Willsbro PILOT MR and Fly-Higher MANCAVE combine modern, world-class pedigrees with exceptional genomics, both on German (RZG) and US (TPI) base. Willsbro PILOT MR, without Goldwyn and Shottle in the pedigree, originates via Willsbro Pammy VG-87 and Windy-Knoll-View Pammy EX-95 from the famous Windy-Knoll-View Promis EX-95. Via his dam Fly-Higher Bolton Misha VG-88, Fly-Higher MANCAVE goes back to the family of Hendel Durham Mitzi 1390 EX-90. This family is becoming more and more popular because of its many descendents with high genomics, both on male and female. Willsbro PILOT MR and Fly-Higher Mancave are used internationally as sires of sons.

Full of Choices.....

Elections, the world is full of them. In the Netherlands we recently had our main elections, the US is preparing itself for the next Presidential Elections, France had them earlier this year and many elections will follow. It is a wonderful thing people have the right to choose their leaders and representatives. Of course, elections are not the only moments we have to make decisions, actually, every day is full of them. In your private life and in your work. As a breeder the process of making the right decision is essential to being successful and for this you need all the knowledge acquired and tools developed over time. In breeding, and maybe also in politics, we often see that only the most recent acquired knowledge is taken in consideration for making a decision and history has learned us knowledge is easily getting thrown overboard. We would like to emphasize to keep using the o so valuable breeder knowledge and the breeder judgement skills of cows. This in order to make the right choices and decisions and to keep developing Holstein cows in the direction valued by so many dairymen across the world. In a world full of choices, breeders judgement skills and common sense should have their place right next to high tech index information. At the long run we will then develop the best Holsteins possible. We wish you much success in making your choices this next insemination season.

Best regards, The Hotspots Team

Aitkenbrae Starbuck Ada

→ Transmitting Elite Type through the Alicias and Adeens

There are few cow families that can rival the accomplishments of the Adas when it comes to show ring success and transmitting elite type. This was highlighted by the recent Impact of Ada Sale that averaged an estimated \$6,200 on 103 head all from a single bloodline. For generations, this family has dominated the North American show circuit, and as we near the big dance on the colored shavings, it is without a doubt that the next generation of Adas will be there vying for All-American titles.

Origins

Aitkenbrae Starbuck Ada was born Sept. 13, 1986, the Hanoverhill Starbuck daughter of Aikenbrae Sheik Arlene, Good Plus-80-2YR-CAN, on the Aitkenbrae farm in Holstein, Ontario. In 1989, prior to her debut on the colored shavings, Ada moved to the United States, purchased by Lawson Bennett and Hygerian Farms. Ada stood third at Madison in the senior two-year-old class behind Dupasquier Stab Winnie and Comestar Laurie Sheik. Ada moved again in December 1989 to Maryland under the new ownership of Gayridge and Kingstead Farm. The following fall, Ada was named Unanimous All-American Senior Three-Year-Old. There is no doubt that Ada was a tremendous show cow, but it is her brood cow status through the impact of her two Donnandale Skychief daughters that makes her a true legend in Holstein history.

All-American Alicia

One of only 35 registered Holsteins in North America to be classified Excellent-97, Shoremar S Alicia is the eldest of the famous Skychief daughters of Starbuck Ada. Alicia, nominated All-American five times in milking form, was the Supreme Champion of the Royal Agricultural Winter Fair in 2000. With more than a dozen excellent daughters from a variety of mating sires, there is no doubt that Alicia is the next generation brood cow. As you look through today's sale catalogs, you will find most of these lines to trace back through either

her Startmore Rudolph daughter, Cityview R Alicia Excellent-92-CAN 23* or her Durham daughters BKB Abby Excellent-95 3E DOM and BKB Amanda Excellent-92 GMD DOM.

All-American Adeen

The Excellent-94 2E DOM Ms Kingstead Chief Adeen is a full sister to Alicia and can be linked to names like Atwood, Atlee, Ariel and Autumn.

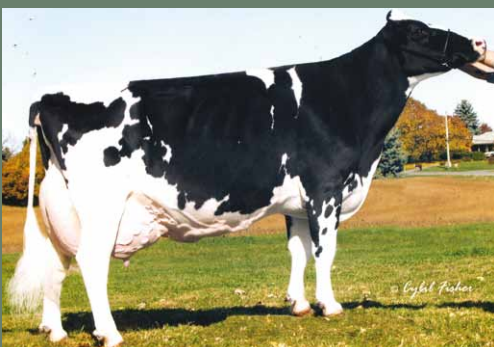

Ms Kingstead Chief Adeen was a foundation cow for several herds that had the opportunity to own her. Butlerview Farms owned Chief Adeen from 1999 until she passed away in 2011 at the age of 14, leaving behind a plethora of daughters. The legacy of Adeen has only just begun with over 30 Excellent daughters, several young Very Good two-year-olds and many left to freshen, there is no doubt in the brood cow status of this industry elite.

Jeff Butler, Butlerview

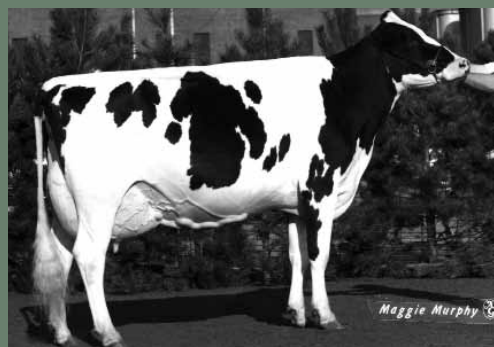

"Adeen is one of the most influential and one of the only cows in the breed with offspring over +2500 on genomics and All-American progeny."

