by Semex Alliance Canada at over 3,000 gLPI". More fine UK Goldens can be found at Refined Holsteins and Chalclyffe Holsteins. One of these is a great Shottle from an EX-93 Riglio Juror Capri daughter. Chalclyffe Shottle C Golden EX-90 made almost 18.000kgM 3,8%f and 2,9%p in 305d as a 3rd calver! Her super Capri dam is a maternal sister to the grand dam of Bolton Golden VG-

Looking back it seems Blackstar blood and more recently Shottle have worked really well on the Golden family. Shottle improved the udders and has benefitted from the dairy frames and the fantastic production genes present in this maternal line, that in some ways is quite different from other families. The Golden family now has something to offer to everybody!

Ked Outside JEEVES

Choose your favorite JEEVES daughter

Choose your favorite daughter of Ked Outside Jeeves-ET (ABS Global, Inc.) in this issue of the Hotspots magazine. Jeeves is a son of Comestar Outside-ET and has a different sire stack of Outside x Duster x Chief Mark from the family which also produced Ked Juror-ET. His mother is one of the all-time favorite Duster daughters, Ked Duster Julienna EX-94-USA GMD DOM who had a great career at Ocean-View Farms.

Today, Jeeves is the #2 TPI son of Outside (only beaten by his full brother Jance at Shore Genetics). With 5262 daughters in his American proof Jeeves still has a TPI of \pm 1928 making him among the Top 10 for bulls with 99% reliability. Jeeves is a health trait specialist and is the #1 Productive Life bull in the breed with PL \pm 7.9 and a skyhigh DPR of \pm 1.80!

A Morningview Jeeves May-Owner Morningview Holsteins (USA)

Sourcing Genetics for the World

AMS Genetics can source embryos to fit your individual requirements.

If you want production or shine in the show ring AMS Genetics is your starting point!

EXAMPLES OF DONOR COWS THAT AMS GENETICS GENETICS IS WORKING WITH

Des-Y-Gen Planet Silk VG-87-2YR
One of the highest *RC cows worldwide

Pine-Tree 1258 Mity 4771-ET *PO POLLED granddaughter of Rudy Missy

Larcrest Catholic GTPI+2363 Snowman daughter of #13 Crimson

KHW Regiment Apple-Red EX-95 DOM Grand Champion and Million Dollar Cow

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 29 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States