It was the flush to Maughlin Storm early in Adeen's career that might just have been the most influential mating. It produced the Excellent-91 DOM Storm Allison, Very Good-88 DOM Storm Adeline, and Very Good-88 DOM Storm Amberlee dam of the great Durham Atlee. The mating to Comestar Lee produced four Excellent daughters (94-92-91-90), including Amlaird Lee Alice EX-94, owned by Milk-source Genetics, Wisconsin. The mating to Regancrest Elton Durham resulted in at least eight Excellent daughters scattered worldwide.

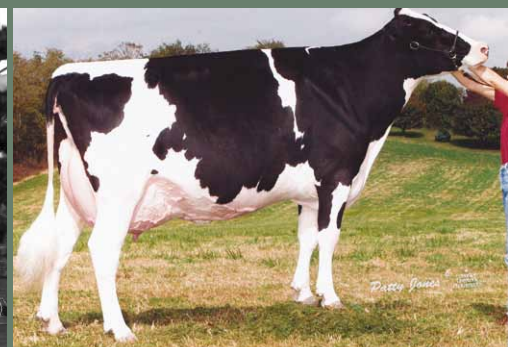

But could it be the more recent flushes to Atwood and Goldwyn that cause the family to truly hit the limelight? The five young Atwood

MD-Delight Durham Atlee EX-92 GMD DOM
Dam of #1 Proven Type Sire, Atwood and \$1.5M Ariel!

daughters scored within the past couple months are all high Very Good (none lower than 87) as junior two-year-olds. One young Atwood daughter, with a double dose of Adeen genetics, is BVK Atwood Arianna Very Good-89-2YR. Arianna was nominated All-American Spring Yearling in 2011 and named Intermediate Champion of the 2012 Illinois State Holstein Show. Watch for Arianna on the colored shavings at Madison! The demand for offspring out of this spectacular Atwood have already skyrocketed with a first choice mutually agreeable sire selling for \$29,000 on the 2012 International Intrigue Sale.

"Right now the two best young cows [Arianna and Abrianna] are her [Adeen] daughters, and they are going to be the foundation of the next generation on our farm," Butler said.

Arianna's full sister, BVK Atwood Andrea, owned by Rick Allyn, Michael Heath, and Jason Lloyd was fourth spring calf at the 2010 International Holstein Show and freshened this spring looking phenomenal. Andrea is scored Very Good-88-2YR and was the second place junior two-year-old at the 2012 New York Spring International Holstein Show and will also hit the tanbark this fall.

Atlee Impact

She stole the hearts of Holstein enthusiasts on that October day when she paraded across the colored shavings and was named reserve intermediate champion of the 2005 International Holstein Show.

"Anyone that saw Atlee that year knows she had the highest, widest rear udder in the show and it is nice to see her come through in the Atwood daughters," shared Steve Velthuis, Velthuis Farms.

MD-Delight Durham Atlee scored Excellent-92 GMD DOM is one of the industry's most admired Durham daughters. Atlee co-owner Michael Heath was working his last sale as a professional fitter, the Maryland Convention Sale, when he first fell in love with Atlee.

"Where we had the fitting chute set up, Atlee was tied just six feet away. I kept looking at the calf, liking the calf, looking at the calf, liking the calf but she was small for her age," shared Heath.

About a year later Heath traveled to North Carolina to Fosters, who bought Atlee on the Maryland Convention Sale. Priced at \$20,000 as a springing heifer, Heath took the chance on Atlee. He liked the pedigree and thought she could make money and sell embryos as long as she went Very Good-85 as a two-year-old. Another reason he took the gamble is Heath co-owned Chief Adeen as a two-year-old before she sold to Butlerview. "I called Rick Allyn to partner and he recommended Jason Lloyd and we ended up buying Atlee," Heath commented.

"Atlee stayed in North Carolina to calve and had a heifer calf. We trucked her from North Carolina to Massachusetts for their state show on one of the hottest days of the summer, but she pulled it together and won her class the following day," Heath shared. She later placed 15th in the senior two-year-old class at World Dairy Expo.

"As a senior three-year-old she was suppose to be due September 1, but we must have had a wrong breeding date. She ended up calving mid-September and the partners weren't sure if she would be ready," Heath said.

Suggesting that they didn't have anything to lose, Heath convinced his partners to send her on the trailer and if she wasn't right she didn't have to show but at least she would be looked at. Less than a week later, MD-Delight Durham Atlee was named Reserve Intermediate Champion of the 2005 International Holstein Show.

Michael Heath, Heath Holsteins

"She is worldwide known by name and I don't know how big of name she would have been if she wouldn't have gone to Madison."

Heath was also quick to credit his partners, Rick Allyn and Jason Lloyd, in the success of Atlee. From marketing, to getting her ready at the shows, to calving her out before Madison, it was a true team effort to help Atlee rise to stardom.

While her career was short, having to be put down due to cancer in 2008, her impact has been colossal. It was the golden flush to Braedale Goldwyn that resulted in the current number one proven type sire following the August 2012 proof release, Atwood and the \$1.5 million dollar cow, Ariel.

Steve Velthuis, Velthuis Farms, bought embryos from the golden flush. "I ended up with 11 embryos that resulted in three heifers and five bulls. Two of the heifers, Maple-Downs-I Goldwyn Ava and Allyndale-I Goldwyn Avery, were sold via a private sale to Poly-Kow Holsteins, Minnesota and Clayton Crest Farms, Indiana. I kept Allyn-dale-I Goldwyn Albany," Velthuis said.

From Albany, it is her two Man-O-Man daughters that Velthuis is most excited about. "They are all coming through the system with high type and very compatible production numbers too," Velthuis shared.

Velthuis SG MOM Alesia is one of the young Man-O-Man daughters of Goldwyn Albany waiting to see the classifier but already creating

demand with a high Shamrock daughter and the #1 GPA-LPI Super-sonic daughter at GPA-LPI+3490.

From the five bulls, Velthuis shared that Semex had pick of the first two and Select Sires also picked out two leaving Atwood as the one left that no one wanted. "He was right at the time of genomics and the other brothers were high enough that they didn't feel the need to test Atwood. We actually collected him before we got his genomics," shared Velthuis.

It was a conversation between Steve Velthuis and Ed Fellers that formed a syndicate for Atwood and allowed sampling. This first proof is a result of that first semen collected and sold through the syndicate and later with the cooperation of Select Sires, Atwood became the type leader and demand soared.

Steve Velthuis, Velthuis Farms

"Most people can't get Goldwyn semen so Atwood is a good replacement for those that want Goldwyn blood."

Allyndale-I Goldwyn Albany Very Good-87-2YR-CAN is only one of six Atlee 'Golden' girls in North America. Ms Atlees Goldwyn Ariel Excellent-92 was the 2009 Reserve All-American Junior Two-Year-Old and sold through the 2010 Parade of Perfection Sale in a package with sons and daughters for 1.5 million dollars. Ariel was resold through the 2012 International Intrigue Sale this past August for \$52,000, and is now owned solely by Morsan Farms, Alberta, Canada.

Ms Atlees Gold Abigail scored Excellent-91 DOM is owned by Whittier-Farms, Massachusetts and has a very exciting young Klassic Big Time daughter scored Very Good-88-2YR. Allyndale-I Goldwyn Avery Very-87-2YR is owned by Poly-Kow Holsteins and has several high daughters and granddaughters including the #10 GTPI Explode daughter, Poly-Kow Explode Amuse. Maple-Down-I Goldwyn Ava, Very Good-88, is another Atlee all-star currently on a continuous flush program at Clayton Crest Farms. And last but not least, Ms Atlee Goldwyn Arista is Very Good-88 and has been flushed extensively by owners Lloyd, Allyn and Heath with embryos exported worldwide.

Ms Atlees Shottle Aubry, Very Good-88-2YR DOM, is the only Shottle daughter of Atlee and a full sister to Aftershock at ABS Global (PTAT+3.32). "Aubrey is due in October and looks great. We are looking forward to her calving in," shared Butler.

Aubry has several high genomic daughters by Alchemy, Shamrock, Gold Chip and Epic to name as few as well as a +2190 GTPI Snowman son, Mr Aubreys Artistic and a +2384 GTPI Observer son, Mr Aubrey Observer Art, at Select Sires. Allyndale-I Sanchez Angelica is Aubry's first Very Good daughter calving at 23 months of age and scoring Very

Good-85 with a VG-MS for Passion Holsteins of Quebec, Canada. Ms Atlees Goldwyn Adeline just went Very Good-87-2YR-USA and is another daughter of Shottle Aubry owned by Allyn, Heath and Lloyd.

The Atlee times Roy mating was also a good combination as Ms Atlees Roy Autumn stole the spotlight in 2007, winning the fall calf class at the International Holstein Show and going on to be named junior champion and All-American Fall Calf. Autumn repeated in 2008 winning All-American Milking Fall Yearling and now her daughters look to be following in her footsteps.

"We own a really nice Goldwyn fall calf and a Shottle spring yearling that will be going to the Royal Winter Fair from Roy Autumn," Heath shared.

Atlee's Timlynn Adam daughter, La-Foster Adam Arlene Very Good-86 DOM, has created a unique branch of the Atlees at Regancrest Farms, Farnear Holsteins and Siemers Holsteins. At Regancrest Farms, Arlene has a Very Good-86-2YR Alexander that has been flushed with embryos exported. Farnear Shot of Adeen is the Very Good-87-2YR Shottle granddaughter of Adam Arlene being worked with extensively at Farnear Holsteins. Shot of Adeen has a +2443 GTPI Robust daughter, Farnear Ready for Adeen, and several other high genomic daughters by Freddie, Observer and Domain. Arlene's Toystory daughter, Applouis Toystory Annie Very Good-86-2YR, has high offspring at Siemers Holsteins by Explode, Bookem, Robust and Observer.

Dominating Type

With the graduation of sons AltaAmazing, Avalanche, Atlantic, Atticus, Aftershock, Attic and now Atwood, the Atlee sons are leading the industry transmitting her elite type.

The former #1 genomic type sire, Maple-Downs-I G W Atwood, is scored Excellent-90 and easily tops the PTAT list for proven sires at +4.16T following the August 2012 run where he received his first official proof. Dairymen worldwide love their Atwoods with the early daughters scoring very well and dominating the young cow classes at national shows across the U.S. and Canada. Further proven by the five junior two-year-old Atwood daughters, all scored Very Good-87 or higher and mentioned above direct from Adeen.

"In my opinion, G W Atwood will be the breed's most significant type sire since Durham and Goldwyn. G W Atwood sires those tall dairy open rib cows with amazing udders and feet and legs. His daughters can be a bit immature as young cows but they body down and widen out as they mature, just like the Durham and Goldwyn daughters have done. I am confident G W Atwood will be an impact sire for many years to come, at World Dairy Expo, Royal Winter Fair and other major shows around the globe," shared Charlie Will, Select Sires.

The #2 proven type sire at +3.77T is the Alta bull, Mr Atlees At-

Charlie Will, Manager, Holstein Sire Selection, Select Sires, Inc.

"In my opinion, G W Atwood will be the breed's most significant type sire since Durham and Goldwyn. G W Atwood sires those tall dairy open rib cows with amazing udders and feet and legs. His daughters can be a bit immature as young cows but they body down and widen out as they mature, just like the Durham and Goldwyn daughters have done. I am confident G W Atwood will be an impact sire for many years to come, at World Dairy Expo, Royal Winter Fair and other major shows around the globe."

laAmazing. Mr Atlees GW Avalanche-ET is the #7 PTAT on the list and is marketed through Field of Dreams Genetics. Maple-Downs-I G W Atlantic is the #24 proven type sire at +3.02T and like his full brother Atwood, is marketed through Select Sires. Attic and the #11 Conformation bull in Canada, Atticus, are available through Semex and add to the list of outstanding Goldwyn sons of MD-Delight Durham Atlee. The Shottle son at ABS Global, Inc., Ms Atlees Aftershock, appeared in August as the #9 PTAT proven sire at +3.32. This tremendous line-up certainly adds credit to Atlee's brood cow status and may even be an industry first!

Influence Around the World

The prominence of this prolific type family can certainly be seen throughout North America, but with the export of embryos and semen, the impact has spread across continents. Embryos from the golden flush were exported to the UK resulting in Heavenly Golden Atlee Very Good-87-2YR-UK and Ridgefield Gold Atlee Very Good-88-2YR-UK. Golden Atlee is owned by Ponderosa and has daughters by Man-O-Man, Sanchez and Shottle. Gold Atlee is owned by Riverdane Holsteins and has a Very Good-88-2YR Shottle daughter, Riverdane Shottle Amber (+2072G) at Willsbro Holsteins and Riverdane Shottle Angel (+2071G) at Ponderosa. Amber and Angel are both 3.77 for type, making them the #1 PTAT Shottle daughters in Europe.

Ridgefield Delete available through Xenética Fontao, Spain is also the result of an embryo exported from the golden flush. A full brother to Atwood, Delete has a GTPI of +1923 and +3.50T. "Spanish breeders showed great interest for Delete, his family and pedigree just from the very start, he has been one of our best sellers, that's why he has already 1,300 registered daughters in the Spanish herdbook (all of them born between Nov. 2011 and Aug. 2012), but he has also been used a lot in other countries, for example he has about 500 registered daughters in Austria. We have exported his semen to several countries, not only European countries (mainly Germany and Austria), but Canada, too. His first milking daughters have already been scored and they are creating lots of excitement amongst the Spanish breeders," shared Mauricio de los Santos, Xenética Fontao.

Lavenham Adeen Excellent-90-UK and Skyhigh Durham Adeen Excellent-92-UK are two Durham daughters direct from Adeen with several offspring in the UK, including Holmland Goldwyn Adeen the Very Good-88 EX-MS two-year-old.

In France, Bon Temps has two Very Good-86-2YR-FR Goldwyn granddaughters of Amlaird Lee Alice Excellent-94. Dam is a Very Good-87 Durham that produced the former #1 PTAT heifer in Europe by Explode and topped the Vente D'Orne Sale in 2011 for € 11,000. And of course there is the ultra popular Shottle daughter, Anya Very Good-2YR-NL of Bolleholster Holsteins, the former #2 PTAT cow in Europe and dam to the #1 PTAT Sanchez in the world.

Katsumi Ito, Genetics Hokkaido shared, "Adeen family is working very well in Japan. We have lots of daughter out of Adeen by Durham, Dundee, etc. One of her daughters was a grand champion cow at the Hokkaido Black and White Show, that is the biggest spring show in Japan." It was Tanaka Farm's TMR Adeen Dundee Chief-ET, the Dundee daughter of Chief Adeen that was named first place senior three-year-old and grand champion.

Looking to the Future

The legacy of this elite type transmitting family has only just begun. Rooted by the tremendous Starbuck Ada and the Skychief sisters, Alicia and Adeen, coupled with the mating decisions of true Holstein breeders, this family has already begun to flourish worldwide. Only time will tell what the next generation of Adas will do when they hit the colored shavings at World Dairy Expo, but whatever the result, there is no question in the influence that this family has had on the Holstein breed.

Ms Atlees Goldwyn Ariel EX-92 I (Goldwyn x Atlee)

HOLSTEIN PLAZA

THE ONLINE MARKETPLACE CONNECTING FARMERS WITH ELITE HOLSTEIN GENETICS

RUS & RUTH ROBIN, Kayton Holsteins, Australia
Purchased Superior Loph Lactaria Family Embryos

“ Our experience with using the Holstein Plaza website has been a great one. I decided to do a search on the internet for embryos, one of the first places I looked was the Holstein Plaza website and to my surprise the embryos were very reasonably priced helped by the strength of the Aussie dollar. I looked into the associated costs, which were well laid out for me on the website, and applied for a user name and password. Within a short time I was bidding and the experience itself is a lot of fun. Once the embryos were won, the speed in which AMS Genetics processed the paperwork was fantastic. I found myself contacting Steve Mower to ask if the embryos could wait a shipment or two...so I could buy some more. Steve was very fast to respond, and I wasn't left wondering if emails were lost in cyber space. In fact the more I conversed with Steve, the more comfortable I was with the whole process, which not more than two months earlier seemed something we would have never actually have done. I found the best thing about the Holstein Plaza online auctions has been the chance to get into great cow families at reasonable prices. Those absolute elite families are available to purchase, but the spread of choice is the best part. We will definitely use Holstein Plaza and AMS Genetics in the future. ”

LEONARDO MOREIRA C. DE SOUZA, Minas Gerais, Brazil
Purchased (Fleisch) Low Rise Family Embryos

“ I have imported some embryos purchased from Holstein Plaza with a lot of satisfaction. The whole procedure including shipping process is simple, fast, secure and efficient and the quality of embryos has guaranteed healthy pregnancies on my farm, what motivates us to continue using Holstein Plaza as one of our most important imported genetic supplier. Steve and Anna, thank you for your tremendous work. ”

JACOB BEARDA, Flevo Genetics, Netherlands
Purchased K/B/G Gallop A/S Family Embryos

“ As a recognized breeder, I was looking to increase the genetic status of my herd by buying some high profile embryos. I am very pleased with the first transaction I made with Holstein Plaza and AMS Genetics. They were helpful, quick to respond, and had my embryos to the Netherlands in a timely manner as I wanted to get them implanted. All of the embryos I purchased have resulted in pregnancies. ”

WRITE YOUR OWN SUCCESS STORY WITH M
online auctions held the 1

FROM BREEDERS THROUGHOUT NORTH AMERICA

JUAN FELISSIA, La Magdalena, Argentina
Parchural Monoparus Shuttle Lucy Embryos

“I received the embryos without any problems and AMS Genetics was very good to work with coordinating the shipment. I was able to purchase some unique offerings from *Morningview Shil Lucy-ET* and *Twin-Spruce Golf Bailey-ET*. I was looking for some strong genetics to fit into my herd and I found them on the Holstein Plaza Online Embryo Auction.”

PAT MCEVOY, Pavline Holsteins, Ireland
Parchural Red-Van Dairy-Road Embryos

“I am very pleased with the Holstein Plaza website and how easy it is to use. I like all of the information that is offered on the site about the lots of embryos. There is always a good range of embryos from genomic to type...to black and white...to red and white. AMS Genetics' personnel were very helpful and they have a great, regular, low cost export of embryos to the correct destination. The embryos I received were all of good quality and all of the embryos implanted so far have held with 100% conception.”

PHIL & CLAIRE GILMAN, Lilleshall Holsteins, UK
Parchural Horne-Roy Frosty Family Embryos

“We have used the Holstein Plaza Online Embryo Auction several times now and have found it a very simple system to use. There is always a good cross section of bloodlines to choose from and we appreciate gaining access to some matings by sires not yet available here in the UK! Despite the export distance, our embryos have always been delivered within the time frame quoted too - a great service!”

BILL PECK, Welcome Stock Farm, United States
Parchural Emorie-Laurel-Gib Mazy Family Embryos

“The Holstein Plaza Embryo Auction has been an outstanding source for purchasing embryos. I have been able to buy top quality genetics at a reasonable price. The timeliness of delivery and overall service provided by the staff at Holstein Plaza has been above and beyond my expectations. I would recommend anyone interested in seeking the highest end of the Holstein Breed to investigate Holstein Plaza Auctions.”

EUGENE REA, Childers Cove Holsteins, Australia
Parchural Scientific Blessing-Rae Embryos

“While looking into purchasing high quality embryos from North America, I came across the Holstein Plaza website and found everything I needed! Access to the best females in the best herds in North America and the latest information on cow families, the genomics and top sires. The auctions offer something for everyone with very realistic prices. We have purchased several and have been updated on the shipping process until the embryos reach our vet.”

- Semen can be exported World Wide
- Highest health status facilities

Sire Lodge Inc. is located in beautiful Southern Alberta, Canada close to the Rocky Mountains and not far from the Montana, U.S.A border. The facility was originally built in 1975 and was designed to provide optimum bull care and safety for the handlers. Purchased by Sire Lodge Inc. in 2002, the facility can house up to 300 bulls in group and individual housing. Inspected and approved by the Canadian Food Inspection Agency, Sire Lodge Inc. is an IBR free facility that exports semen worldwide. Working with a number of Canadian and International clients, Sire Lodge provides optimum care and semen production in a secure facility with minimal risk.

WITH THE RIGHT TOOLS, ANYTHING IS POSSIBLE

Many breeders recognize how the reproductive tools of In Vitro Fertilization and Reverse Sorted Semen make a powerful combination. IVF can work well on virgin heifers, pregnant females, and/or problem donors. Using Reverse Sorted Semen with IVF can allow you to produce pregnancies of the desired gender from almost any bull, which can make a huge impact on your operation's profitability.

International Appeal

→ Feeding for more Embryos

While genomics are leading, the demand for embryos from high potential young heifers is huge. As a breeder you want to flush this young potential as soon as possible. But how should you feed your calf to get her ready to produce embryos at that early age? HOTSPOTS asked ET specialists around the world. They share their experiences, and give advice about balancing the ration of your (older) donor cows to get more embryos.

Flushing Earlier

In the race to get the highest genomics on the ground, speeding up your breeding is one of the slogans for success. It means flushing your high potential virgin heifers as soon as possible to make early (and even higher genomic) embryos to stay in the leading position.

All around the world breeders and breeding programs start flushing the animals at an early age with some breeders have successful flushes at about nine months.

Aart van den Brink, CRV

“It’s only possible if the calf has developed maximum. You need to utilize every gram growth.”

While flushing on farms he sees good results with breeders who put a lot of attention to their calves. “Make sure you give the calves the

energy and protein they need for the maximum growth. Not the ‘waste’ fudder or wet silage but a high quality and tasteful ration with a lot of structure.”

Be careful that the calves don’t become too fat, he warns. “It’s the same with heifers you want to inseminate; if they are too fat the flushing results will reduce. They will make less embryos.”

At the age of eight to nine months the advice is to feed hay or dry silage and lower the protein rate of the ration. “To avoid fattening. It would be the best if you could feed the animals individually, to adjust if necessary.” In that period the ration will be a little short in protein when the feeding advisor calculates it. “If you want to flush the animal three to four times the calf gets older and the risk of becoming too fat bigger. Only by lowering the protein you can avoid that.” The body condition score of those virgin heifers is at about two. “They look a bit skinny, but that gives the best results”, Aart notices.

Not Over Conditioned

In Australia the circumstances are of course different, says Richard Hull, ET Specialist at Eclipse Embryo Services. “Our animals are housed in paddocks, not in barns.” He has been flushing his own heifers in addition to heifers from clients in six states of Australia.

“The heifers need to be well-grown yet not too well-conditioned.” Leading up to and during the flush program ad lib access to mid-to-low protein hay. “Made from mature grass. And next to that 1 to 1,5

Richard Hull - breeder of the current International Dairy Week Champion, Eclipse Shottle Lotto VG-89 (MAX) also owns and runs Eclipse Embryo Services (est. 1996) in Australia

Richard has been flushing his own virgin heifers in addition to heifers from clients in six states of Australia and notes the following points that can attribute to great flush results.

- Heifers need to be well-grown yet not overly conditioned
- Ad lib access to mid-to-low protein hay made from mature grass with macro and micronutrients are available
- Restrict green grass intake (zero grass is a good idea)
- 1-1.5 kg of low protein grain
- Good temperament heifers tend to flush well
- Do not feed the heifers grain on the day they are to be inseminated
- It is best to flush the heifers as close as possible to the desired breeding age

kilo of low protein grain is a good recipe.” He advises to restrict the intake of green grass. “Zero grass is a good idea.”

The intake of maize is a point of discussion between the two specialist. Aart says not to put maize in the ration of the younger animals. “Because of the risk of becoming too fat, although I know that maize is an easy product for minerals to stick on to.”

In Australia Richard experiences are different. “Good results have resulted from heifers being fed maize silage in small amounts leading up to and during the program.”

Another important restriction to flushing animals at such a young age is that they have to be in their fertility cycle. “They should have been in heat a few times,” says Aart. “Then you are sure everything is working,” Aart mentions.

“All these things you also want when you breed the heifer at an age of 14-15 months, but if she is much younger everything in feeding and management should be maximized.” Richard also says to flush the heifers as close as possible to the desired breeding age. Heifers having their last flush a long way from joining can be shy breeders.

Another point of attention of course is the input of minerals: very important! Vitamin E and selenium are a few very important minerals: macro and micro nutrients. “Milking cows who get concentrates normally get enough minerals to have the right fertility,” Aart says. With the calves and virgin heifers it’s different. Aart advises to feed the animals minerals in their feed. “You are sure that they will take it in.” Bolussen also work.

Good Temperament Helps

Do the specialists have more advice? Richard notices that good temperament heifers tend to flush well. “Maybe use the grain to lure the heifers to the yards for treatments, rather than chase them to the yards. And reward the heifers with their grain ration.”

On the day the heifers will be inseminated he advises not to give them any grain. “Heifers spend more time showing signs of heat rather than eating roughage on this day. They will surly eat the grain if offered over the hay which could cause a spike in the protein percentage of the feed intake for the day - thus fertility could be affected.”

Feeding Donor Cows

Feeding donor cows to get the best result with flushing is in principle the same. Aart says that a good result already starts in the dry period. “That’s the most important period for a lactating cow.” Cows have to start the lactation healthy and the negative energy balance should be as low and short as possible. Normally after two to three months in lactation the flushing can start. “The eggs you want to get are made in the dry period, so that’s the start of the fertility as well.”

The ‘eye of the farmer’ is critically important. “Can the cow handle the lactation? Has she been in heat? The answers to those questions are important.” Be patient, he advises. “Sometimes we want to fast.” And if you want to flush her a longer time, make sure she doesn’t get too fat. “Remember that it’s a late lactation cow not being in calf. When she’s too fat, don’t let them lose weight. It means a negative energy balance.”

Venture Genetics

Your Polled Source

Venture Genetics was created in 2008 with the objectives was to get the polled gene firmly established into the worlds Holstein population by offering females, males, embryos, and semen by polled sires from top pedigrees. We at Venture Genetics truly believe the "Future is Polled".

All our inventory selling, more than 40 polled females from these families.
Great opportunity to get in to Polled Genetics!

The Briarpatch-R Misty family

“The American Misty’s and German J’s”

This story is about a deep American cow family that has had a substantial impact around the World with great branches of the family in different continents of the earth. In this article we will have a closer look to the current American branch of Misty’s and the J-family which developed at WEH Holsteins in Germany into a cow family of considerable importance.

History

The first classified cow in the pedigree is the 1972-born Elevation daughter Rag Apple Locust-Grove Charm VG-86-USA. Charm earned Gold Medal Dam and Dam Of Merit status as a high performing brood cow, an achievement mirrored by many of her descendents. Her grand dtr Rilara Mars Las Ravena EX-91-USA EX-MS GMD DOM is a big name in the Holstein breed and in important cow in the development of this great cow family. It is from Ravena that the family first extended into different branches, with many seeing continuing success up to the present day.

Ravena to the Briarpatch Syndicate

Ravena was one of the most popular bull dams of her time and provided an eye-catching cover for Holstein World in 1987. She enjoyed global fame and had embryos exported all around the world with successful offspring in Germany, Netherlands, France, Japan, Italy and South Africa.

Rilara Las Ras Ravena
On the cover of the Holsteins World in 1987

Ravena moved twice; Allen Johnson of Jafral Holsteins purchased her as a bred heifer at the Southeast Show Window Sale in 1981, and 3 years later her career really took off when the Briarpatch syndicate purchased her at the Southfork Sale in Dallas. That’s where this branch really started; she flushed to Thonyma Secret, which resulted in 4 VG-USA dtrs, from which one is the grand dam to the proven sire Dixie-Lee Sand at ABS Global. But it’s one of the other Secret sisters which is the foundation cow of the family of this article: Briarpatch R Misty VG-85-USA 3yr. GMD DOM, who came into the ownership of C.E. Vincent (CMV Holsteins) from Winchester (TE) as a yearling.

Misty and her legacy

Misty has proven to be a great brood cow. Her American progeny list includes 8 VG and 1 EX daughter and right now we can say her flush to Arlinda Melwood was the most successful cross on her. The first flush to Melwood was carried out in 1988, resulting in 4 heifer calves and 1 bull. These each had an impact on the development of the family including the first successful AI bull; CMV Mica, which sold to ABS Global, was one of the very best sons of Melwood and became very popular for ABS Global. The USA counted over 10.000 daughters of Mica and he was also used as a sire of sons.

Following this success, a second flush of Briarpatch R Misty VG to Melwood was carried out in 1993

The Seagull Bay branch

Seagull Bay Dairy houses one of the World’s highest profile herds where the Anderson family have a 1400 cow dairy and some of the breeds greatest donor cows. The Misty-family at Seagull-Bay started through the Celsius daughter of CMV Melwood Mindy VG-85-USA.

Minnow is described as the greatest brood cow ever at Seagull Bay Dairy

Lynmead Celsius Minnow EX-91-USA 2E GMD DOM arrived at Seagull Bay in 1998 and had a big impact on the herd. She is a brood cow extraordinaire and is described as the greatest brood cow ever at Seagull Bay. Her offspring excels in both production and type, a pattern set by Minnow herself. She produced over 100.000 kg lifetime production with a best lactation of 22.476 kg milk in 365 days, and belonged to the greatest daughters of Celsius with a final score of EX-91-USA 2E! She produced 10 VG and 3 Excellent daughters including the famous Seagull-Bay Manat Mirage EX-90-USA. Mirage sold to Roorda Dairy in Iowa, where she has enjoyed her own notoriety as a granddam of both Robust at Select Sires and the #1 Shottle cow in the breed, Mindy.

The America Misty's

One of the greatest type Oman's in the breed

Roylane Shot Mindy VG-85-USA 2yr.
#1 Shottle out of the #1 Oman & Dam to #1 Snowman

Genomics: Check

If we would make a checklist of categories that go towards constructing the perfect family, than we also can check off the Genomic part of the Misty's. Roylane Holsteins can attest to this since Manat Mirage's daughter, Seagull-Bay Oman Mirror VG-86-USA, arrived at Roylane Holsteins as a calf and turned out to be something of a Genomic miracle! Mirror herself is still the #1 GTPI Oman daughter in the breed with a GTPI score of +2335. And she can transmit! Her Socrates son, Roylane Socra Robust @ Select Sires is the #1 Socrates son in the breed and has been used very successfully as a sire of sons; his son

Ingo Schnoor (DE)

"The J-family are very trouble free, breeding true freestall barn cows with great willingness to milk"

Seagull-Bay Supersire (from another great family of Seagull-Bay Dairy on the dam's side) is the #2 active GTPI Bull in the breed at the moment.

His Shottle sister is getting most attention of the family as her name remains at the top of in the American GTPI ranking. Currently standing 2nd overall, Roylane Shot Mindy 2079 VG-85-USA 2yr. is the #1 GPTI Shottle daughter in the breed with GTPI +2454! Mindy is now owned by Buschur Dairy Farms in Ohio and has 12 progeny testing over 2400 GTPI, including S-S-I Snow Malena 7514, GTPI +2524, the #1 Snowman in the USA and S-S-I Shamrock Menna 7392, GTPI +2592.

Misty's daughters at Etazon

It was the 1990's when Holland Genetics intensified their search for genetics from the greatest American donor cows for their American Etazon herd. In 1994 Etazon were looking at Melwood's finest daugh-

ters and as a result, brought both CMV Melwood Mimi VG-86-USA and CMV Melwood Millie VG-88-USA into their program. Millie proved a sound investment with Excellent daughters by Mascot and Prelude while Minie became the foundation behind the German J-family of Wendland Holsteins.

International career; Germany

There direct links between so many different great and famous cows in the breed which all go back on one and the same foundation cow. This is now becoming apparent with the Misty's, having several branches of influence in today's Holstein population in different areas in the World. How is Misty the power behind one of the most successful German cow families nowadays? The J-family of Wendland Holsteins of the Hintze family, established in the North of Germany in Trebel.

The first cow of the family came through Jauequet Mountain Misty GP-84-USA 3yr. Her Airliner embryos were exported to Europe and resulted in Airliner Janin which sold from the Alta Nucleus herd to

Shot Mindy is the #1 Shottle in the breed out of the #1 Oman and dam to the #1 Snowman

Wendland Holsteins where she was at the start of a great career. She was scored EX-90-DE and was flushed intensively for the many contracts she had to fulfil. Unfortunately for Wendland Holsteins, almost 80% of the resulting calves were bull calves. Unfortunately for Hintze, but good for the AI Station! Janin's Jocko son Jobess went to

The German J's and the NOG test station

Ingo Schnoor – Sire Analyst RSH: "The first time I saw something from the family was in 2000 when I saw Marty daughter WEH Jenny, a completely white milking heifer with super feet & legs and udder. She became EX-90 later as an older cow. Her silky black sister, WEH Jessi was the first cow out of the family to come to the NOG test station and many family members have followed. The results from these cows in the test herd have shown tremendous performance; one of the greatest results is the Top 10 position of NOG Mato which is the #10 RZG bull in Germany. The distinctive brands of this family are the super feet & legs, very good frames and plenty of length through the body. This family is absolutely trouble free, breeding true freestall barn cows with a great willingness to milk, great persistency with high fat and protein components and great fertility."

Masterrind and with 6559 daughters in his current proof, Jobess is still the #1 RZG daughter proven Jocko Besne son in the breed.

Janin's daughters

From the very few daughters Janin produced, two of them still have a big impact on the Wendland Holsteins herd today. Her Ricecrest Marty daughter WEH Jenny EX-90-DE was her best type daughter, but it was her Convincer daughter WEH Jessi VG-87-DE who had the most success as a brood cow through her Laudan daughter, WEH Jessica VG-88-DE, the most important branch of the Jessi's.

Jessica is one of the most popular daughters of Laudan and one of the

The J family have a member in the proven and genomic sire top 10

better transmitting Laudan daughters worldwide, keeping the outcross branch alive which makes this part of the family so interesting. Her Mascol son NOG Mato at RMV is the #10 bull in the RZG proven sire list in Germany. His index tells us what we can see back through the whole family; highly productive cows with high protein, exceptional fitness traits and longevity. With his attractive outcross pedigree and his overall balanced index he is a great choice for all commercial dairy farmers.

Next generation of great brood cows

The future looks bright at Wendland Holsteins as the next generation from Jessica's daughters are keeping the J-family in top of the Global rankings for TPI and RZG!

Mato's full sister WEH Jenna VG-86-DE (2/2La 305d 10.221kgM 4.2%F 3.9%P) continues the great breeding pattern of the family. Her Gerard son Genesis is the current #4 gRZG bull in Germany with 08/12 gRZG +157, and she also bred one of the highest sons of Atwood with gRZG +148 and a high Garrett son with +147! Her Garrett daughter WEH Garrett Jenna is the #1 gRZG Garrett daughter in Germany with gRZG +149. Her Dutch Gerard daughter at CRV is the #1 GLPI Gerard daughter in Europe with over 3000 for DGV LPI.

Jenna's sister by Jefferson, WEH Janne VG-86-DE 2yr (ML 305d 14.905kgM 4.1%F 3.8%P) has a impressive progeny list. From all of her tested sons she has a huge success rate of acceptance by the AI stations with a gRZG +148 Iota, gRZG +146 Goldday, gRZG +138 Pitbull and gRZG +150 Shamrock, to name just a few! The female branch also goes from strength to strength with her Bowser dtr WEH Jane at 3rd place in the European GTPI Outcross ranking (08/12 GTPI +2241) - imagine this great pedigree with Bowser, Jefferson and Laudan in a row. Her Bronco sister, WEH Bronco Jenny sold for € 16.000 at the Schau der Besten Sale 2011. Jenny's full sisters at Wendland are scored gRZG 149 and gRZG 142 and this last one, Bronco Judy, has had her first progeny tested where her Epic scores over 150 for gRZG and a Gold Chip son with gRZG +146!

The German J's

Gen-Mark Stmatic SANCHEZ

Choose your favorite SANCHEZ daughter

Choose your favorite daughter of Gen-Mark Stmatic SANCHEZ (Select Sires) in this issue of the Hotspots magazine. The impressive bull Sanchez is a son of Comestar Stormatic from the family of Henkeseen M Hillary EX-94 3E GMD DOM, making him also a family member to the other great type bull Mesland Duplex.

From the start, Sanchez has been well known as a true type bull. Overall he sires great type for dairy farmers and gives the ability to make that show-stopper. We have seen many high placing and champion Sanchez daughters on the national show circuit from the moment his second crop daughters calved in. Today, Sanchez has over 8000 daughters in his American index which gives him a TPI of 1700 with almost 1000 lbs of milk and over three points for type!

Sourcing Genetics for the World

AMS Genetics can source embryos to fit your individual requirements. If you want production or shine in the show ring AMS Genetics is your starting point!

EXAMPLES OF DONOR COWS THAT AMS GENETICS IS WORKING WITH

KHW Goldwyn Aiko-ET *RC EX-91 DOM
Working with *RC Shamrocks from Aiko

Nova Shottle Evelyn-ET VG-86-2YR
#10 GTPI Cow (US) and from the EROYS

Kevrel Shottle May-ET EX-92 DOM
Working with huge genomic daughters

KHW Regiment Apple-Red EX-95 DOM
Grand Champion and Million Dollar Cow

AMS Genetics has 29 years experience in the sourcing and exportation of Holstein embryos to the world. Although many things changed over the 29 years, one thing is still constant, our commitment to our clients to provide great service and to locate and obtain the genetics that they need. If you are looking to purchase embryos to introduce new genetics into your A.I. company or your herd, AMS Genetics will be your partner in sourcing the U.S. genetic base and handling the exportation. We can adapt our selection to emphasis your selection criteria, so we focus on the genetics that will do the best job for your goals.

Services:

- Sourcing and locating embryo donors
- Herd visitation selection tours
- Contracting of donors
- Complete coordination of: embryo recovery, health certification and documentation, inland assembly and international shipment insurance
- Housing and management assistance for cattle housed in the United States
